RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterick (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "§."

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A dash (—) across the column signifies "nil," and running dots (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, October 3, 1874.

Stock Exchange and Money Market.

The financial situation is more encouraging. The demand for Government bonds and for Railway and Miscellaneous securities has been much more confident, and the course of values has been generally upward. The movements in the commercial line have been on a more liberal scale, and prices of most commodities have shown more steadiness. There has been less depression noted in domestic cotton goods; partly because of the resolve of the New England manufacturers, at their late meeting in Boston, to reduce production fully one-third until further notice. Domestic Woolens have been fairly active, and the more seasonable fabrics have been held with firmness. The Money market has been ruling easy for responsible borrowers all through the week, with call loans quoted at 2@3, and the best discounts at 5@7 per cent per annum. The offerings of funds have been far greater in amount than the requirements of borrowers, in good standing. A few failures in the mercantile line, during the week, tended somewhat to arrest the restoration of confidence, but the impression was quite temporary. The City banks, last week increased their reserve of legal tender notes $895,600, and reduced their deposit item $380,000, while cutting down their specie average $1,032,200. They report a decrease of $1,029,800 in the loans and discounts, and of $12,800 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $57,691,022, against $59,608,770, the preceding week; and a coin board of $54,107,501, against 55,117,510, on the previous return. The City bank exchanges, during the week, were $405,048,052, or a daily average of $67,508,000. The customs revenue of the port, during the week, was $2,449,139. The City banks reported their average of gold last week at $18,919,900, and their greenback average at $65,700,400. Their deposits stood at $236,460,800. The loan item was $279,539,400. The circulation was $25,625,800.

The aggregate of the outstanding U. S. currency, of all denominations, Sept. 1, was $428,422,256. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is 350,436,158.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 26⅛ millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $14,569,339; special deposit of legal tenders for the redemption of certificates of deposit, $56,165,000; coin, $73,611,241, including $26,216,100 in coin certificates.

There has been more animation in the Gold line. The speculative demand has been more confident, while the inquiry for Custom House use has been up to a fair average. The export drain has been moderate. The price of Gold has been higher. The extremes of the week have been 109⅝@110¼, closing at 110⅛, as against 109⅝ on Wednesday of the preceding week. The specie outflow last week was $564,602. The imports of specie at this port since Jan. 1, have been $4,142,503, against $3,109,107 same time last year. The customs demand for Gold last week averaged $419,000 a day. Foreign Exchange has been more sought after and quoted firmer, with Bankers' sixty day bills on London closing on Wednesday at $4 84@$4 84½; sight bills on London at @4 86½@$4 87 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,278,759.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $7,503,092.

Government Securities have been attracting more attention from investment buyers, and have shown more firmness toward the close. The offerings of the favorite issues have been generally lighter.

U. S sixes of 1881 closed on Wednesday of this week at 117⅞@118⅛; U. S. Five-Twenties of 1862, 112⅝@112¾; U. S. Five-Twenties of 1864 at 115@115¼; U. S. Five-Twenties of 1865, 115⅝@116⅛; U. S. Five-Twenties of 1865 consolidated, 115⅝@115⅞; U. S. Five-Twenties of 1867, 117@117⅛; U. S. Five-Twenties of 1868, 117@117⅛; U. S. Ten-forties at 111⅝@112; U. S. Fives of 1881, (Funding Loan) 118@118¼;

Six per cent. currency Sixes from 117⅜@117⅝.

A more active inquiry has been noted for State and Railway bonds, prices of which have been quoted generally firmer. Railway and miscellaneous share property has been decidedly brisker, and quite buoyant as to values.

In general business there has been more activity reported in the leading lines, with prices of Breadstuffs and Cotton quoted steadier; Provisions, lower and irregular. Tobacco, Wool, Petroleum, and Naval Stores, firmer. The Metal trade has been more active, with a better demand noted for American Pig Iron, especially No. 1, within our range. Scotch Pig Iron, scarce, and somewhat nominal in price. Eglinton Pig Iron $36@$37; Glengarnock, $37@$38; No. 1 American Pig at $29@$31, No. 2 do. at $27@$29; Forge, $24@$26; English Rails at $50, gold; American Rails at works, $55@$60; Old Rails, $34@$38. Wrought Scrap, $38@$37. Hardware has been moderately sought after. Earthenware, dull and unsettled. Groceries closed tamely at the advanced figures on Sugars and Coffee. The ocean freight market has been more active, with the main inquiry for accommodation from Grain, Petroleum, Cotton, and Lumber Shippers, at, however, irregular rates.

At the auction sale of Scranton Coal, on Wednesday, 60,000 tons were disposed of at $4 95@6 05, as against $4 75@5 92½ in August.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—New London Northern R. R., 105; Pacific R. R. of Mo., 38⅛; do. 1st mort., 78¾; Atlantic and Pacific R. R. pref., 13¼; St. Louis, Iron Mt. and Southern R. ☞ The earnings of the Cleveland, Columbus, Cincinnati and Indianapolis Railroad for the six months ending June 30, 1874, were $2,083,600 69, the expenses $1,686,099 78, and the net earnings $347,500 91. For the six months ending June 30, 1873, the earnings were $2,487,050 30, the expenses $1,783,644 56, and the net earnings $703,405 74—showing a decrease in earnings of $453,449 61, with a decrease in expenses of $97,544 78, making a decrease in the net earnings of $355,904 83. The assets of the company June 30, 1874, amounted to $20,516,281 83, against $20,190,646 94, on the 31st of December, 1873—an increase of $325,634 89.

☞ Ground was broken on the 16th ult., at Valcourt Village, upon the proposed Missisquoi and Black River Valley Railroad, which is to run between Richmond, Quebec, and Newport, Vt.

Milwaukee and Southwestern Railroad.

The Milwaukee *Wisconsin* says that active measures are being taken to organize a company to complete the Milwaukee and Beloit Railroad, which was graded nearly twenty years ago, but which the panic of 1857 left unfinished, and then adds:

It is proposed to place a narrow gauge track on this line, to connect in due time with the narrow gauge system in Iowa, that is meeting with such success.

There is no richer country than that through which this road runs, and Milwaukeeans should not be slow in taking advantage of the circumstance that we have a road bed already graded awaiting the rails and rolling stock that will so materially assist in bringing prosperity to the city.

The proposition is to form a new company, taking the old franchise and allowing the old stockholders a proportionate share of the new stock, and to complete the road by local means, through honesty and economy. Those who have stock in the old company are respectfully requested to correspond with Major T. H. Stears, Milwaukee, who has the completion of this road at heart, and is interested in the new company.

Chesapeake and Ohio Railroad.

A meeting of the creditors of this company was held in Baltimore on the 28th ult. There was no formal organization of the meeting, but the affairs of the company were discussed by those present, and there seemed to be a willingness to accept the proposition of the company that the creditors extend the debt by taking income bonds in exchange for the present obligations of the corporation. It was stated that over three-quarters in amount of the creditors outside the city have agreed to the proposition. In a supplemental circular recently issued by Messrs. FISK & HATCH of this city—a copy of which may be obtained by making application therefor—they say:

"It is a mistake to look upon the proposed settlement as a sharp bargain between the company and its creditors, or to suppose that there is other than the fullest community of interest. The directors of the company are among the largest holders of both classes of the bonds, and it is up on them and upon ourselves that the settlement imposes the heaviest concessions. Our own pecuniary interest in the road extends to both classes of the bonds, and to the floating debt, while, in consequence of our connection with the company as their financial agents, during the period in which most of the existing indebtedness has been incurred, we cannot do otherwise than feel a degree of responsibility for the interests of all concerned."

Taxation of Corporations.

The Court of Appeals has recently made an important decision, affirming the judgment of the Supreme Court in the question at issue between the Tax Commissioners and the Pacific Mail Steamship Company. This corporation, which holds its charter under the laws of New York, refused to pay taxes on the steamships used exclusively in navigating the Pacific Ocean, on the ground that as the tax laws have no extra territorial operation, this property, being situated permanently beyond the limits of the State, is not liable to assessment for taxation here. In the Hoyt case, in 1861, the Court of Appeals maintained this point of exemption of property outside of the State, but the Tax Commissioners contended that this decision was not applicable to corporations for the reason that they are taxed on different rules from those which regulate the taxation of individuals. Special stress was laid by them on the value of the franchise as a subject of taxation, and it was urged that the personal estate of a corporation is blended inseparably with the franchise. This view was disapproved by the Supreme Court, who decided against the Tax Commissioners on the authority of the Hoyt case; and the Court of Appeals have now affirmed this judgment.

Bridge Building.

A letter to the Baltimore *Sun*, dated at Washington, September 27th, says that arrangements for the erection of a new navy yard bridge across the eastern branch have been matured, and a contract made for the construction of the bridge with the Phœnixville Bridge Company of Pennsylvania, which constructed the new iron bridge on the site of the old chain bridge. The new bridge will be of iron, of the Murphy-Whipple truss pattern, 1,362 feet long, twenty five feet wide, twenty of which will be carriage way and five foot path. The floor of the bridge will be of wood, resting on fifteen inch iron beams and supported by fourteen arches, in spans of ninety six feet. The posts will be handsomely ornamented and the footpath separated from the carriage way by a tasteful iron railing. The strength of the bridge will be equal to a moving weight of six hundred pounds to each square foot, and its cost will be $142,899. There will be a new draw near the middle of the bridge.

The Wilmington (Del.) *Commercial* says that the Philadelphia, Wilmington and Baltimore Railroad Company have contracted with the Baltimore Bridge Company for the erection of the eight remaining spans in the bridge over the Susquehanna River at Havre de Grace. The contractors, however, are merely architects, and not builders, and have divided the work equally between the Phœnixville Iron Company and the Edgemoor Iron Company, who will each build four spans. The draw is not included in this contract. The work is to be completed in 1877, or sooner, if practicable.

Pueblo and Salt Lake City.

The Pueblo *People* says that the executive committee of this company have awarded the following contracts for the road between Pueblo and West Las Animas: Messrs. Moore, Carlile and Orman grading of the road; C. C. Welch, Golden, tieing and bridging the road. The grading is to be finished by March 1, 1875, and the tieing and bridging by July 1, 1875. The whole work to be paid for in county bonds. There is but little doubt about obtaining the iron as soon as the road bed is ready for it, as negotiations already made to that end have been successful thus far. The work of grading already commenced will now be vigorously pushed forward, and Pueblo will have an Eastern railroad as soon as it is possible for the workmen to build it.

Quincy and St. Paul Railway.

A company has been organized in Missouri for the purpose of building a road from West Quincy to Albia, Ia., to be known as the Quincy and St. Paul railroad. The road will connect at Albia with the Central of Iowa, giving Quincy a direct line to St. Paul. The programme is to run the line from West Quincy to LaGrange, thence west and northwest through Monticello, on to the terminus. The West Branch of the old Mississippi, Valley and Western was recently purchased by this company, and has been graded for some distance west from Canton. The line of the new road is to strike the graded portion somewhere near Monticello.

Cincinnati, Sandusky and Cleveland R. R.

The annual report of the Cincinnati, Sandusky and Cleveland Railroad has been just received. It has the merit too often wanting in railroad reports, and in some of the previous reports of this road, of clearness and conciseness. Stockholders can understand, as it is evidently made with that object in view and not to mystify and deceive. The gross earnings for the year ending June 30 were $800,351 44; expenses, $533,179 91, net earnings, $267,171 53—being about 33 per cent of the gross earnings. From this sum was paid interest, dividends on preferred stock and rents, $266,864; leaving a surplus of $307 53. These results of the past most unfavorable year in railroad earnings are very satisfactory, and prove that there is a real value in the stock when we consider that a general improvement must undoubtedly take place in the earnings of all our roads. The defalcation of the late President is well commented upon in the report, and a statement given showing the amount he disgorged of his ill-gotten plunder. This with other assets is sufficient to provide for the floating debt. The road is now in the hands of honest and efficient men and its future prospects very encouraging. The earnings since the report show a gain in July of $2,000, in August of $5,500. Three weeks of September show a falling off of $6,000 owing to the temporary suspension of the grain carrying traffic.—*Boston Journal.*

Erie Railway.

At a regular meeting of the directors of this company on the 24th ult., the President stated that the affairs of the company were steadily improving, and that operating expenses had been largely reduced without in any way impairing the capacity or efficiency of the road, the business of which was considerably increased. Dispatches received from Mr. John A. C. Gray, the director who went to London six weeks ago, announce that he has successfully negotiated a sufficient amount of the company's second consolidated mortgage bonds to pay off all London indebtedness and substantially to pay all the floating debt in this country. This negotiation finally disposes of the Erie railway's floating debt, and leaves the road on a cash footing.

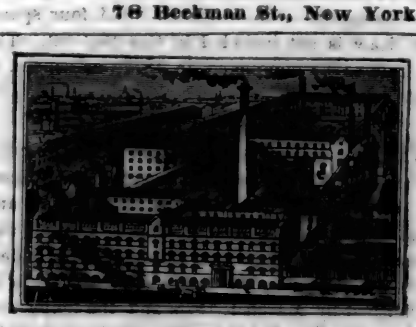
☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending September 19, at 476,530 tons, and for the coal year 13,017,328 tons, against 14,224,937 tons to corresponding time last year, being a decrease of 1,207,609 tons. The bituminous tonnage for the week is 72,921 tons, and for the year 2,371,609 tons, against 2,287,709 tons to same time last year, giving a total of all kinds for the week of 478,451 tons, and for the year of 15,388,937 tons, against 16,514,646 tons to same time last year, being a decrease of 1,125,709 tons.

☞ Eight new locomotives and twenty passenger cars are being constructed for the New Jersey and New York Railroad. The lease of this road, which is known as the Hackensack branch of the Erie Railway, expires on November 1, and will not be renewed.

☞ A company, with ample means, has been organized to extend the Des Moines narrow gauge road south to St. Louis. The success of the road to Ames has led to this movement.

Railway Construction in Europe and the United States of America since 1850.

A statistical abstract has just been published by the Board of Trade, showing the length of railways in various States, distinguishing as far as practicable the length constructed by private Companies and by the State respectively in various years between 1850 and 1872. Commencing with the United Kingdom, we find that in 1850 the length of railways constructed amounted to 6,621 miles, increasing in 1855 to 8,280 miles, reaching 10,433 miles in 1860, and 13,289 miles in 1865, when the increase up to 1870 becomes more moderate, being a total of 15,537, and in 1872 reaching a total of 15,814 miles. These figures show the steady growth of the railway system in a country like ours, where capital is abundant and joint-stock enterprise is unhampered by State interference. In France, the development of railways under the Companies' system is remarkable. In 1850 there were only 1,689 miles constructed by Companies, and 209 by the State, after which period the State ceased construction, and the total mileage constructed rose to 3,434 in 1855, advanced to 5,858 in 1860, increased to 8,439 in 1865, and reached, 10,847 in 1870; the increase between the two latter periods being greater than that of the United Kingdom. The seven States comprising the present German Empire have been very progressive in railway construction, and here, with the exception of Prussia, the State since 1860 appears to have gone ahead of the Companies, especially during the five years preceding the Franco German war, in which the State alone constructed nearly 2,000 additional miles of railway, and the Companies over 1,000 miles. As might be anticipated, Prussia takes the lead. In 1850 that State possessed but 1,776 miles of railway, 1,190 miles being made by Companies. In 1872 the total mileage of the Prussian railways reached 8,646, and of this 4,788 miles, or over 50 per cent., were in the hands of Companies. The railway mileage of total Germany in 1872 was 12,701, 7,619 of which were State and 5,082 Companies' lines. The Prussian thus represents more than two-thirds of the entire railway system of Germany. Russia since 1865 has been making some progress in railway extension, and like her neighbor Austria very wisely gives the preference to Companies over State construction, having increased the mileage of Companies' lines from 1,773 miles in 1865 to 6,572 miles in 1870, having only 399 miles of State railway in that year, making a total of 6,971 miles of railway, a very small matter for so vast an empire. The returns before us, however, do not include the additional extensions constructed since 1870. Austria since 1860 has not been inactive in railway construction, having increased her mileage from 1,788 miles in 1860, to 2,231 in 1865, reaching 8,724 in 1870, while Hungary keeps pace with the empire by making over 1,100 miles of railway between 1860 and 1870. In Spain the effects of disruption and civil war are clearly apparent in the fact that within the five years ending in 1870 but 898 miles of railway have been opened, whilst in the five years preceding 1865 there were 1,791 miles constructed by private Companies. Portugal exhibits but little activity in railway making, the country being no doubt an unpromising one in an engineering point of view. Italy exhibits a striking contrast to Spain in the rapid strides she has made in opening up the country by railways, having advanced the mileage of her completed railways in the 10 years ending 1870 from 1,117 to 3,855 miles, whilst in the two last years ending 1872 the total length constructed by private Companies in Italy (including Rome) amounted to 4,087. In Holland and Belgium, where the State appears desirous of acquiring the ownership of the railways, but few additional lines have been made since 1870, the increased mileage between 1865 and 1872 being nearly equal in both States. The total length constructed in the former State up to 1872 was 1,043, against 560 miles in 1865, and in the latter 2,004 in 1872, against 1,418 miles in 1865. In the Northern States of Sweden and Norway the total open mileage has increased in the former from 956 miles in 1865 to 1,198 in 1872, and in Norway from 168 miles in 1865 to 307 in 1872. During the same period Switzerland constructed 137 miles of additional railway, making the total length of Swiss railways up to 1872, 913 miles. Denmark shows a total mileage of 640 miles up to 1872, whilst Turkey had only constructed by Companies a total length of 152 miles of railway up to 1870, and the unprogressive kingdom of Greece winds up the list of Europern railways with a total of 6 miles. According to the return before us the total length of European railways in 1865 constructed by private Companies amounted to 39,626 miles, and those constructed by the States to 7,013, making a total of 46,639 miles. In the United States of America the total length of railways constructed was in 1850, 9 022 miles; in 1855 the mileage increased to 18,454; in 1860 it had risen to 30,634. In 1865 it rose to 35,085, and in 1870 it reached the total amount of 53,399 miles, thus in ten years nearly doubling the lines constructed.—*Herapath.*



☞ The stockholders of the Boston, Barre and Gardner Railroad have authorized their directors to lease the Monadnock Railroad for a term of 99 years. The lessees will pay $12,000 per year for two years, $15,000 for three years and $18,000 for the remainder.

☞ We learn from the Chicago *Tribune* that Mr. W. B. Strong, the assistant general superintendent of the Chicago, Burlington and Quincy Railroad, has been appointed general superintendent of the Michigan Central in place of H. E. Sargent resigned.

IRON CUTTERS.

WE WILL SELL THE BEST IRON CUTTER in use for one quarter the price of any other machine which will do the same work. With it one man can cut rapidly and perfectly one inch round, square and flat Iron, and all smaller sizes. These prices will last only during the dull times. Send for full particulars.

MILLERS FALLS CO.,
78 Beekman St., New York.

Manufactory of the Spencerian Pens, Birmingham, England.

SWAN QUILL Action!

SPENCERIAN

STEEL PENS.

These Pens are comprised in 15 numbers; of the Number One Pen alone we sold more than

5,000,000
in 1873,

and the sale is continually increasing.

They are of superior English make, and are justly celebrated for their elasticity, durability, and evenness of point. *For sale by the trade generally.*

☞ *To accommodate those who may wish to try these Pens, we will send a Sample Card, containing all of the 15 numbers by mail on receipt of 25 cents.*

IVISON, BLAKEMAN, TAYLOR & CO.,
138 & 140 Grand Street, N. Y.

FOR SALE.

A SECOND HAND LOCOMOTIVE, IN NO. 1 working order, about 23 tons weight. Cylinder 13 by 22 inches. Four driving wheels and trucks. Diameter of drivers 5 ft. 6 in. Boiler in good order, with 96 copper flues. For further information apply to

Lobdell Car Wheel Co.,
Wilmington, Del.

The American Wood Carbolizing Co.

Is organized for the purpose of Creosoting Timber for Docks, R. R. Ties, Fence-Posts, Pavements, and all other uses where Timber is exposed to the action of water or air. This Company also proposes to License R. R. Companies and others who desire to erect their own apparatus.

Drawings and specifications of apparatus, either stationary or portable, will be furnished on application.

67,112 miles of Railroad in the United States use annually over twenty-six millions Ties for renewing those destroyed by decay.

The preservation of wood from decay and the attacks of marine worms, has been largely practiced in Europe for thirty years; and with such success that the use of natural wood is now the exception; and of all the various methods that have been employed, that in which creosote oil was used, has best endured the test of time.

This Company, benefiting by the thirty years' practical experience in the use of creosote oil abroad, offer to the public a system of application which is adapted to the wants of our own country, in that green wood can be rapidly and thoroughly treated, even better than dry, and the application of the oil, in connection with the use of moderate heat, be made more uniform and effective than is possible by any other means.

Experience has demonstrated that creosote or dead oil is the only substance by which wood can be treated so as to certainly resist the attacks of marine worms.

Creosoted wood exposed in Charleston Harbor was not attacked by the teredo, while natural wood attached to it was completely honey-combed.

It is confidently asserted that Railroad Ties creosoted will outlast three sets of ordinary Ties, and that creosoted Paving Blocks being beyond the reach of decay, will last as long as stone, with all the advantages of an elastic roadway, beauty and economy of construction.

The economy in the use of creosoted wood, where the term of service is trebled, is measured by adding to the wood used, the cost of the labor expended in construction, and the loss of time spent in replacing the structure, when either decay or attacks of marine worms destroy it.

The system of Seely and Pelton, employed by this Company, has been fully examined and indorsed by Gen. McClellan, Gen. Barnes, Gen. Babcock, Rob't Harris, C. B. & Q. R. R., Prof. Silliman, Capt. Eads, Gen. Cram, Gen. Humphreys, Gen. Meigs, Gen. Belknap, Prof. Chandler, Gen. Gilmore, Gen. Newton, A. B. Mullet, C. H. Haswell.

It has been used by the U. S. Government upon the Dykes of the St. Clair Flats, and upon Gun Platforms for the fortifications on the Atlantic coast; upon pavements in New York and Pittsburgh, by the Department of Docks of the City of New York and the Board of Public Works of the District of Columbia.

Detailed information can be obtained and specimens of creosoted wood examined at the office of the Company

THE

NEW-JERSEY AND NEW-YORK RAILWAY COMPANY

Offer for sale through their Financial Agents,

Messrs. Knoblauch & Lichtenstein,

37 BROAD ST., NEW-YORK,

$500,000 OF THEIR

FIRST MORTGAGE 7 PER CENT. GOLD BONDS,

Coupon Bonds of $1,000 (£200) each.

Interest March 1 and Sept. 1,

PAYABLE IN NEW-YORK OR LONDON,

At the option of the Holders.

Principal due 1903, at 87 1-2 and accr. inter.

Particulars, Maps, and Pamphlets at above Agency.

☞ A dividend of 4½ per cent on the old stock of the Nashville and Chattanooga Railroad Company, and a dividend of 1½ per cent on the new consolidated stock of the Nashville, Chattanooga and St. Louis Railway, has been declared, payable October 1 at New York.

Pennsylvania Railroad.

A meeting of the stockholders of the Pennsylvania Railroad Company was held in Philadelphia on the 3d inst. to take action on the Report of the Investigating Committee. President Thomas A. Scott stated that advanced copies of the report sent to the European shareholders had not up to Friday been received for general circulation, and they therefore had called upon him asking that no action be taken on the report, but postponed till the regular annual meeting of the company on the second Tuesday of March next, by which time every shareholder will have an opportunity to act intelligently in regard to it, which was agreed to. The following is a copy of the resolution which was offered and unanimously adopted:

Resolved, That, in order to enable every shareholder in America and Europe to have an opportunity of thoroughly understanding the report, the condition of the company and the policy indicated by the resolutions attached thereto, final action thereon be postponed until the regular annual meeting of stockholders in March next, and that the Board of Directors of the company be requested in the interim to carry on the recommendations of the committee.

It was also voted that the report of the Committee of Shareholders be received, and that the thanks of the shareholders of the company be tendered to the committee, Messrs. Wm. A. Stokes, Wm. H. Kemble, A. Louden Snowden, David A. Small, John S. Frick, Wm. C. Longstreth and John A. Wright, for the ability, care and fidelity which they have exercised in bringing before the owners of the property, by their report, a full and comprehensive statement of everything pertaining to its affairs; and that the Board of Directors pay all the expenses incurred by the committee in connection with the examination into the affairs of the company, and in the preparation and publication of their report.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending September 26, at 432,293 tons, and for the coal year 18,459,659 tons, against 14,759,075 tons to corresponding time last year, being a decrease of 1,358,416 tons. The bituminous tonnage for the week is 71,041 tons, and for the year 2,441,658 tons, against 2,362,987 tons to same time last year, giving a total of all kinds for the week of 504,341 tons, and for the year of 15,892,317 tons, against 17,072,062 tons to same time last year, being a decrease of 1,125,709 tons.

Toledo, Wabash and Western Railway.

The earnings of this road for the years ending December 31, 1872 and 1873, were as follows:

	1872.	1873.
From passengers	$1,132,764 60	$1,050,198 21
" freight	4,311,970 28	4,335,226 40
" mails	105,809 73	127,419 99
" express	94,664 64	94,382 40
" miscellaneous	363,768 40	131,580 76
	$6,008,077 65	$5,738,807 76
Expenses, viz:		
Conducting transp.	$1,156,917 13	$1,141,014 58
Motive power & cars	1,597,812 28	1,654,065 19
Repairs of roadway and structures	625,308 86	654,855 27
Renewals of roadway and structures	777,078 93	716,726 86
Renewals of equipm't	4,115 70	23,827 73
General expenses	69,126 85	108,942 00
Taxes	101,541 30	102,805 08
Insurance	33,243 07	5,142 08
	$4,365,143 62	$4,407,378 74
Net earnings	$1,643,834 03	$1,331,429 02
Balance income account, 1872		996,208 51
Consolidated second mortgage bonds		1,683,000 00
Accrued interest second mort. bonds		25,100 66
Total		$4,035,738 19
Thus accounted for—		
Interest on bonds		$1,299,935 00
Interest on preferred stock		70,000 00
Rent of track		50,000 00
Rental Wabash Equipment Co's cars		100,000 00
Discount consol. second mort. bonds		336,600 00
Construction and improvements, roadway and structures		1,095,219 01
Construction and improvements, equipment		247,671 77
One-fifth interest in Wabash Equipment Co's cars		200,000 00
Iron and steel rails, 1872		31,767 95
Profit and loss		8,060 84
Balance income account 1873		596,594 12
Total, as above		$4,035,738 19

Compared with the previous year the gross earnings of 1873 show a decrease of $270,169 89, with an increase in expenses of $42,235 12, making a decrease in net earnings of $312,405 01.

The resources for the year and disposition of the same were as follows:

RESOURCES OF THE YEAR.

Net earnings as above		$1,331,429 02
Increase in bonded debt		2,186,000 00
Increase in floating liabilities	$864,212 58	
Less increase in floating assets	127,228 56	
		736,983 97
Sinking fund account		119,925 00
Lafayette, Bloomington and Mississippi Railway		12,726 24
Lafayette, Muncie and Bloomington Railroad		7,854 63
Accrued interest second mort. bonds		26,100 66
Surplus earnings Hannibal Bridge		70,607 48
Total		$4,490,627 00

DISPOSITION OF RESOURCES.

Construction and improvements		$1,342,790 78
Interest on bonded debt		1,395,791 84
Wabash Equipment bonds (purchase of equipment)		200,000 00
Interest Wabash Equipment bonds (use of equipment)		100,000 00
Discount second consol. mort. bonds sold		336,600 00
Consol. S.F. mort. bonds for sinking fund		90,000 09
Advances to leased lines	$297,291 25	
Less unpaid coupons	2,122 00	
		295,169 25
Hannibal and Central Missouri Railroad (general account)		560,158 25
Interest account Hannibal Bridge		83,258 14
Keokuk and Hamilton Bridge (deficiency of earnings)		10,229 84
Advances to Union Bridge, Toledo		18,757 00
Jacksonville depot stock purchased		14,818 03
Payments on real estate for depot purposes		7,635 58
Union Depot Co., St. Louis		600 00
Steel rails of 1872, not charged in that year		31,757 95
Profit and loss		8,060 34
Total, as above		$4,490,627 00

The Toledo, Wabash and Western Railway is composed of the following parts:

	Miles.
Main Line in Ohio	75.5
Main Line in Indiana	166.1
Main Line in Illinois	110.5
Total, Toledo to Camp Point	452 1
Camp Point to Quincy (rented)	21.5
Total Main Line	473.6
Keokuk Branch, Clayton to Elvaston	34.5
Do. Elvaston to Keokuk (rented)	7.0
	41.5
Hannibal Branch, Bluffs to Naples	8.8
St. Louis Line, Decatur to East St. Louis	108.4
Total owned and rented	627.3

The leased lines are operated separate and distinct from the above, and their operations are not embraced in any of the above statements or those which follow. Including these, the total miles operated amount to 933.4 miles. The leased lines are as follows:

	Miles.
Hannibal and Naples Railroad	52.0
Hannibal and Central Missouri Railroad	70.2
Pekin, Lincoln and Decatur Railroad	67.2
Lafayette, Muncie and Bloomington R. R.	86.7
Lafayette, Bloomington and Mississippi R.R.	80.0
Total leased	306.1

At the close of the year the company had 197 locomotives, 102 passenger, mail and baggage, and 4,506 freight cars of all classes. Miles run by locomotives with passenger trains 1,039,874, with freight trains 3,800,679, switching 948,786, fuel 81,815, construction and repairs 252,122—total mileage of locomotives, 5,567,626.

The expenditures for construction and improvements during the year, as stated above, amounted to $1,342,790 78, viz: for roadway and structures $1,095,219 01, and for equipment $247,571 77. There were added to equipment during the year 6 locomotives, 1 postal, 100 coal, 100 stock and 12 caboose cars. 21 miles 940 feet of new side track were added at a cost of $200,063 64; and 6,242 tons of steel rails were laid a cost of $697,242 68. Two new docks were built at Toledo, and a pile bridge one half a mile in length constructed.

From January 1 to the 1st of October, 1873, the earnings had increased $168,794 41. The panic of September caused a falling off of $293,347 32 in receipts for the last three months of the year as compared with the same months of 1872—making the total decrease (excluding elevator earnings for 1872) of $124,552 91.

The number of tons of freight carried east in 1873 was 1,024,389; do. west, 418,574—total 1,442,963, an increase over the previous year of 93,911. Number of tons carried one mile 506,755,366, an increase of 18,044,556. Av. distance each ton was carried, 212 miles. Av. price per ton per mile, 1.406 cents, against 1.487 cents in 1872, a decrease of 0 081 cents. The report says:

This trifling decrease in the average rate, (only a fraction of a mill for each ton per mile) caused a falling off in freight revenue of $248,488 04.

The movement of freight cars was largely in excess of the preceding year, although the earnings were not increased in proportion, owing to the lower rates received, and the greater number of empty cars moved.

For the first four months of 1873, Lake Erie was closed by ice, and owing to the crowded condition of the Lake Shore and Michigan Southern Railway, a light traffic was the result.

For several winters the lack of facilities to move freight eastward from Toledo had been an embargo upon the business of the road, preventing it from realizing the amount of earnings an unobstructed outlet would have secured. Its managers had always anticipated that when additional rail lines were provided at the eastern terminus, the road would do a very large winter business, and as freight rates are then comparatively high, such business would be the most remunerative of any during the year. As the Canada Southern road was to be in operation in the fall of 1873, while very large additions had been made during the spring and summer to the carrying facilities of the L. S. & M. S. R. W., and a full crop of grain was in the country tributary to this road to be moved, it was confidently believed, judging from the two preceding years, that the months of October, November, and December would show a gross revenue of nearly or quite $2,000,000. Repairs and renewals were therefore pushed forward early in the season to be prepared to meet the anticipated pressure for transportation in the later months. Instead of realizing that result the actual earnings for those three months, owing to the monetary panic, were only $1,319,745 29, a decrease from the earnings of the same months in the previous year, as already stated, of $293,347 32.

The earnings from passengers decreased $82,566 39, and earnings from "passengers, mail and express" decreased $61,288 37.

From 1869, the passenger traffic of the road has steadily decreased, owing partly to the opening of new lines and partly to the superior facilities of rival roads.

An effort was begun in August, 1873, to regain the lost passenger traffic, if possible, and also add to it.

The roads from Quincy and St. Louis by way of Chicago, though longer, ran their trains at higher speed and made the same eastern connections as by the trains of this line which left those cities at the same hours.

Commencing August 3d, a train has been run which made the distance from East St. Louis to Toledo, 432 miles, in 14¼ hours, and, with a small increase in running time at the beginning of winter, has since been continued.

To prepare for making this high speed required the track of the whole road (excepting the Keokuk Branch) to be in the best order, and so kept up, and the amount expended during the season for "surfacing track" was $50,644 22, an increase over the previous year of $34,280 61. It also rendered imperative very extensive renewal of cross ties. During the previous winter many accidents (and some very bad ones) had been caused by the breaking of rails, and the damage from such accidents was of course greatest where the ties were decayed. At one part of the road over 1,000 broken rails were taken out of a section of ten miles of track during the winter. To meet the requirements for high speed, and render the track safe as possible, the ties were renewed to the number of 835,000, at a cost of $134,641 42, an increase over the previous year of $44,044 27.

The delay which has unintentionally occurred in publishing this report enables us to notice the good results of the expenditures upon roadway and track, above referred to. The winter of 1873-'4 has been remarkably free from accidents and delays to trains, and broken rails have been almost unknown; notwithstanding the continued rains and soft weather, the track has been thoroughly kept up, and has never been in better condition for business than at the opening of the spring of 1874.

The condition of business following the commercial revulsion of October last, made imperatively necessary a careful revision of the expenditures of the company, with a view to meeting the decrease of traffic and of rates, by a corresponding economy of management.

On the 1st of December a reduction of 20 per cent in salaries of general officers was made, and a similar reduction, scaled according to amounts of salaries and wages, was enforced throughout the whole pay-rolls of the company. This was received by officers and employees in the best spirit—the necessity being clearly recognized. At the same time, the five Divisions of the road were reduced to two, the duties of three master machinists concentrated in the hands of one Superintendent of machinery, and the principle of reduction of organization to a minimum carried into all departments, whilst purchases and all other expenditures were rigidly revised. The President and two Division Superintendents are now performing the duties last year shared by nine officers.

As a result we are able to report that the practical working of the organization seems to have lost nothing of efficiency but rather to have gained; the road, shops and equipments are in no respect run down, and the moving of trains was never more successful and systematic, whilst the comparison of earnings and expenses shows a gratifying increase of net income.

No apology will be thought necessary for thus extending this report beyond the period to which it strictly applies, for as the year 1873 closed with the somewhat gloomy results of the panic, in the autumn, it has seemed due to the Stockholders to show with what success the management has tried to meet the emergency.

It is safe to predict that the growth of the country during the next decade must be very largely shown in increased density of population, in the States east of Kansas and Nebraska. The tide of westward migration will not be drawn to the great plains whilst the now fertile regions of Indiana and Illinois, with their better access to market, are not supporting a quarter of the agricultural population they are capable of enriching. This inevitable modification of the westward

movement must operate to the advantage of the Wabash Railway—reaching as it does into the heart of the choicest country of the west. It seems demonstrably clear, therefore, that the test applied to our success by the events since September, 1873, are the best proof of the certain and great increase of the value and public usefulness of your company's property, from this time forward.

The number of passengers carried in 1873 was 629,799, against 667,059, in 1872, a decrease of 37,260. Number of passengers carried one mile 29,426,175. Av. distance traveled by each passenger 46.72 miles. Av. receipts per passenger per mile 3.57 cents.

Secretary & Treasurer.—WM. B. CORNEAU.

Pennsylvania Railroad.

The following is a continuation of the Report of the Investigating Committee on the Eastern Group of Railroads and Canals controlled by this company, a portion of which was given in our last issue:

7. THE PENNSYLVANIA RAILROAD DIVISION.

This division consists of the following lines:

	Miles.
Pennsylvania Railroad Main Line	358
Columbia Bridge	1
York Branch	13
Hollidaysburg Branch	42
Indiana Branch	19
East Brandywine and Waynesburg Railroad	18
Bald Eagle Valley Railroad	52
Mifflin and Centre County Railroad	13
Sunbury and Lewistown Railroad	45
Tyrone and Clearfield Railroad	44
Ebensburg and Cresson Railroad	11
Western Pennsylvania Railroad	85
Bedford and Bridgeport Railroad	51
Southwest Pennsylvania Railroad	24
Pennsylvania and Delaware Railroad	88
Lewisburg Centre and Spruce Creek Railroad	11
Danville, Hazleton and Wilkesbarre Railroad	44
Cumberland Valley Railroad	152
Total	1,021

We do not deem it necessary to discuss each of the branches above named—to most of the stockholders their condition is well known. The York Branch and Columbia Bridge are now consolidated with your company; the Hollidaysburg Branch, the Bald Eagle Valley, the Tyrone and Clearfield, the Western Pennsylvania, the Southwest Pennsylvania and the Cumberland Valley railroads are all profitable, and most of the other branches will pay the cost of working; but we fail to see the wisdom of the very peculiar contract or lease of the Danville, Hazleton and Wilkesbarre Railroad. This road can scarcely be expected to pay the cost of working, and to invest money in the purchase of coupons is but to obtain a claim that cannot be paid; the company is certainly in default to its bondholders.

A glance at the accompanying map will show you how these roads penetrate rich agricultural valleys, reach valuable coal fields, forests of timber, and mines of iron ore, and make the necessary connections between the valleys of the Juniata and the Susquehanna, the Juniata and the Potomac, and the Conemaugh and the Monongahela rivers. They are valuable feeders, and, on the whole, are of great financial value to your main line.

THE PENNSYLVANIA RAILROAD MAIN LINE.

After treating of so many railroads of varied strength and usefulness, we with pleasure now refer to this grand line of road—this trunk which gives life and support to so many branches, and which, in return, receives strength from them—affecting not only the welfare of the State of Pennsylvania, but directly promoting the happiness and prosperity of a large portion of the people of this continent.

Look at its geographical position: commencing on the waters of the Delaware and Schuylkill rivers, and by its connection to New York city, on the North river and New York bay, it passes westward through the richest parts of the State of Pennsylvania, reaching by its arms of iron the valleys of the two branches of the Susquehanna river—passing along the Juniata river to its source—numerous connections are made both north and south, reaching mines of ore, forests of timber and beds of coal; crossing the great water shed between the waters of the Susquehanna and the Ohio, it is laid upon an almost continuous bed of coal until the Ohio river is reached at Pittsburg, and there by other branches reaches the valleys of the Allegheny and Monongahela rivers. A well built railroad traversing such a densely populated country, and connecting two cities like Pittsburg and Philadelphia, could not fail to attract a large and profitable traffic.

To come to details, the Pennsylvania Railroad consists of four parts.

1. The line from Harrisburg to Pittsburg.

2. The line from Harrisburg to Dillerville and from Middletown to Columbia (leased for nine hundred and ninety-nine years from January 1, 1861), and practically owned by the control of its stock.

3. The Columbia Railroad, from Philadelphia to Columbia (purchased from the State).

4. The Delaware Extension line.

In all forming a direct line from Philadelphia to Pittsburg of three hundred and sixty-five miles, including the Delaware Extension of seven miles.

COST OF MAIN LINE.

By referring to the article on the cost of real estate, road, &c., you will find that the real value of your main line, including the Philadelphia and Columbia Railroad, with the present value of its equipment, real estate, &c., amounts to $94,898,483, while it stands charged on your books at $48 571,808; showing a value exceeding your capital account of $45,826,875.

The retaining of low valuations of personal property in times of great prosperity is an evidence of the wisdom and caution of your late distinguished President. In this connection the following important considerations affecting its value, are necessary to be kept in view in placing an estimate on your property:

1. That the road from Harrisburg to Pittsburg

was built for cash, and at a time of exceptionally low wages.

2. That the Philadelphia and Columbia Railroad (the most valuable eighty miles of railroad in the United States) was purchased from the State at what is now proved to have been a very low figure.

3. The lease of the Harrisburg, Portsmouth, Mt. Joy and Lancaster Railroad was obtained on very favorable terms.

And still further, the real estate owned by the company (much of it purchased at an early date) is worth a large advance on the price paid for it, as appears in the statement above referred to, which shows a substantial basis for the security of your bonds in addition to the value of the road itself, and saves you from great outlay year by year for lands to accommodate your continually increasing traffic.

Now all these different items give your company a vantage ground which will always place it beyond any successful or dangerous competition from present or future rivals; for while the cost of other main roads is fully represented by the amount of stock and indebtedness, on all of which interest and dividends must be paid, your road is expected to pay dividends only on a part of its real value.

TERMINAL FACILITIES.

We repeat the summary of the estimates of the real estate, buildings and improvements given in the former article, as follows:

Philadelphia Division	$13,319,133 75
Middle Division	4,866,598 00
Pittsburg Division	9,679,509 08
Amounting in all to	$27,865,240 83

These investments of capital are mainly in the cities of Philadelphia, Columbia, Harrisburg, Altoona and Pittsburg. About $22,000,000 has been expended for terminal facilities, machine and repair shops, depots, &c., &c.

To give you a better idea of the extent of these terminal requirements, take the city of Philadelphia, and you have—

1. The freight depot at Thirteenth and Market streets.

2. The freight depot at Fifteenth and Sixteenth and Market streets.

3. The general office in Fourth street, below Walnut.

4. The emigrant depot, No. 116 Market street.

5. The very large depot grounds, with the machine shops, in West Philadelphia, extending from the Schuylkill river to near Hestonville, a distance of about six miles, and covering about three hundred and twenty acres.

6. The one hundred and thirty acres of ground at Greenwich.

7. The Washington Avenue elevator, wharves and buildings.

8. The extension of rail along the Delaware river front, and the new freight station at the foot of Walnut street.

9. The extensive grounds on the Connecting Railroad purchased for a cattle yard, containing about two hundred acres.

10. We might properly add, as terminal properties, the large investment made, with your assistance, by private capital at Point Breeze and Girard Point.

We are sure we need go no further to satisfy you that the building of the line of a railroad is but the beginning of the cost. We have gone carefully over the long list of real estate owned by the company, and find it all required for the business of the road except a few unimportant and two valuable properties, which can now be sold—the necessity for their ownership having ceased. These two are the stock yard at East Liberty, near Pittsburg, and the freight depot at Thirteenth and Market streets, in the city of Philadelphia.

THE ROAD AND ITS APPURTENANCES.

We found your road in capital condition, with care and skill everywhere evidenced in its construction. The introduction of steel rails has been a success; for the time had almost arrived when the substitution of some more durable and safer article than the iron rail would become an absolute necessity.

The shops are judiciously located and substantially constructed, with the most approved machinery and all the modern appliances for saving labor. The locomotives are classified, and thereby repairs are lessened in cost and their time for being in the shop shortened.

The car shops are arranged to build and repair cars at the lowest cost, and so far as we are competent to form an opinion, there was that air of adaptation about all the appurtenances to the road, from one end to the other, which impressed us very favorably with the management thereof.

COST OF WORKING.

As an evidence of the condition of the road, the motive power, the cars, the shops, machinery, and other adjuncts, we point you to the following table, showing the number of tons of freight moved one mile, with other details, and at the end the cost of or the rate paid per mile for moving freight:

PENNSYLVANIA RAILROAD DIVISION.

Year.	Tons one mile.	Average tons moved one mile by each engine, including distributing and shifting engines.	Rate per ton per mile paid for moving freight.
1864....	420,627,222	1,581,305	1.87
1865....	420,060,260	1,516,463	2.28
1866....	513,102,181	1,682,302	1.82
1867....	565,657,813	1,724,566	1.54
1868....	675,775,560	1,958,770	1.25
1869....	752,711,312	1,925,093	1.20
1870....	825,979,692	2,091,088	1.00
1871....	1,011,892,207	2,375,334	0.87
1872....	1,190,144,036	2,389,847	0 886
1873....	1,384,831,970	2,442,384	0.857

The figures in the foregoing table corroborate our statement of the economical workings—a result which could only be reached with a high state of perfection in the three great departments of Maintenance of Way, Motive Power, and Maintenance of Cars.

We call your particular attention to a few points, knowing they will be very satisfactory, viz:

In 1864 it required two hundred and sixty-two locomotives (including shifting and distributing engines) to move 420,627,822 tons of freight one mile, giving average tons moved one mile by each engine	1,581,305
In 1873, five hundred and sixty-seven locomotives moved 1,384,831,970 tons one mile, giving average tons moved one mile by each engine	2,442,384
A gain of	861,079

tons moved one mile, or over fifty-four per cent increased service of each engine, while the average mileage of each engine was increased from 17,448 miles in 1864 to 23,213 miles in 1873—an increase of thirty three per cent; and the average cost of moving one ton one mile was reduced from 1 87-100 cents in 1864 to 0 857-1000 cents in 1873—a decrease of nearly sixty per cent.

THE SYSTEM OF ACCOUNTS.

While in our examination we necessarily assumed the accuracy of the books, yet we were the better satisfied to do this, as upon examination of the methods adopted, they show that a charge or entry of a day's labor, of the purchase of a keg of nails, or the largest order, goes through such a series of checks and audits as to make frauds almost an impossibility, requiring, as it would, the assent and knowledge of too many persons to make it safe or successful; yet with all these checks the system is simple and easily carried out.

In the various offices on the road the methods of keeping the details of the cost of working the road in the different departments are very complete, and monthly comparisons are made by each branch—thereby giving a perfect control over the expenditures and insuring economical results.

These sytems of accounts and methods of comparing cost are the growth of years—a cumulative development, year by year, making it more complete.

THE GROWTH OF THE BUSINESS OF THE ROAD COMPARED WITH INCREASED CAPITAL.

We have thought it would be interesting, instructive and satisfactory to the shareholders to know what effect the large expenditures on your main line have had in stimulating the business of your road, and have prepared the tables following:

Extract from the Comparative Statement, showing Cost of Road, Tons of Freight Moved, Earnings and Expenses, and Percentage of Increase and Decrease from 1864 to 1873, inclusive:

Year.	Tons one mile.	Earnings per ton per mile.	Expenses per ton per mile.	Net earings per ton per mile.
1864..	420,627,222	2.46	1.87	0.59
1865..	420,060 260	2.66	2.28	0.38
1866..	513,102,181	2.28	1.82	0.46
1867..	565,657,813	2.09	1.54	0.55
1868..	675,775,560	1 91	1.25	0.66
1869..	752,711,312	1.72	1.20	0.52
1870..	825,979,692	1.55	1.00	0 55
1871..	1,011,892,207	1 39	0.87	0.52
1872..	1,190,144,036	1.4163	0.886	0.53
1873..	1,384,831,970	1.4159	0.857	0.55

Extract from the Comparative Statement showing, Cost of Road, Number of Passengers Carried, Earnings and Expenses, Percentage of Increase and Decrease from 1864 to 1873 inclusive:

Year.	Passengers one mile.	Earnings per passenger per mile excluding mail and expresses.	Expenses per passenger per m.	Net ear'gs per passenger per m.
1864 ...	146,873,005	2 62	1.92	0.70
1865 ...	204,564,893	2 66	1.80	0.86
1866 ...	139,085,550	2.83	2.48	0.35
1867 ...	126,443 284	2.86	2 64	0 22
1868 ...	133,198,302	2 71	2.57	0.14
1869 ...	144,728,652	2.51	2.19	0.32
1870 ...	150,850,087	2.49	1.99	0.50
1871 ...	152,918,042	2.53	1.94	0.59
1872 ...	178,842,748	2.45	1.85	0.60
1873 ...	177,479,020	2.48	2.01	0.47

You will note that these tables include the years 1864 and 1865, during which large amounts of Government freight and a large number of troops were carried over your road. The results of the year 1866 more clearly give the normal condition of freight and travel. Yet we have had the calculations by comparison made with the year 1864, giving you ten years' working. These tables merit study, and we will not weary you with detail, except to call your attention to a comparison between the years 1864 and 1873, where you will note—

1. That with an increase of 59 466 1000 per cent of capital, there was a gain in tons carried one mile of 229 49 100 per cent, and a gain in freight earnings of 210 42 100 per cent, while the rate of compensation received for carrying one ton one mile was reduced from 2 48-100 cents to 1 4159-10000 cents per ton per mile, and expenses from 1 89-100 cents to 0 859-1000, and the profit per ton only from 0 59-100 cents to 0 5589-10000 cents per ton per mile; thus showing that while the charge for moving freight was reduced 1 641-1000 cents per ton per mile, the expense of doing the work was reduced 1 33-1000 cents per ton per mile, and the profit was only brought down 311-100000, or one-third of a mill per mile per ton.

2. The passenger travel will not, of course, show such favorable results, as the outlay on the road was mainly to carry freight; but it shows, as between 1864 and 1873, that with an addition to the capital of 59 460-1000 per cent, the passenger

travel has increased 20 84 100 per cent, and the cost of carrying one passenger one mile from 1 92-100 to 2 7-100; while the net earnings have decreased from 0 70-100 to 0 47-100 cents per mile.

The increase of cost in carrying passengers is due to—

1. The increased number of trains.
2. Increased comfort in the cars.
3. Use of the Pullman cars.
4. High speed of trains.

The slow growth of the passenger travel in the last ten years, showing an increase of only two per cent per year, and the increased cost of carrying a passenger a mile, suggests very forcibly the question whether your Directors, to meet the competition of other roads, are not furnishing the traveling public with facilities beyond the necessities of the case, and at too great a sacrifice of profit in making no difference in charges for transportation per mile between slow or fast trains, plain or elegant cars, medium-weight cars, or the heavey track-destroying Pullman cars. Competition has run wild as to Western travel; the accommodations which the traveler to Chicago, St. Louis, or Cincinnati receives on your fast lines, when considered in relation to the money he pays for them, shows the absurdity. To furnish on these fast lines a through car from each of these cities, without reference to the number of passengers, entails a constant loss to your treasury, as it does to that of other roads pursuing the same policy. Railroad companies will be driven by their absolute needs to adopt the juster principle of charging in proportion to services rendered. The lessened receipts of passengers per mile is due to the competition between trunk lines and the extended introduction of commutation tickets.

From this statement of the workings of increased capital put into your main line, it will be near enough to note that for every million of dollars invested since the year 1863 there has been an increased annual profit of $280,000, taking your profit of 1873 as a basis.

This gratifying result shows that all the addition to capital put in the main line has been well invested. Yet, as trade and travel increase, much more money will be required. The termini at New York, Amboy, Philadelphia, Pittsburg and Baltimore, will continue to need enlargement, and with this increase of trade comes a demand for additional equipment, shops, machinery, track, and all the appurtenances necessary for the working of a railroad.

It seems to be a problem, to those unacquainted with the working of railways, to explain why additional traffic requires such continual outlay of money to move it. Yet we have shown the practical working and given the solution of the problem, in that after a road reaches a certain stage of development, as did your road in 1864, every dollar invested moves a much larger proportion of tonnage than the dollar originally invested could do, and thereby earns a larger percentage of profit.

So true is this, that a question of expense of increased facilities and the increasing trade is annually estimated by your officers, and provided for on the basis of the profit which this increase of investment of money will bring to your treasury. Their calculations will be interfered with at times by causes beyond their control—such as in 1873, when they had been spending money freely in enlarging their facilities to meet the expected increase of traffic, and when the panic came, affecting their trade as it did that of the whole country; but, with the return of general prosperity, these expensive improvements will be found to be of great value and fully remunerative.

PROBABLE FINANCIAL DEMANDS OF THE MAIN LINE.

How soon the trade of the country will recover from its present paralyzed condition we cannot tell; but no one doubts that it will recover and be again prosperous, and it is wise even now to look forward and make some calculations for the future.

There is another bountiful harvest in all parts of our country. This crop will have to be handled and moved in some manner, and it will bring some price. The very moving of a great crop gives employment to many machines and to many hands. The coming of better times must be hastened by the creation of values arising from an abundant harvest. Again, when prosperity comes to us, and every machine and every man is employed, it is hard to foresee how rapid the increase of their combined productions will be. But we have some data to depend upon—found in the workings of your road during the past ten years, from 1864 to 1873. By referring to the table, we find in the ten years the capital was increased 59 46-1000 per cent. or per year, nearly six per cent; and that the tons of freight moved one mile increased 229 49 100 per cent, or per year, nearly twenty-three per cent.

Now, while the increase of capital is not in arithmetical but in geometrical progression, yet, if we take six per cent on the capital on January 1, 1874, viz, $51,511,169 32, being the amount invested in the main line, as a basis for the wants of the Pennsylvania Railroad for 1874, it will give about $3,000,000 as the amount required for enlargement for this year, which should give a proportionate increase of twenty-three per cent on the tonnage moved one mile in 1873. It may not require so much for this year's actual business, and yet 1875 may demand a much more liberal outlay.

The expenditure of money for enlargement is not uniform over the length of the road, nor year by year. In some years the expenses will be very much greater than in others, on account of the character of the improvements. But we should not be surprised to find that the experience of the past ten years on your road would furnish a nearly reliable basis for the future, and we feel satisfied we are not far wrong when we estimate for your main line an additional outlay of three millions in 1874, and of near four millions in 1875.

As another evidence of the approximate accuracy of the above estimate, and of the truth of a former assertion as to the large proportionate increase of percentage of profit on every dollar invested, after a road reaches a certain status, which your road reached in 1864, we submit an interesting estimate to show further how much increase of traffic may be estimated before the limit of capacity is reached, the cost of the required improvements, and the profit that should be made—

1. There can be moved on the present main tracks of the Pennsylvania Railroad, between Pittsburg and New York, a traffic in passengers and freight seventy five per cent greater than that moved in 1873.

2. To move this increased traffic promptly and safely there will be required—

Forty miles of additional third track or middle sidings, costing $25,000 per mile	$1,000,000
Three hundred locomotives, at $13,000 each	3,900,000
Five thousand freight cars, at $650 each	3,250,000
Two hundred passenger, baggage and express cars, at $5,000 each	1,000,000
Increased siding room and other terminal facilities at Pittsburg, Altoona, Harrisburg, Philadelphia and New York—say thirty miles of sidings, at $25,000 each	750,000
Increased depot facilities and real estate at terminal points, say	3,000,000
Enlargement and extension of shops, engine houses, &c., to take care of the additional motive power and rolling stock, say	1,500,000
Total	$14,400,000

Let us examine and ascertain what these figures mean.

1. The main line, to be worked to its full present capacity, viz., seventy five per cent increase over business of 1873. By referring to the table, we find the traffic of 1873 to have been 1,384,831,970 tons moved one mile, or an average of 3,890,000 tons passing over the whole line from Pittsburg to Philadelphia, and 177,479,020 passengers carried one mile, or an average of 498 536 passengers carried over the same distance. Seventy five per cent increase on this would give an average through tonnage of 6,825,000 tons freight and of 872,438 passengers.

2. If the rates received for carrying freight and passengers and the cost of doing the work preserve the same proportion as in 1873, the net freight earnings would amount to		$13,547,375 52
And the net passenger earnings to		2,511,412 44
Total		$16,058,787 96
Add amount to receive from miscellaneous sources to be same as in 1873		269,253 47
And the total profit would be		$16,328,041 43
Total net earnings in 1873 were		9,445,703 74
Or an increase of profit of		$6,882,337 69
3. The capital invested in cost of main line and materials on hand January 1, 1874, was		$51,511,169 32
The additional capital required as above would be	$14,400,000	
And for additional material, say	4,600,000	
		19,000,000 00
Making capital and material cost		$70,511,169 32

That is, for an additional investment of capital of thirty-seven per cent there would be an increased profit of seventy three per cent; or, every million of dollars invested would pay a profit of $362,228. We have shown you that for each $1,000,000 invested between 1873 and 1874 there was a profit of $280,000. The increased profit we now show you is a logical result of the fullest use of your road, and making the largest possible amount of money out of it.

To compensate for a possibly too low estimate of capital required to do this increased business, we have, on the other hand, the lower cost per ton for moving freight and passengers, arising from the less *pro rata* expense in every department of the road, which should make a very large item.

But these figures also include the line to New York which, by the same character of calculation, would show an increased profit of | $1,294,163 91
Profit in 1873 | 1,725,551 88
Or a total profit of | $3,019,715 79

Adding this to profit on the line from Pittsburg to Philadelphia would make a total yearly profit on each $1,000,000 invested of $430,342.

If the same *pro rata* rate of increase of freight and passengers should continue in the future as in the past ten years, viz, twenty-three per cent, it would take but little over three years to reach the figures named, which would require an average of $6,333,333 per year; or, if it is reached in five years, an average of $3,800,000. So that our estimate of the future financial needs of the main line must be nearly correct.

After these figures are reached and the line is worked to its utmost capacity, very heavy expenditures must be made to prepare additional through tracks to carry the traffic, which will for a time reduce the *pro rata* profit made on additional investments.

☞ The project of building a new railroad from Philadelphia to this City by the way of the North Pennsylvania Railroad to Yardleyville, on the Delaware, thence to a junction with the Central of New Jersey to Jersey City, is said to be progressing favorably. According to a Philadelphia paper, the stock is all taken by strong parties, and the money in hand to pay all contracts,

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "†."

American Railroad Journal.

Saturday, October 10, 1874.

Stock Exchange and Money Market.

The week has been one of more or less disturbance in financial and commercial circles, growing out of failures and rumors of failures, which failures, chiefly in the mercantile line, were the result, in most instances, of the weakness and embarrassments caused by the panic of September 1873. The Money market has been more active, but the rates, as a rule, have not advanced beyond the low figures of 2@3 per cent on call to Street borrowers, in unexceptionable standing; and 5½@7 per cent per annum on the best grades of commercial paper. Apart from the excitement and fluctuations at the Stock Exchange, the general business situation has been, as a whole, encouraging. Produce and merchandise have been selling more freely, and values have been generally without further depression. The autumn trade thus far has been most prudently conducted, and with the unusually good crops, and the conservative course adopted as to mercantile credits, the commercial position cannot be regarded as otherwise than sound, and substantial, far beyond the usual condition of affairs, in these respects. The City banks, last week reduced their reserve of legal tender notes $1,734,800, and enlarged their deposit item $465,100, while cutting down their specie average $545,700. They report an increase of $1,737,600 in the loans and discounts, and a decrease of $206,200 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $57,321,575, against $57,691,022, the preceding week; and a coin hoard of $55,303,013, against $54,107,501, on the previous return. The City bank exchanges, during the week, were $516,055,766, or a daily average of $86,009,294. The customs revenue of the port, during the week, was $2,386,100. The City banks reported their average of gold last week at $18,374,200, and their greenback average at $63,966,100. Their deposits stood at $236,925,900. The loan item was $281,277,000. The circulation was $25,419,600.

The aggregate of the outstanding U. S. currency, of all denominations, Oct. 1, was $428,806,425. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is 350,436,158.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 28½ millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $15,221,792; special deposit of legal tenders for the redemption of certificates of deposit, $56,905,000; coin, $78,473,124, including $26,542,000 in coin certificates.

The Gold movement has been on a more confident basis as to price, though the dealings have not been extensive, even on speculative account. The customs call has been moderate, and export drain light. The extremes of the week have been 110@110⅜, closing on Wednesday at 110⅛, as against 110⅛ on Wednesday of the preceding week. The specie outflow last week was only $220,429. The imports of specie at this port since Jan. 1, have been $4,142,503, against $3,109,107 same time last year. The customs demand for Gold last week averaged $397,683 a day. Foreign Exchange has been more active, with Bankers' sixty day bills on London closing on Wednesday more firmly at $4 85@$4 85½; sight bills on London at @4 88@$4 88½ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $6,866,219.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,632,465.

Government Securities have been moderately active, and, on the whole, comparatively buoyant in price. The demand has been mostly on investment account.

U. S sixes of 1881 closed on Wednesday of this week at 118@118¼; U. S. Five-Twenties of 1862, 112⅝@112⅞; U. S. Five-Twenties of 1864 at 115⅜@115¾; U. S. Five-Twenties of 1865, 116½@116¾; U. S. Five-Twenties of 1865 consolidated, 116@116⅛; U. S. Five-Twenties of 1867, 117¼@117⅜; U. S. Five-Twenties of 1868, 117⅛@117⅜; U. S. Ten-forties at 111⅝@112; U. S. Fives of 1881, (Funding Loan) 112⅜@112½; Six per cent. currency Sixes from 117¼@117⅜.

There has been a less general inquiry for State

and Railway bonds, prices of which have been quoted irregular. Railway and miscellaneous share property has been quite active, opening buoyantly as to values, but closing lower and more or less unsettled. The very latest dealings, however, indicated a rather steadier range of prices.

General business has been fairly active in the line of domestic produce, with values, in most instances, quoted stronger. The export movement in Cotton, Breadstuffs, Provisions, Naval Stores, and Petroleum has been more animated. There has been a somewhat livlier trade noted in general merchandise. The Metal trade has been more active, especially in the line of Ingot Copper, No. 1 American Pig Iron, and Iron and Steel Rails, prices of which have shown more firmness. Recent sales of Rails included about 8,000 tons Iron Rails, and considerable amounts of Steel Rails, the latter for next year's deliveries. Eglinton Pig Iron quoted at $37; Glengarnock, $38 @$39; No. 1 American Pig at $29@$31, No. 2 do. at $27@$29; Forge, $24 50@$27; English Rails at $50, gold; American Rails at works, $55 @$60; Old Rails, $33@$36. Wrought Scrap, $32 @$34. Hardware, and Earthenware have been inactive and unsettled. Wool, in less demand. Tobacco, quite brisk. Ocean freights more active, closing steadier. The outward cotton movement has been much brisker.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Pacific R. R. of Mo., 36½; do. 1st mort., 80; Atlantic and Pacific R. R. pref., 12½; Marietta and Cin. 1st pref., 17½; Rensselaer and Saratoga R. ☞ The earnings of the Central Pacific Railroad in September, 1874, were $1,406,000, against $1,407,224 in September 1873, and $1,254,688 in September, 1872. For the nine months ending September 30, 1874, the earnings were $10,317,903, against $10,198,806 for the first nine months of 1873, and $9,807,444 for the first nine months of 1872.

☞ The sale of the Alabama and Chattanooga Railroad has been postponed till the first Monday in February next.

☞ The sale of the Worcester and Somerset (Md.) Railroad, which was to have taken place on the 6th inst., has been postponed,

McKean and Buffalo Railroad and Coal Co.

At a meeting of the stockholders of the McKean and Buffalo Coal Company, held at Buffalo on the 23d ult., the following persons were elected Directors of the McKean and Buffalo Railroad Company--capital stock, $400,000; Byron D. Hamlin, Smithport, Penn., President; John F. McPherson, Warren, Penn.; Delano R. Hamlin, Smithport, Penn.; John W. Gale, North-east, Penn.; George J. Magee, Watkins, N. Y.; J. C. Smith, and William H. Glenny, of Buffalo, N. Y., Directors. For the McKean and Buffalo Coal Company, capital stock, $1,000,000, the following directors were elected: George J. Magee, John Long, and Daniel Beach, of Watkins, N. Y.; D. C. Howell, of Bath, N. Y.; J. C. Smith, W. H. Glenny, G. R. Wilson, F. H. Root, B. C. Rumsey, of Buffalo, N. Y.; James Mc Farland, of Tonawanda, N. Y.; Byron D. Hamilton, of Smithport, Penn., and A. Pardee, of Hazleton, Penn.

Union Pacific Railroad.

The earnings of the Union Pacific Railroad for August, 1874, (including about $100,000 received from Central Pacific Railroad Co., for lease of five miles of road,) were $1,042,416 26, the expenses $377,852,83, and the net earnings $664,563 43. In August, 1873, the earnings were $837,277, 29, the expenses $400,947 26, and the net earnings $436,330 93—showing an increase in earnings of $205,138 97, with a decrease in expenses of $28,093 53, making an increase in net earnings of $228,282 50. For the eight months ending August 31, 1874, the earnings were $6,456,191 93, the expenses $3,170,036 44, and the net earnings $3,286,155 49—showing an increase in earnings, as compared with the corresponding period of the previous year, of $159,103 98, with a decrease in expenses of $21,077 77—making an increase in net earnings of $180,111 75.

Lake Ontario Railroad.

The Lake Ontario Shore Railroad Company, whose road was recently sold under foreclosure, has been replaced by a new organization called the Lake Ontario Railroad Company, with a capital fixed at $4,000,000. The directors are Moses Taylor, Samuel Sloan, Marcellus Massey, John T. Denny, C. Zabriskie, John S. Barnes, E. F. Hatfield, and John Bresben, of New York, and Theodore Irvin, George B. Sloan, Charles Rhodes and James K. Ford, of Oswego, and T. H. Camp of Watertown, N. Y. Marcellus Massey has been chosen president, and J. A. Sawyer secretary and treasurer.

The line of the road extends about 150 miles, from Oswego westward to the Niagara River. About 60 miles are already in operation. It is intended to build 25 miles more this fall, and to complete the road next year.

☞ The Paris and Terre Haute, the Paris and Decatur, and the Peoria, Atlantic and Decatur Railroads, have been consolidated into one road under the presidency of R. G. Henry, making a line of 180 miles between Terre Haute and Peoria, the last rail upon which will be laid within thirty days.

☞ J. F. Barnard, superintendent of the Kansas City, St. Joseph and Council Bluffs Railroad, has assumed the position of superintendent of the Atchison and Nebraska Railroad.

Redemption of 5-20 Bonds.

The Secretary of the Treasury has issued the twelfth call for the redemption of five-twenty bonds of 1862. Of the total amount of the call $9,000,000 are coupon, and $1,000,000 registered bonds, as follows—Coupon Bonds—Fifty dollars, No. 1,311 to No. 4,200, both inclusive; one hundred dollars, No. 1,907, to No. 6,200, inclusive; five hundred dollars, No. 1,787 to No. 5,000 inclusive; one thousand dollars, No. 4,371 to No. 14,900, inclusive. Registered Bonds—Fifty dollars, No. 1,801 to 1,820, both inclusive; one hundred dollars, No. 13,901 to No. 14,150, inclusive; five hundred dollars, No. 7,951 to 8,070, inclusive; one thousand dollars, No. 32,951 to No. 33,350 inclusive; five thousand dollars, No. 10,151 to No. 10,260, inclusive; ten thousand dollars, No. 12,501 to No. 13,200, inclusive. The redemption under this call will commence January 1, 1875.

Statement of the Public Debt of the United States October 1, 1874.

DEBT BEARING COIN INTEREST.

Interest paid by United States, $24,325,396 98; interest repaid by transportation of mails, &c., $5,469,978 35; balance of interest paid by United States, $18,855,418 63.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, September 30, 1874.

B. H. BRISTOW,
Secretary of the Treasury.

Ohio and Mississippi Railroad.

The earnings of this road for the year ending June 30, 1874, were $3,478,074 10, the expenses $2,546,880 78, and the net earnings $931,193 32. Compared with the previous year the gross earnings show a decrease of $317,097 32, and the net earnings a decrease of $243,464 23. The actual operating expenses, including taxes, were 67.75 per cent of gross earnings. There has been an increase of $79,461 79 in floating assets, and a decrease of $115,848 69 in current liabilities; together, $195,311 48 in favor of the stockholders. The funded debt has been reduced by the payment of $386,000 Western division bonds at maturity, January 1, 1874, and by payment of $164,000 on account of several sinking funds.

☞ The earnings of the Indianapolis, Cincinnati and Lafayette railway for the year ending July 1, 1874, were $1,859,474 87, and the expenses $1,228,333 39, leaving a profit over running expenses of $631,141 48.

☞ Mr. James C. Clarke, late General Manager of the Erie Railway, has been appointed General Superintendent of the Toledo, Peoria and Warsaw Railway in place of Mr. W. H. Gruger, resigned.

Baltimore Short Line Railroad.

The Cincinnati *Gazette* says that a railroad is being built from Athens, Ohio, on the Marietta and Cincinnati Railroad, to Scott's Landing on the Ohio river, opposite Parkersburg. This is called the Baltimore Short Line railroad, and its construction is promoted by the Baltimore and Ohio, and Marietta and Cincinnati railroads. It is only twenty-eight miles long, and it shortens the distance from Cincinnati to Parkersburg eight miles; but the shorter distance is by no means the most important advantage which will be gained by the new line. It is very nearly a straight line, its curves being inconsiderable, while it has only one considerable grade, and that is only fifty feet to the mile. There are only seven bridges on the whole line. It is built in first-class order, the bridges being of iron and masonry of the best quality. This road-bed is substantial, and first quality of rails will be used for the track. By this road the trestles, tunnels, steep grades, sharp curves, and expensive operations of the present line, from Athens to Marietta, will be avoided, and the time of passenger trains between Cincinnati and Pittsburg, and all Eastern cities, will be shortened one hour and twenty minutes. It is designed to have the trains run over this road by the 1st of November, when the winter time table will be made, and a fast train will be run between Cincinnati and Baltimore in twenty hours, and New York in twenty-seven hours.

Success of Narrow Gauge Railways.

The building of narrow gauge railways continues to receive much attention, and while there is latterly a falling off in the construction of roads of regular gauge, there has been an important increase in narrow gauge building. It is contended that the "three foot" road can be built at a much less cost and in a shorter space of time; also, that the equipment can be had at less cost. The Denver and Rio Grande railroad is said to have been saved from bankruptcy during the panic only on the account of the manner it could be utilized as a narrow gauge. Missouri capitalists are beginning to awaken to this fact. The line recently established to extend from Bismarck on the Northern Pacific railroad to St. Louis via Sioux City and Des Moines, is to be a narrow gauge; and it is estimated that $10,000 per mile can build and equip it. A short line has been recently constructed centering at Edgartown, Mass., the construction and operating expenses of which are said to be comparatively less than any other road in New England. The Baldwin Locomotive Works, the largest in the world, are authority for the statement that "up to July 17th last, the narrow gauge engines built and in progress in 1874 amounted to 26 per cent. of the whole. They add, that in the year 1873 the proportion was ten per cent., and that the panic has not affected it as much as the wide gauge." The orders for power show a steady increase of narrow gauge business, while the wide gauge has shown considerable decrease.

☞ A survey for a railroad from Cranston, on the line of the Hartford and Providence road, to a point in or near Danielsonville, on the Norwich and Worcester road, is to be started at once. It is the work of the Ponegansett Railroad Company.

Washington, Cincinnati and St. Louis R. R.

A letter to the Baltimore *Sun*, dated at Luray, Page Co., Va., September 29, 1874, says:

I have the pleasure to inform you that the County Court of Page county on Monday last made an order, upon the application of Hon. Peter B. Borst, the able and energetic president of the Washington, Cincinnati and St. Louis Railroad Company, (narrow gauge,) to submit to the voters of the county at the general election, on the 3d of November next, the proposition to vote the sum of $100,000 to the capital stock of said company, to be expended in the construction of their road through the county. It is now almost universally conceded that the project of constructing of the Shenandoah Valley railroad through this county is dead, and hence the anxiety expressed for the construction of the narrow-gauge road through our territory. It is what we want precisely, and the sentiment of all our leading farmers is strongly for it. Page is a rich agricultural county, and abounds in the richest iron ores. A large body of rich magnetic ore is one of the developments recently made.

Illinois Central Railroad.

The statement of this Company for the month of September, 1874, is as follows:

LAND DEPARTMENT.

Acres Construction Lands Sold	2,927.30 for	$20,686 51
Acres Interest Fund Lands Sold	122 75 for	982 00
Acres Free Lands Sold	40 00 for	1,000 00
Total sales during the m'th of Sept, 1874	3,090.05 for	$22,668 51
To which add Town Lot Sales	for	310 00
Total of all	3,090.05 for	$22,978 51
Cash collected in Sept. 1874		$38,724 94

ESTIMATED EARNINGS—TRAFFIC DEPARTMENT.

	In Illinois. 707 Miles.	In Iowa. 402 Miles.	Total. 1,109 Miles.
Freight	$378,564 00	$111,994 00	$490,558 00
Passengers	129,690 70	49,367 30	170 058 00
Mails	9,072 08	3,059 32	12,131 40
Other sources	87,927 92	2,430 68	90,358 60
Tot'l Sept. '74	$596,254 70	$166,851 30	$763,106 00
Total actual earn'gs, Sept., 1873	$663,668 74	$220,816 06	$884,484 80

☞ The earnings of the Columbus, Chicago and Indiana Central Railroad for the six months ending June 30, 1874, were $1,931,458 55, the expenses $1,491,640 37, and the net earnings $439,818 18. For the six months ending June 30, 1873, the earnings were $2,281,535 91, the expenses $2,000,615 12, and the net earnings $280,920 79—showing a decrease in earnings of $350,077 36, with a decrease in expenses of $508,974 75—making an increase in the net earnings of $158,897 39. The expenses were 77.23 per cent of earnings in 1874, and 87.69 per cent in 1873.

☞ The Warwick (R. I.) Railroad, having been graded, is now receiving the iron. Track laying has commenced, and will probably be completed this month.

IRON CUTTERS.

WE WILL SELL THE BEST IRON CUTTER in use for one quarter the price of any other machine which will do the same work. With it one man can cut rapidly and perfectly one inch round, square and flat Iron, and all smaller sizes. These prices will last only during the dull times. Send for full particulars.

MILLERS FALLS CO.,
78 Beekman St., New York.

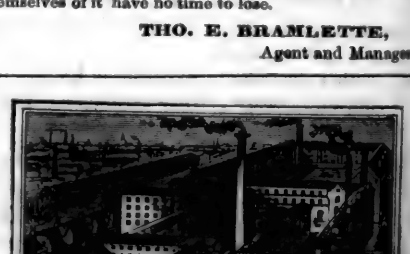
FIFTH AND LAST
GIFT CONCERT,
IN AID OF THE
PUBLIC LIBRARY OF KENTUCKY.

DRAWING CERTAIN ON
November 30th, 1874.

$2,500,000 IN GIFTS!

100,000 Tickets! 20,000 Gifts!

This is the last Concert of the series. Four have already been given and nearly **Two Millions and a Half** distributed among the ticket-holders. In the First Concert the principal gift of $35,000, was drawn by Jno. R. Durff, of Memphis, Tenn., now a resident of New Albany, Ind. In the second it amounted to $75,000, and went to a club at Columbus, Ind., gotten up by Mr. T. C. Burgess. In the Third Concert, the first Gift of $100,000 was drawn by Mr. L. H. Keith, of Kingston, Mass. In the Fourth Concert, Memphis was again the lucky holder of the ticket which drew the Capital Prize of $187,500, which was distributed among various clubs and individuals in that city.



In the Fifth and Last Concert, which comes off on 30th November next, the principal Gift will be $250,000, and it waits only the turning of the wheel of fortune to ascertain the fortunate possessors of the lucky numbers which will entitle the holders to such fortunes as $250,000, $100,000, $75,000, $50,000, $25,000, &c. Twenty thousand gifts, from $250,000 down to $50, will be distributed by lot among the ticket-holders.

Whole Tickets, $50; Halves, $25; Tenths, $5.

11 Whole Tickets, $500.

The time is fixed and near at hand. This is the *last chance for easy fortunes*, and those who want to avail themselves of it have no time to lose.

THO. E. BRAMLETTE,
Agent and Manager.

Manufactory of the Spencerian Pens, Birmingham, England.

SWAN QUILL Action!

SPENCERIAN

STEEL PENS.

These Pens are comprised in 15 numbers; of the NUMBER ONE PEN alone we sold more than

5,000,000
in 1873.

and the sale is continually increasing.

They are of superior English make, and are justly celebrated for their elasticity, durability, and evenness of point. *For sale by the trade generally.*

☞ *To accommodate those who may wish to try these Pens, we will send a Sample Card, containing all of the 15 numbers by mail on receipt of 25 cents.*

American Railroad Journal.

New York, Saturday, October 17, 1874.

Pequest and Wallkill Valley Railroad.

On Wednesday of last week the new Board of Directors of the Pequest and Wallkill Valley Railroad Company held a meeting in New York City and organized by the election of the following officers: Grinnell Burt, President; Sheldon T. Scranton, Vice-President; John W. Wyckoff, Secretary and Treasurer; Homer Ramsdell, of the Erie Railroad Company, S. T. Scranton, of the Oxford Iron Company, N. J., Joshua Hunt, Superintendent of the Crain Iron Company, Pa., and J. G. Shipman, Executive Committee. It is now some three or four years since this company was organized, and we have had frequent promises of a speedy construction of the road, but circumstances have tended to prevent it. Although the present state of the money market would indicate this as an unfavorable time to commence an undertaking of this description, we understand it is the intention of the Board to push it through at as early a period as possible, and when it is taken into consideration that the price of iron, labor and other necessary expenses are now at their lowest, it will be readily seen that the road can now be constructed at a lower rate than could have been done for the past ten years, and the importance of the undertaking is so evident that we have no doubt the monied men of the country will unite in making it a success. The high character of the officers above named is a sufficient guarantee of an energetic and successful completion of the work. Of the President, Mr. G. BURT, we need but say that he has developed a natural genius for railroad construction and management which will have a tendency to give confidence to the public mind in the successful pushing forward of the enterprise. We shall have more to say on this subject at an early day.—*Warwick Adv., Oct. 3.*

Portland and Rochester Railroad.

The annual meeting of the stockholders of this company was held in Portland on the 7th inst. The President, John Lynch, read the directors' report for the year ending August 31, 1874. The receipts were $158,388 76, and expenses $111,100,-66; material on hand, $8,331 50. The gross earnings of the road have increased $15,817 87, and the expenses, deducting the excess of material over the amount on hand Aug. 31, 1873, $3,104,-10, and $899 paid on account of old claims against the road, are $5,224 10. Number of miles run during the year, 139,799; passengers carried, 156,332; tons of freight, 66,065. Of the above number of passengers, 25,693 were carried in and out of Rochester.

The marginal way on Back Bay is completed sufficient for connection and use with the Grand Trunk. The road all along the route has been improved; ninety tons of new rails and twelve thousand two hundred oak and cedar ties have been laid.

Reference is made at length to the arrangement with the city by which the latter assumes temporarily the interest on the city loan of $350,000, and on all bonds issued by the city to meet said interest, and to pay when due said bonds for interest, which are at six years at six per cent., coupons. This arrangement with the city relieves the company from financial embarassments, caused by outlays in anticipation of the completion ere this of the Nashua and Rochester road, and will enable it to meet all future obligations as they mature.

The following Directors were unanimously chosen: John Lynch, H. J. Libby, J. S. Ricker, Rufus E. Wood, A. K. Shurtleff, George E. B. Jackson, G. P. Wescott and Charles McCarthy of Portland; Frederick Robie of Gorham; W. G. Ray, of New York; and E. G. Wallace of Rochester, N. H.

The agreement with the City of Portland as to assumption of interest and requirements as to repairs of rolling stock, payment of earnings and other 'contingencies, was accepted. Col. F. Robie called attention to the fact that by the agreement with the city the road agrees to furnish its own equipment, which will be done by the Rolling Stock Company, composed of the directors and others. About $31,000 had been expended by the company, and as much more is needed. The Nashua and Rochester road is almost finished, the contract requiring the connection to be made December 1.

Burlington, Cedar Rapids and Minnesota Railroad.

The earnings of this road for the year ending December 31, 1873, were $1,180,321 10, the expenses $622,105 77, and the net earnings $588,-215 33. For the year 1872 the earnings were $995,959 85, the expenses $461,171 46, and the net earnings $534,787 95—showing an increase in earnings of $184,361 75, in expenses of $160,-934 87, and in net earnings of $23,427 38. The company operate 424 miles of road, viz: Main line, Burlington to Austin (including 32 miles, from Plymouth to Austin, leased,) 261 miles; Milwaukee division, Cedar Rapids to Postville, 100 miles; Muscatine division, Muscatine to Riverside, 32 miles; Pacific division, Vinton to Tracy, 25 miles. During the year 1873, 9 miles of the Muscatine division, 5 of the Pacific division, and 52 of the Milwaukee division were completed. For the first five months of 1874 (January 1 to May 31) the earnings were $449,072 31, against $385,111 82 for the first five months of 1873, an increase of $63,960 99. The earnings for the year 1874 are estimated at $1,500,000.

Lake Shore and Tuscarawas Valley Railroad.

The earnings of this road for the year ending May 31, 1874, were: from passengers, $71,775 98; from freight, $249,159 72; from other sources, $8,011 66—total, $329,547 36. Operating expenses, $198,126 03. Net earnings $131,421 33. The road is about 100 miles in length, (including 8 miles of the Elyria and Black River Railroad) and extends from Black River to Urichsville, Ohio. The property is represented by capital stock and subscriptions, $2,023,957 50; first mortgage bonds, $2,000,000; Second Mortgage bonds,

$696,000; and Elyria and Black River Railroad bonds, $180,000—total, $4,899,957 50. The floating debt amounted, at the close of the fiscal year, to $267,891 32, besides $25,305 interest due and unpaid on bonds. The Elyra and Black River Railroad was purchased in October, 1872, and the bonded indebtedness assumed by this company. The capital stock, amounting to $200,000, was also to have been exchanged for the capital stock of the Lake Shore and Tuscarawas Valley Railroad company in full payment of the purchase.

Shelburne Falls and Rutland Railroad.

The Springfield (Mass.) *Union* says that Engineer E. C. Davis of Northampton has just completed the survey for the proposed new narrow gauge railroad from Shelburne Falls to Rutland, Vt. The route is found to be perfectly feasible, running up North river, through the middle of Colerains, to Halifax, Vt. There, striking the east branch of the Deerfield river, it follows it up through Halifax to Wilmington, a town now 25 miles from any railroad. Thence it runs nearly due north to Rutland, a distance of 86 miles. The towns along the line raised funds sufficient to pay the expense of the preliminary survey. One of the main results to be obtained by this road will be the opening up of a large and excellent timber tract. It will also furnish a new and competing line to tide water. The carrying out of this plan will almost of necessity insure the construction of the road from Williamsburg to Shelburne Falls, which has already been chartered.

Chicago and Northwestern Railway.

The earnings of this road for the years ending May 31, 1873 and 1874, were as follows:

	1872-'3.	1873-'4.
From passengers ..	$3,509,702 28	$3,426,824 35

Balance of Income Account, May 31, 1874.....		$2,119,346 26

Compared with the previous year, the gross earnings show an increase of $1,614,916 58, with an increase in expenses of $1,097,612 95, making an increase in the net earnings of $517,303 63. There was a decrease in gross earnings of $82,877 93 from passengers; an increase of $1,656,258 70 from freight, and an increase of $41,535 81 from other items. Number of passengers carried in 1873-'4, 2,823,889; do. in 1872-'3 2,479,202—increase, 344,687. Tons of freight carried in 1873-'4, 3,591,090; do. in 1872-'3, 2,958,390—increase, 632,700. Number of passengers carried one mile in 1873-'4, 109,134,533; do. in 1872-'3, 111,071,927—decrease, 1,937,394. Number of tons of freight carried one mile in 1873-'4 461,412,030; do. in 1872-'3, 366,475,480—increase, 94,936,550. Total number of passengers and tons of freight carried one mile in 1873-'4, 570,546,563; do. in 1872-'3, 477,547,407—increase, 92,999,156, or 19.47 per cent.

The earnings per passenger, in 1872-'3, averaged $1.41 each; and in 1873-'4, $1.21 each—being a decrease in the latter of 14.18 per cent. The earnings per ton of freight in 1872-'3, were $2.91, and in 1873-'4 $2.86—a decrease of 01.72 per cent. The average earnings, per passenger and per ton, were $2.23 in 1872-'3, and $2.14 in 1873-'4—a decrease of 04.04 per cent.

The average earnings per passenger, per mile, were 03.16 cents, and per ton of freight 02.35 cents, in 1872-'3, as against 03.14 cents, per passenger, and 02.22 cents per ton in 1873-'4—being a decrease of 00.63 per cent on passenger, and 05 53 per cent on freight earnings during the last year.

The average earnings per passenger and per ton, per mile, were 02.54 in 1872-'3, and 02.40 in 1873-'4—showing a decline of 05.51 per cent, in the latter year.

The freight movement for the year was as follows:

Increase in earnings....	19.23 per cent
" number of tons hauled.	21.39 "
" tons hauled one mile..	25.91 "

This comparison shows that the increase of a rnings was 06.68 per cent less than the increase of tons carried one mile, resulting from a decline in the average receipts per ton, per mile, of 05.53 per cent.

In the movement of passengers there was an increase of 13.90 per cent in the number of passengers carried, and a decrease of 02.36 per cent in the amount of earnings derived therefrom, as compared with the previous year, resulting from the fractional decline of 00.63 per cent in the average receipts per passenger, per mile.

The last year thus repeats the experience of former years, in showing a steady depreciation of the rates which the company receives for its services. The decrease in earnings from freight and passengers, arising from the reduction in the rates received per ton per mile, and per passenger per mile, is equal to the sum of $621,662 55 during the last year, and this large abatement has been suffered by the company without the ability to realize a corresponding decrease in wages, or other expenses of working the road. The President, in his report, says:

At the date of the last Annual Report, on the 31st of May, 1873, there were three unfinished lines of this company's railways in progress and nearly completed, viz: the Madison Extension, between Elroy and Sparta, Wisconsin; the Northwestern Union, between Milwaukee and Fond du Lac; and the Winona and St. Peter Extension, between the western border of the state of Minnesota and the Big Sioux river, in Dakota—that being the terminus described by the acts of Congress conferring the land grant.

The Madison Extension was opened for public business on the 14th of September, the Northwestern Union on the 7th of September, and the Winona and St. Peter on the 17th of September last—a brief interval before the occurrence of the great financial panic of last year.

The number of miles now embraced in the system of railroads owned and controlled by the Chicago and Northwestern Railway Company is 1,989.88, of which the Chicago and Northwestern proper—inclusive of 85 miles of Chicago and Milwaukee road, and 356 60 miles of leased roads in Iowa, and 87.90 miles of extensions to the iron mines on the Peninsula—has 1,498.70 miles; and the Proprietary roads 491.18 miles—as follows, viz: the Iowa Midland has 68.80 miles, the Northwestern Union, 62.63 miles, the La Crosse, Trempeleau and Prescott 29 miles, and the Winona and St. Peter Railroad and Mankato Branch, 330.75 miles.

Territorially, there are in the state of Illinois 489.00 miles; in Iowa 433.90 miles; in Wisconsin, 565.68 miles; in Michigan, 170.55 miles; in Minnesota, 292.25 miles; and in Dakota, 38.50 miles.

The miles of railroad completed and brought into operation during the year were 136.06, consisting of 34.93 miles on the Chicago and Northwestern; 38.50 on the Winona and St. Peter, and 62.63 on the Northwestern Union road.

The average length of road operated, during the entire year, was 1,952.05 miles; of which the Chicago and Northwestern operated 1,489.10, and the Proprietary roads, 462.95 miles.

The gross earnings of the combined system for the fiscal year ending on the 31st of May, 1874, were $15,631,936 61; and the total charges for operating expenses, taxes, rent of leased roads, interest on bonds, and sinking fund account, amounted to $14,276,855 26, leaving a combined net profit for the year of $1,355,081 35.

To the aggregate earnings of the year there were contributed by the

Chicago and Northwestern	$14,351,623 33
Iowa Midland	98,023 88
Northwestern Union	165,049 07
La Crosse, Trempeleau & Prescott	222,520 48
Winona and St. Peter, and Mankato branch	794,820 85
	$15,631,936 61

No dividends have been declared since June, 1873, when 3½ per cent was paid on the preferred stock. At that time it was anticipated that the outlays made by the company, for completion of the new lines then in progress, and for other works of construction, and new equipment, would be met by the sale of bonds in sufficient amount to represent the cost of these permanent improvements; but the financial troubles which began in September, and the unfriendly legislation since, in the States where our property is situated, prevented the company from realizing its expectations from the sale of bonds.

All the net earnings have been applied towards the payment of construction indebtedness, mostly incurred before the panic, and for such further expenditures as have since been found necessary to finish up and utilize the works then nearly completed.

CAPITAL STOCK.

The capital stock of the Chicago and North western Railway Company, at the close of the fiscal year, was $36,477,173 82, viz:

Common stock	$14,993 060 40
Preferred stock	21,484,113 42
Total	$36,477,173 82

being an increase of $40 in the amount of common stock, and $50 in the amount of preferred stock, which represents scrip issued in adjustment of dividends.

BONDS.

The following bonds have been retired and cancelled during the year, viz:

Preferred Sinking Fund Bonds, $2,800; Green Bay Extension $2,000; Funded Coupon, $6,700; Galena and Chicago Union, first mortgage, $82,000; Galena and Chicago Union, second mortgage, $84,000; Elgin and State Line, $1,500; Mississippi River Bridge Bonds, $10,000; Seven per cent Equipment Bonds, $86,000; Chicago and Milwaukee, first mortgage, $335,000; Milwaukee and Chicago, second mortgage, $84,500; and Milwaukee and Chicago, third mortgage, $9,500. Total, $704,000.

In conformity with the trust deeds which provide for consolidating the above debts, the following bonds have been issued therefor, viz:

Consolidated sinking fund, seven per cent, bonds of the Chicago and Northwestern Railway Company, maturing 1915	$275,000
Consolidated, seven per cent, bonds of the Chicago and Milwaukee Railway Company, maturing 1898	498,000
Total issued	$773,000

The excess of bonds thus issued and sold, over the amount retired and cancelled, is $69,000 of Chicago and Milwaukee consolidated bonds, which issue is protected by the company's deposit of $69,000 in cash, with the trustee, to remain in his hands until a like amount of the bonds which mature in 1874 shall come in for redemption.*

The company has sold for the purpose of construction account, new equipment, and for steel rails, purchased during the last year, the amount of $4,461,000 of its General Consolidated Gold Bonds, making a total of $8,996,000 of the bonds of this issue outstanding on the 31st of May last.

The bonded debt of the company at the close of the fiscal year was $29,538,500, consisting of $14,693,500 of bonds, bearing currency interest, and $14,845,000 of gold bonds.

The bonded debt of the proprietary roads at the same time was $14,625,000, consisting of $6,750,000 of bonds, bearing interest in currency, (less $505 000 unsold), and $7,875 000 of gold bonds.

Aggregate of bonded debt outstanding, $43,658,500.

* Bonds since redeemed and deposit taken up.

CONSTRUCTION AND EQUIPMENT.

The expenditures made during the year for and on account of the Chicago and North Western Railway Company and its proprietary roads, for completing the lines that were in progress, for new shops, new general offices in Chicago, extra cost of steel rails over iron, new side tracks, tracks to the iron mines, and other important improvements, and for 41 new locomotives and 183 new cars, of various kinds, amounted to the sum of $4,935,668 81. Of this amount there was expended for account of the Chicago and North Western Railway Company on construction account $3,191,829 86; on equipment account $679,060 53; and for the proprietary roads $1,065,278 92.

Among the important improvements, completed during the past year may be mentioned the general office building in Chicago, a substantial and convenient brick building, 64 by 200 feet, with three stories and basement, containing large fire proof vaults, for the protection of books, papers, and other valuable property, erected on the company's grounds, on Kinzie and Market streets, Chicago, for the accommodation of the general offices and business departments of the company.

The building was finished in season to be occupied on the 1st of last December, at a cost of $122,172 02.

New machine and repair shops were completed at West Chicago, consisting of one shop, 120 feet wide by 550 feet long, with transfer table for repairs of locomotives and machinery.

A blacksmith shop, 80 by 400 feet.

An engine house, containing stalls for 10 locomotives, with a turn table and necessary fixtures, and with side tracks to accommodate the working of the shops.

Two water tanks, each 30 feet in diameter and 16 feet deep, to supply the stationary and locomotive boilers.

A coal shed, 24 by 160 feet, with chutes for delivering coal to the engines. An artesian well 1,800 feet deep. Also, the stone foundations for four additional buildings for car shops, each 80 by 300 feet.

The shops are of brick and stone, with iron truss roofs, and have been furnished with a new stationary engine and boiler, and much new machinery for the construction and repairs of engines and cars. Economy of operations is anticipated from this consolidation of the principal shops of the company.

At Winona, a new machine shop has been completed and put into operation, to facilitate the repairs of equipment on the Winona and St. Peter, the La Crosse, Trempeleau and Prescott, and the Madison Extension lines.

At Chicago, a viaduct has been constructed by the city, to carry Canal street over the tracks of this company and of the C. B. and Q. R. R. Co., near 16th street, and the share of expense which was required to be paid by this company amounted to $23,370 16.

One wooden span, 200 feet long, of the bridge across the Mississippi River, at Clinton, has been replaced with a substantial iron structure, and the timber protection for the drawbridge mostly renewed.

A large number of pile bridges on the Iowa Division have been rebuilt, and many water stations and other structures repaired, and five new coal houses erected at the stations.

On the Peninsula Division, the sum of $123,068 94 was expended in completing tracks and branches extending to the iron mines; and the sum of $8,292 60 was expended on repairs of ore dock, at Escanaba.

On the Milwaukee Division, the work was begun of filling up and renewing the long tressle bridge at Racine, and lands for filling, and a steam excavator have been obtained for this purpose.

An arch culvert of 24 feet span, and an embankment across the valley at Kenosha, are being put in to replace the piling and tressle work at that point.

In the general disbursements for construction, a considerable expenditure has necessarily been incurred on the new roads since their opening in September, in preparing tracks, ditches, cuts and embankments for the winter; and in providing adequate side tracks, water stations, etc., for the convenience of operating. Some further outlays of moderate amount will be required from time to time for the same general purposes.

To set at rest all questions in regard to the construction of new roads, it may be remarked that all works of this kind which were in progress at the beginning of the fiscal year were completed during the year, and no new roads are now building, nor are any contemplated.

The expenditures made for this class of construction during the year were necessary to complete the new lines and extensions which had been authorized and entered upon in former years, and upon which a large outlay had already been made.

The capital expended on the new lines has been faithfully applied to their construction under the immediate supervision of the principal officers and chief engineer of the company, and all materials have been purchased and the works prosecuted to completion without the intervention, in any manner, of "construction companies," or other intermediary instrumentalities.

REPAIRS AND RENEWALS.

In addition to the purchase of the ten thousand tons of steel rails, which were mentioned in the last Annual Report, the company ordered the further quantity of ten thousand tons during the last winter and spring, and have relaid 168 miles of the main lines with steel track during the year. Nine hundred tons were laid down on the Peninsula division, and the residue on the Chicago and Milwaukee line, on the Wisconsin division from Chicago northerly, and on the Dixon air line between Turner Junction and Fulton.

In the changes from iron to steel, the track has been mostly laid with new ties, and thoroughly ballasted, dressed up, and improved, thus increasing the ordinary cost of track repairs.

The difference between the cost of steel and iron rails has been charged to reconstruction of track in steel.

The total length of steel rail track laid down and in use, on the 31st of May last, was 206.60 miles.

For extensive improvements made to the track during the past year the large sum of $2,265,418 31 was expended and charged to track repairs. This expenditure, which constituted about twenty-five per cent. of the entire cost of operating, and exceeded by $648,449 75, or more than forty per cent., the same class of expenditure for the previous year, has materially improved the value of the property, and will greatly add to the comfort, security, and economy of operations in the future.

Included in this outlay for track repairs is the renewal-cost (at the price of iron rails) of $168\frac{575}{5280}$ miles of new steel rails, and $2\frac{453}{5280}$ miles of new iron rails, together amounting to $1,135,994 28; also $15.901\frac{534}{2240}$ tons re rolled iron rails, equal to $168\frac{2428}{5280}$ miles of track, costing $510,058 86; also 22,700 iron rails repaired and re-rolled at the Company's shops—equal to $45\frac{3008}{5280}$ miles, at a cost of $24,645 62. The length of track so renewed is more than double that renewed in either the two previous years, and measures $384\frac{2856}{5280}$ miles, or over 25 per cent of the entire length of the Company's road. The large number of 550,587 new track, switch and bridge ties, costing 38.61 cents each, or an average cost in the track of 58.54 cents each, amounting to $321,773 71, were used, and are equal to 196.64 miles of road laid with new ties.

The sum of $83,295 97 was expended in raising track to grade and for ballasting, and $26,874 92 for deepening and widening ditches.

The equipment of the Chicago and Northwestern Railway on the 31st of May, 1874, consisted of 342 locomotives, and 8,106 cars, viz: 141 first class and 26 second class passenger cars, 65 baggage and express cars, 15 mail cars, 140 caboose and way cars, 4 paymasters', directors', officers', and business cars, 18 boarding cars, 4,293 box freight, 1,025 platform, 384 stock, 26 dump, 1,957 iron ore, and 11 pile driving, wrecking, etc., cars. And of the Winona and St. Peter Railroad, 27 locomotives, and 1,087 cars, as follows: 7 first class passenger, 2 baggage mail and express, 2 caboose, 893 box freight, and 183 platform cars. Total number of engines, 369; total number of cars, 9,143.

Thorough repairs have been made to the rolling stock, and its condition for effective service has been fully maintained. Eleven engines have been rebuilt and improved, and 13 more rebuilt, repaired and changed from wood to coal burners; 7 first class cars, 2 second class cars, 1 baggage car, and 68 freight cars of all sorts, were rebuilt in the shops. Other renewals and repairs of engines and cars have been made as required.

The total number of miles run by engines in 1873 '4, for passenger service was 2,119,760, freight 4,587,373, wood 102,112, gravel 354,722, switching 1,980,313—total, 9,144,280, being an increase of 1,591,194 miles, or 21 per cent over the service of the preceding year.

The quantity of fuel consumed was 95,734 cords of wood, and 223,975 tons of coal, costing $1,156,616 53, being 11.8 per cent greater than in the preceding year, owing to the increased mileage. The cost of fuel per mile run was 11.57 cents, against 11.69 cents in the previous year. The distance run for cord of wood and ton of coal was 30.79 miles. The average cost per cord of wood was $4.19, and per ton of coal $3.87.

GENERAL BALANCE SHEET, May 31, 1874.

Old construction:		
Cost of property (in consolidation)		$39,979,262 62
New construction:		
Balance expended to May 31, 1873	$14,832,609 35	
Expended for year ending May 31, 1874	3,191,329 36	
		18,023,938 71
New equipment:		
Balance expended to May 31, 1873	$7,274,226 63	
Expended for year endi'g May 31, 1874	679,060 53	
		7,953,287 16
Proprietary Railroads:		
Balance of advances for construction & operating	$4,366,528 87	
Less amount allotted to income account	1,422,374 56	
		2,944,154 31
General assets	$451,674 78	
Less balance account sinking funds	91,720 00	
		359,954 78
Materials on hand		2,268,244 45
		$71,528,842 03
Capital stock:		
Common stock		$14,993,060 40

President.—ALBERT KEEP.

Vice Pres't, Sec. & Treas.—M. L. SYKES, Jr.

Directors.—Albert Keep, John F. Tracy, Henry H. Porter, Wm. H. Perry, Chicago; B. F. Allen, Des Moines, Iowa; Wm. L. Scott, Milton Courtright, Erie; A. G. Dulman, Geo. S. Scott, M. L. Sykes, Jr., Charles R. Marvin, Harvey Kennedy, A. B. Baylis, David Dows, R. P. Flower, Francis H. Tows, New York; J. L. Ten Have Fzn, Amsterdam, Holland.

Assis't Secretary & Treasurer.—S. O. HOWE.

General Manager.—HENRY H. PORTER.

Gen'l Superintendent.—MARVIN HUGHITT.

Pennsylvania Railroad.

We gave in our last and preceding issues the Report of the Investigating Committee on the Eastern Group of Railroads and Canals controlled by this company. The following, from the same Report, refers to the Western Group of Railroads controlled by the company.

To facilitate and systematize this inquiry, we divide the railways into the Western and Eastern Groups. The Western Group, embracing the railways west of Pittsburg, we again divide into the Fort Wayne or Northern system, and the Pittsburg, Cincinnati and St. Louis or Southern system. The Eastern Group embraces the railways east of Pittsburg and Erie, and is called the Eastern or Pennsylvania system, in contra-distinction to the Western system, and for convenience we include in this system the interests held south of Baltimore and Cairo.

The early policy of your company was, and still is, to encourage the building of branches along its main line, and to make such business connections with other roads within the Commonwealth as would attract the trade of the State over your line to the city of Philapelphia. In carrying out this policy, such lines as the Western Pennsylvania, Bald Eagle Valley, Clearfield, Southern Pennsylvania, and Blair County Railways were aided, and interests taken in them to develop the local trade of your road.

It was also found to be necessary to acquire interests, first, in the Northern Central Railway, to keep the port of Baltimore open to trade and travel between that city and the West over your line; and, second, the Cumberland Valley Railroad, to turn the products of that rich valley to Philadelphia over your road, and, third, the Philadelphia and Erie Railroad. By leasing it much of the trade of the country dependent on that line is secured to the city of Philadelphia.

For some years you kept aloof from investments in Western railroads, trusting to business alliances, mutual benefits, and advantages offered to Western roads, and the absolute strength of your main line to secure a fair proportion of the Western trade and travel. True to this wise policy, no interest had been taken in the West except in the Pittsburg, Fort Wayne and Chicago Railway, which was mainly done to secure its completion to Chicago, and which being accomplished at a favorable moment of high prices for the stock, your interest in that road was sold out at a large profit.

But subsequently the Pittsburg, Fort Wayne and Chicago Railway Company considered their road long enough, as a base line, to have an independent eastern connection, and your company were forced to prepare another outlet to the west, which resulted in commencing the exceedingly expensive piece of railway from Pittsburg to Steubenville, to make a connection via the Steubenville and Newark line and the Little Miami Railroad to Cincinnati, and by other lines to St. Louis. A little later new interests, decidedly averse to yours, seemed likely to get control of the Pittsburg, Fort Wayne and Chicago line, and your Directors felt themselves obliged to acquire control of the Columbus, Chicago and Indiana Central line to Chicago after the acquisition of which by you, the stockholders of the Pittsburg, Fort Wayne and Chicago line quickly recognized their true interest in leasing their lines to your company, which was a responsible one, rather than to another of more questionable ability.

It is easy, now, to see the error of disposing of your interest in the Pittsburg, Fort Wayne and Chicago Railway, instead of taking control of it, when it could have been obtained at a less cost. This line held the strategic position. With it the Pennsylvania Railroad Company could have largely influenced and controlled the trade and travel of the country south of it, your only competitor being the Baltimore and Ohio Railroad.

Your company being so far committed in the West, it was but natural—affected as the whole country was with the fever of railroad building, and constantly provoked by the efforts of the

other trunk lines to interfere with the country which your company thought belonged to them geographically—that they should partake of the same spirit, and, with grand ideas, form a plan or policy to reach all important points in the West with their lines; and this they have done; then followed the lease of the Little Miami Railroad and its branches, the Muskingum Valley Railroad, the building of the Vandalia road to St. Louis, the Indianapolis and Vincennes road, the three grand bridges over the Ohio river at Steubenville, Cincinnati, and Louisville, the control of the Jeffersonville, Madison and Indianapolis, the Cleveland, Mount Vernon and Delaware road, and many other branches, which give your company a giant hold on the West. Commencing on Lake Erie, you reach with your lines the ports of Erie, Cleveland, Ashtabula, Toledo; and going North, the timber of Michigan; the cities of Cincinnati, Chicago, and St. Louis each with two lines; Cairo (by aid of Vincennes and Cairo Railroad;) New Albany, Jeffersonville, Madison and Louisville, on the Ohio; while these lines encircle the country directly tributary to them, they also have their feelers pointing to a greater circle outside, and drawing trade and travel to the main lines.

You will agree with us that the conception was grand, attractive, and likely, in times of great speculation, to captivate the most prudent. This grand conception appealed both to sentiment and interest with most irresistible power, and it is not marvellous that every effort was made to put it into practical effect.

Having thus briefly sketched the circumstances that give rise to the policy of your company in the West, we will now consider the methods of management of your interests in the railways west of Pittsburg.

1. WESTERN GROUP.

These roads are managed through the organization known as The Pennsylvania Company, the control of the management of which is secured by a majority of the stock being held by you, or by that company in your interest, and also by leasing from other companies lines which you control.

The Pennsylvania Company was originated and organized by your company as a medium through which to make the best working organization for the Northern Group of lines west of Pittsburg. By centralizing the management, it was thought those roads could be more effectively managed, and their interests more readily harmonized. Whether this was the best policy we shall not now consider, for the Pennsylvania Company is so intimately connected with those lines as manager of some and lessee of others, and as owner of real estate and rolling stocks, &c., that its existence had better be continued. It would have been well if it could have been arranged for that company to have sufficient capital to manage its own finances, independently of the aid of the Pennsylvania Railroad Company.

The capital of the Pennsylvania Company is $11,360,900, of which $8,000,000 is held as a preferred stock by the Pennsylvania Railroad Company, in exchange for securities and leases conveyed to it by the Pennsylvania Railroad Company.

This stock is entitled to a dividend of six per cent per annum, and to a proportionate increase as profits may be divided over that rate. Its practical organization dates from April 1, 1872.

The Pennsylvania company, in 1873, purchased the property of the Union (Star) Line for $3,000,000, payable in their own stock. In addition to the stock there is the amount of $360,900 held by different persons.

This introduction of new stockholders suggests an important question. If the object of your company in organizing the Pennsylvania Company was simply to have a better means of managing some of your western interests, and these interests are to be managed solely or primarily in the interest of your company, is it judicious to introduce other stockholders whose interest may at times clash or interfere with yours?

It is not difficult to see that these interferences of interest may frequently occur, and so largely as to create great trouble. In fact, the Pennsylvania Company cannot be well managed for the purposes for which it was organized without ignoring the interests of its other stockholders.

Again, having other stockholders in the company affects the free working of the Pennsylvania Company. The policy of your company may change, and it may be desirable to close the Pennsylvania Company, and we therefore suggest that your Board of Directors be recommended to re-examine the subject and see if an arrangement cannot be made by which your company shall become the sole owners of the stock of the Pennsylvania Company.

FORT WAYNE OR NORTHERN SYSTEM.

The lines managed by the Pennsylvania Company are as follows:

1. The Pittsburg, Fort Wayne and Chicago Railway, extending from Pittsburg to Chicago	468 3
And under this company, the New Castle and Beaver Valley Railroad	14 9
The Lawrence Railroad	20.4
NOTE.—The Pittsburg, Fort Wayne and Chicago Railway was leased by the Pennsylvania Railroad Company and the lease transferred to the Pennsylvania Company.	
2. The Erie and Pittsburg Railroad, extending from a point on New Castle and Beaver Valley Railroad to Girard, on the Lake Shore Railroad	84
Branch at Erie	2
	86.0
NOTE.—This line leased by Pennsylvania Railroad Company and transferred to Pennsylvania Company.	
3. The Cleveland and Pittsburg Railroad. This line extends from Rochester, in Pennsylvania, by way of Millville, Ohio, to Bridgeport and Cleveland, with other branches	202.0
NOTE.—This line leased by Pennsylvania Railroad Company and transferred to Pennsylvania Company.	
4. Ashtabula, Youngstown and Pittsburg Railroad, from Youngstown to Ashtabula.	62.5
NOTE.—This line is worked at cost by Pennsylvania Company, but there is no responsibility or guaranty of dividend.	
5. Mansfield, Coldwater and Lake Michigan Railroad is to extend from Mansfield Junction, on the Pittsburg, Fort Wayne and Chicago Railway to Allegan, Michigan, two hundred and sixteen miles. The track is laid from Junction, seven miles west of Mansfield, to a point twenty-seven and three-quarter miles west of Tiffin	65.8
Track is laid from Allegan to Grand Rapids and Indiana Railroad	19.7
Total track laid on Mansfield, Coldwater and Lake Michigan Railroad	85.5
NOTE.—This line is worked by Pennsylvania Company at cost.	
6. Tiffin, Toledo and Eastern Railroad	24
Woodville and Toledo Railroad, leased by Tiffin, Toledo and Eastern Railroad	18
	42.0
	981.6

NOTE—Operated by Pennsylvania Company for account of Tiffin, Toledo and Eastern Railroad Company, at cost.

These roads, embracing 981.6 miles, are more properly the system of the Pennsylvania Company's lines; but with the lease of the Pittsburg, Fort Wayne and Chicago Railway there was also conveyed a contract with the Indianapolis and St. Louis Railroad, by which the Pennsylvania Railroad Company acquired one-half interest in this line, being the northern line between those cities, and therefore the accounts of this line come into the workings of the Pennsylvania Company. The result in 1873 was a loss of $8,078 16, being one-half the total loss, the balance being paid by the Cleveland, Columbus, Cincinnati and Indianapolis Railway Company.

	Miles.
7. The Indianapolis and St. Louis Railroad, Indianapolis to Terre Haute	72
Terre Haute to St. Louis	189
Branch to Alton	4
	265
NOTE.—This interest was transferred to the Pennsylvania Company with the lease of the Pittsburg, Fort Wayne and Chicago Railway.	
8. The Pennsylvania Company leases the Jeffersonville, Madison and Indianapolis Railroad, with the guarantees of the Pennsylvania Railroad Co. This line extends from Indianapolis to Louisville	110
Madison to Columbus	45
Columbus to Cambridge	65
	220.0
9. The Indianapolis and Vincennes Railroad, extending between these points	117.0
NOTE.—Controlled by Pennsylvania Company, by majority of stock, and by paying interest on funded debt.	
	582.0
Making, with the northern system of	981.6
Miles of railway operated by the Pennsylvania Co	1,568.6

The amount of stock and bonds issued on these roads, and their floating and other indebtedness,* are—

Stock to amount of	$44,020,140 35
Bonds to amount of	41 005,000 00
Floating and other indebtedness	2,572,196 22
Amounting in all to	$87,597,336 57

With a cost per mile of road of $51,316 54.

We now add a table of the workings of these lines for 1873, showing the earnings, expenses, rental, profit and loss.

Summary of Results of Pennsylvania Co.'s Lines in 1873.

Roads.	Rental.	Profit.	Loss.
Pittsburg, Ft. Wayne and Chicago Railway	$2,617,177 24	$904,855 13	
New Castle and Beaver Valley Railroad	140,435 79	52,078 94	
Lawrence Railroad	75,962 96	258 87	
Erie and Pittsburg Railroad	380,626 00	108,772 74	
Mansfield, Coldwater and Lake Michigan Railr'd		2,269 63	
Toledo, Tiffin and Eastern Railroad			
Ashtabula, Youngstown and Pittsburg Railroad		7,281 22	
Cleveland and Pittsburg Railroad	1,226,884 47	534,078 02	
Jeffersonville, Madison & Indianapolis Railroad	582,651 70		$8,592 80
Indianapolis and Vincennes Railroad	206,000 00		148,862 99
	$5,179,478 16	$1,604,594 05	$286,491 51
Net profit on the system		$1,368,102 54	
Less one half of loss on the Indianapolis and St. Louis road		8,078 16	
Amount of profit		$1,360,024 38	

* With the Cleveland, Mt. Vernon and Delaware Railroad, which has stock, $1,562,791 92; bonds, $2,300,000; debt, $362,643 08; total, $4,225,435. Length of road, 144 miles.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "¶."

American Railroad Journal.

Saturday, October 17, 1874.

Stock Exchange and Money Market.

Less uneasiness has been felt in financial and mercantile circles during the week, though one or two additional failures have been reported in the commercial line. The business situation has been rather more satisfactory, particularly as regards produce and merchandise, in which there has been a fair degree of activity, though with considerable irregularity as to values. The Stock market has been variable, and generally bearish in its temper. Gold has been weaker, and in less request. Money has been comparatively easy to the more prominent of the Stock Exchange firms on the basis of 2½@3 per cent on call. In the discount line, there has been a more urgent inquiry for accomodation, with the best grades of business paper rated at 6@8 per cent per annum. The City banks, last week reduced their reserve of legal tender notes $1,571,900, and their deposit item $3,454,700, while cutting down their specie average $1,427,500. They report an increase of $100,800 in the loans and discounts, and a decrease of $808,800 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $57,135,573, against $57,355,761, the preceding week; and a coin hoard of $56,544,087, against $55,729,832, on the previous return. The City bank exchanges, during the week, were $481,795,616, or a daily average of $80,299,269. The customs revenue of the port, during the week, was $2,381,100. The City banks reported their average of gold last week at $16,946,700, and their greenback average at $62,894,200. Their deposits stood at $233,471,200. The loan item was $281,377,800. The circulation was $25,115,800.

The aggregate of the outstanding U. S. currency, of all denominations, Oct. 1, was $428,806,425. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is 350,436,158.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 31 millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $14,751,998; special deposit of legal tenders for the redemption of certificates of deposit, $57,705,000; coin, $79,179,951, including $24,995,400 in coin certificates.

Gold has been less sought after, even on speculative account, and has been quoted easier in price The export movement has been unusually light, and the custom drain moderate, for the season. The extremes of the week have been 109¾@110⅜, closing on Wednesday at 110, as against 110⅛ on Wednesday of the preceding week. The specie outflow last week was only $206,768. The imports of specie at this port since Jan. 1, have been $4,416,455, against $8,067,887 same time last year. The customs demand for Gold last week averaged $396,883 a day. Foreign Exchange has been in less demand with Bankers' sixty day bills on London closing on Wednesday weak at $4 83½@$4 84⅛; sight bills on London at @4 86@$4 87⅛ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,240,286.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,479,189.

Government Securities have held their own well as to values, on quite moderate offerings, and a fair investment demand.

U. S sixes of 1881 closed on Wednesday of this week at 118@118¼; U. S. Five-Twenties of 1862, 112¾@113; U. S. Five-Twenties of 1864 at 115⅜@115¾; U. S. Five-Twenties of 1865, 116½@116¾; U. S. Five-Twenties of 1865 consolidated, 115⅞@116⅛; U. S. Five-Twenties of 1867, 117¼@117⅜; U. S. Five-Twenties of 1868, 117⅛@117⅜; U. S. Ten-forties at 111⅝@112; U. S. Fives of 1881,(Funding Loan) 112¼@112½; Six per cent. currency Sixes from 117¼@117⅜.

A restricted business has been reported in State and Railway bonds, prices of which have been depressed. Railway and miscellaneous share property has been freely dealt in, but quite generally at lower, and irregular prices.

General business has been comparatively brisk in the leading kinds of domestic produce, especially in Cotton, Breadstuffs, Tobacco, and Naval

Stores, with, however, some irregularity in values of Flour, and Grain. Wool, Hides, Petroleum, Hemp, and Provisions have been less sought after. Metals have been in less request. Eglinton Pig Iron quoted at $37; Glengarnock, $38 @$39; No. 1 American Pig at $29@$31, No. 2 do. at $27@$29; Forge, $24 50@$27; English Rails at $50, gold; American Rails at works, $55 @$60; Old Rails, $31@$34. Wrought Scrap, $29 @$32. In most kinds of imported merchandise, there has been a restricted movement noted. Freights have been rather brisker, and at the close, steadier.

The following quotations of sales of Railway and other securities are in addition to those giver elsewhere in our columns:—

New York.—Rensselaer and Saratoga R. R., 109; Pacific R. R. of Mo., 36¼; do. 1st mort., 80; Albany and Susquehanna R. ☞ The St. John, N. B., *Courier* says that meetings have recently been held in St. George and Pennfield to vote money for a survey of the Grand Southern Railway. It is estimated that the survey can be made for $3000, which sum St. George has voted almost unanimously. Pennfield agrees to pay $800 of this amount, and it is expected that Lepreaux will contribute something also. The survey is to be made at the instance of the Western Construction Company, which offers to build the road and equip it for the Provincial Subsidy of $5,000 per mile. They propose beginning the construction of the road next spring and finishing it within a year.

☞ At the recent annual meeting at Manchester, N. H., of the stockholders of the Concord and Portsmouth Railroad Company, Stephen Kendrick of Franklin, S. N. Bell, B. S. Marston and Nathan Parker of Manchester, S. P. Dow, of Epping, Joseph B. Walker of Concord and J. J. Pickering of Portsmouth were chosen Directors. Stephen Kendrick of Portsmouth was chosen President and William H. Hackett of Portsmouth Clerk.

☞ The track of the Rochester, Nunda and Pennsylvania Railroad has been laid to a connection with the Dansville and Mount Morris Branch of the Erie, near Mount Morris, N. Y., three miles north of the late terminus at Tuscarora, and twenty miles from the southern track in Nunda. Work has been begun on the southern end of the line.

☞ The rails on the Nashua and Rochester Railroad, in New Hampshire, have been put down to within five miles of the bridge of Nashua, and the work is going briskly forward at the rate of half a mile per day, so that the iron will all be down in less than a fortnight. The eastern pier of the bridge is completed, and work on the rest will be pushed forward rapidly.

North Side and Central and Southern Railroads.

The Southern Railroad of Long Island, until recently known as the South Side Railroad, with all its effects and appurtenances, is now the property of the Messrs. Poppenhuzen and those they represent, the same having been purchased by them at the second or assignee's sale, which took place on the 6th inst. The consolidated property now owned by the company will be known as the North Side and Central and Southern Railroads, and Mr. Isaac D. Barton, well known as a former Superintendent of the Long Island Railroad, is to be the General Superintendent of the three. Mr. John J. Barr, an accomplished railroad man, with years of experience on the Erie and Harlem roads, has been appointed Assistant Superintendent on the Southern Road, and other changes have been made among the principal officers. A new schedule of trains for the Winter will go into effect in a few days, and it is expected that the accommodations under the new management will be of a superior order.

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending October 3, at 462,914 tons, and for the coal year 13,912,413 tons, against 15,133,442 tons to corresponding time last year, being a decrease of 1,220,129 tons. The bituminous tonnage for the week is 75,285 tons, and for the year 2,521,364 tons, against 2,452,465 tons to same time last year, giving a total of all kinds for the week of 538,199 tons, and for the year of 16,434,777 tons, against 17,585,807 tons to same time last year, being a decrease of 1,151,130 tons.

☞ At the annual meeting of the stock and bondholders of the Ohio and Mississippi Railway company held in Cincinnati on the 8th inst., Sir Alex. T. Galt, of Montreal, and John D. Prince, of New York, were elected in place of W. N. Aspinwall and Lars Anderson, who declined re-election. W. T. McClintock was re-elected Director, and Daniel Torrence was re-elected President. Daniel Torrence, Fred Schuchardt, John King jr., Sir Alex. T. Gault, and John D. Prince were constituted the Executive Finance committee.

☞ In answer to a request from the counsel of the Erie company, as to whether it was intended to apply for a receiver, Attorney General Pratt says :—

I do not expect any such exigency will arise, but it was thought that the same (formal prayer for a receiver) would not do any harm.

The correspondence is dated on the part of the counsel for Erie, New York, October 6, and on the part of Hon. Daniel Pratt, Syracuse, October 12.

☞ The straightening of the Boston and Albany Railroad in the towns of Needham and Weston, under the recent act of the Legislature, has been completed, so far as relates to the north track. The south track will be immediately laid from the steel rails of the vacated north track of the old road.

☞ The earnings of the Denver and Rio Grande Railway for the month of August, 1874, were $35,188 19 gross, against $36,743 81 for August last year. The decrease in gross earnings is $1,555 62, and in net earnings $3,207 35.

Valley (Va.) Railroad.

At a meeting of the stockholders of this company, held at Staunton, Va., on the 7th inst., the following gentlemen were elected directors for the ensuing year : Robert Garrett, R. T. Baldwin, Richard Norris, and D. H. Miller, Baltimore city ; Baltimore and Ohio Railroad Company, Galloway Cheston, Wm. Keyser, and R. R. Pendleton ; M. G. Harman, Staunton ; W. Allen and C. A. Davidson, Rockbridge county ; Edmund Pendleton, Botetourt ; G. W. Hansbrough, Roanoke. Robert Garrett was unanimously re-elected President. The President, in his Report, says that notwithstanding the financial panic stopped other works, the work on the Valley railroad has been progressing steadily. The completed road between Staunton and Harrisonburg is doing a good business. On the line south of Staunton sixty three out of the eighty seven sections are in process of completion, and the remaining twenty four are light sections, which may promptly be completed as soon as the heavier work is done. Gratifying progress is being made at the heaviest points, which are between Fairfield and Buchanan. The amount already expended south of Staunton, is eight hundred thousand dollars. The president argues strongly for the granting of the charter for the extension to the Tennessee line.

☞ An iron works in Leechburg, Pa., turns out weekly about seventy tons of sheet iron by the use for fuel of natural gas drawn from an abandoned oil well situated about one-fifth of a mile from the works. The production has been increased about thirty-three per cent. since the gas was first used, about seven months ago. The iron made by the use of gas commands from $10 to $20 per ton more than the same class of iron made by the same firm at other works where coal is used for fuel. This natural flow of gas is plentiful in that region, and, along the Ohio river it is utilized in many ways for heating, lighting, and in manufacturing establishments.

☞ Articles of incorporation have been filed with the Secretary of State of Indiana by the Forty first Parallel Railroad Company, Indiana Division. The line of the road is to cross the State from the Ohio line in Allen county to the Illinois line in Newton county, where it will connect with the Keithsburg and Eastern.

☞ Steps are being taken to build a narrow gauge railroad from Red Bud, Randolph county, Ills., to Chester, on the Mississippi. The proposed route is through Ruma, Evansville, Ellis Grove and Kaskasia, about 25 miles. The tract comprises some of the finest farming land in Southern Illinois.

☞ Charlotte, Va., has donated land to the Chesapeake and Ohio railroad, worth $5,000, upon which is to be erected a round-house and machine shops ; also $5,000 in addition ; also a loan to the company of $5,000, to be secured by mortgage on the property deeded to the road—this last to facilitate the building of the proposed works.

☞ The coupon due January 1st 1861, on the Preferred Construction bonds of the Chesapeake and Ohio Canal Company, will be paid at the banking house of Alexander Brown & Sons, Baltimore, on demand.

Baltimore and Ohio Railroad.

The Chicago *Tribune* says the section of the Baltimore and Ohio Railroad from that city to South Chicago was opened on the 10th inst., and then adds : "The road from this city to Baltimore will be formally opened on the 1st. The track is now laid continuously up to the Michigan Central crossing at Lake Station, and is continued on the other side. About four miles more track is to be completed at the Lake Station crossing, which will be done in a few days. The commissioners appointed by Judge Gillett, of Valpariso, met at the Crossing yesterday. After having examined the ground and listened to arguments of the counsels of both the roads they returned, awarding $100 damages to the Michigan Central railroad for the right-of-way used by the Baltimore and Ohio."

☞ The earnings of the Indianapolis, Cincinnati and Lafayette Railroad in August, 1874, were $156,834, the expenses $89,527, and the net earnings $67,307. In August, 1873, the earnings were $169,574, the expenses $106,747, and the net earnings $62,827—showing a decrease in earnings of $12,740, with a decrease in expenses of $17,220, making an increase in net earnings of $4,480. The passenger receipts exceed those of 1873. The falling off is in freight, which will be amply redeemed when, if ever, the Grain moves from the West. The President says that barring accidents we shall improve our cars and engines all the time, notwithstanding the reduced expenditures.

☞ A late telegram from the Hague states that the budget of the Dutch Indies for 1875 shows a surplus of 10,000,000 florins. This, together with 4,000,000fl. surplus of 1873, after deducting expenses of the Sumatra expedition, and all accumulated surpluses, will be appropriated to the construction of railways in Java.

☞ The funding of the coupons of the Chesapeake and Ohio Railroad, it is understood, is going forward very rapidly. The bondholders of Holland, Switzerland and Germany it is said, have accepted the terms proposed by the company, and up to the present time holders of bonds to the amount of more than $11,000,000 have agreed to come into the settlement.

☞ The office of Assistant General Superintendent of the St. Louis and Southeastern Railroad has been abolished, and Mr. George S. Winslow has been appointed Superintendent of the St. Louis Division, with office at Mt. Vernon, Ill., and Mr. R. H. Minty Superintendent of the Nashville Division, with office at Nashville, Tenn.

☞ The Camden and Atlantic Railroad Company will, during the winter, lay a city passenger railway track on Atlantic avenue, between the Excursion House and Massachusetts avenue, in Atlantic City.

☞ The Governor of Georgia has ordered the sale of the Macon and Brunswick Railroad to take place on the first Tuesday in December next, at the depot in Macon, Ga., at public auction, to the highest bidder.

☞ The ordinance appropriating $80,000 for the erection of an iron bridge over Jones' falls at John street, has passed both branches of the Baltimore City Council.

Erie Railway.

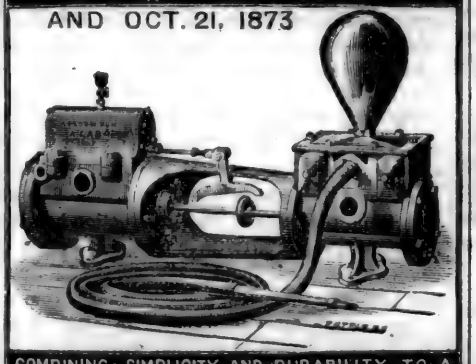
LONDON, Oct. 9.—The report made by the London accountants of their investigation into the affairs of the Erie Railway Company, which was read to day in the Stock Exchange, says that in three years, ending September, 1873 the profits of the road were $1,008,775, instead of $5,352,673, as stated in the Company's accounts. This amount is subject to further deduction in respect to the various items charged to capital not yet admitted. The report shows a loss on the working of the Atlantic and Great Western Railroad up to September 30th, 1871, and states that $3,240,567 were paid by the Erie Company as dividends in the years 1871, 1872 and 1873. The accountants consider that under the circumstances, the dividends on the preferred stock were fairly earned.

The report also states that but for the deficit of $456,444, shown by the corrected profit and loss account as existing September 30th, 1871, $270,000 would have been available, subject to the adjustment of outside matters for a dividend on the common stock, after the payment of four dividends on preferred stock for two years ending June 30th, 1873. An abstract of the statement of assets and liabilities of the Company of September 30, 1872, show the liabilities to be $115,449,211, and assets $118,265,979. The report covers the period from September 30th, 1871, to March 31st, 1874.

An authoritative examination and determination of many questions of law and fact affecting the nature of the multifarious liabilities and assets must be accomplished before a complete elucidation of the present financial position of the company can be arrived at. The accountants express themselves highly satisfied with the facilities afforded them for the prosecution of their investigation in New York. Many important appendices to the report were not read and will not be published until the issue of Capt. Tyler's report, which they will accompany.

☞ Moody Merrill has been elected President, Samuel Little Treasurer, John L. Swift Clerk, Thomas W. Clarke Counsel, and Julius E. Rugg Superintendent of the Highland Street (Boston) Railway Company. It appears from the report of the President made to the stockholders, that the total number of passengers carried during the year ending September 30, was 3,831,429; average number per round trip, 41.9; number of miles run during the year, 6,308,966; number of miles to each horse for the year, 5018; number of miles for each horse a day 13¾; total receipts from passengers during the year, $193 176 73; expenses for the year, $148,883 77; number of cars owned by the company, 56; number of horses, 324; snow plows, 3; sets of harnesses, 80; and other equipment sufficient to make the road one of the most thoroughly equipped in the country.

☞ The trustees of the Cincinnati Southern Railroad announce the intelligence of the sale in New York of the second million of the Cincinnati 7.30 bonds for the construction of the Southern Railroad. The bonds were sold at par with accrued interest. All the heavy grading on the road between Cincinnati and Chattanooga is under contract, and six hundred men are working upon it. With the remaining ten millions in authorized bonds the trustees promise to have the entire road ready for cars in twenty months.



☞ A loan of $200,000 has been made to the Missisquoi and Black River Valley Railroad Company by a London firm on the preferred stock, and the line will probably be completed from Richford to Richmond, P. Q., by next fall. Ten miles of the road have already been graded.

☞ The Boliver (South America) Railway Company was recently in the London market for a loan of £200,000, to aid in completing its railroad from the copper mines of Aroa, in Venezuela, to the port of Tuscacas, 62 miles. A contract has been let for constructing the road for £421,000, and it is reported that the work is progressing satisfactorily, that the line is cleared for nearly its whole length, that the first section is open, and that four-fifths of the material has been sent out and paid for. The contractors, James Perry & Co., and Cutbill, Son & De Lungo, expect to have the road open throughout by next May.

☞ The grading of the Fall River Railroad was commenced at New Bedford, Mass., on the 16th inst.

The Railroad Defaults and Recoveries.

A year has passed since the sudden break-down in our credit system, whose worst effects were visible in the department of railroad construction and operation—a sufficient time to enable us to survey the extent of the damage, and to forecast the future of the great industrial interests connected with transportation and commerce. The sum of the damage to the railroad interest we have before summed up in detail, and it may be roughly stated as follows: At the close of 1873, we had a trifle more than 70,000 miles of railroad in operation in the United States, the cost of which, as expressed in the figures of the component owners, without regard to the kind of currency, or to the actual outlay on the visible property, or to those intangible elements such as franchises, unearned increments and the like, may be put down at $3,600,000,000—three thousand six hundred million dollars—or in round numbers, an average of $50,000 per mile. Of this sum, at the same date, not less than two thousand millions consisted of bonded and unsecured debts, while the remainder is reckoned as stock capital. Of this amount not less than 20,000 miles in length, and 900 to 1,000 millions in money expenditure have been put forth during the eight years succeeding the war period. It is on these new roads that the weight of the trade and banking revulsion fell most heavily—though there were several instances of unfortunate roads built, or begun, long before that epoch. Looking over the field of crippled and disabled companies we find upwards of 30 out of the 180 defaults, involving a full proportion of the total indebtedness, had occurred before October, 1873, although in some cases their break down was covered up by the interests or policy of kindred companies. As examples of the serious delinquencies not traceable to the panic of 1873 we may mention: the Atlantic and Great Western, with a total of $28,000,000 bonds; the Boston, Hartford and Erie, with $20,000,000 bonds; the Des Moines Valley, with $8,000,000; the Oregon and California, with $10,500,000; the New Orleans, Mobile and Texas, with $12,000,000; the Rockford, Rock Island and Saint Louis, with $9,000,000; the St. Joseph and Denver City, with $7,000,000; the Southern Minnesota, Port Huron and Michigan, Alabama and Chattanooga, and other smaller concerns, whose aggregate of bonded indebtedness would exceed $20,000,000, making in all $110,000,000 of defaulted bonds to start on. In the case of some others like the Northern Pacific, the New York and Oswego Midland, the Texas and Pacific, and a few others of minor proportions, the panic afforded, not the cause, but the occasion for their suspension of interest payments, others again like the Canada Southern, the Chesapeake and Ohio, the Missouri, Kansas and Texas, the Kansas Pacific and the Burlington and Cedar Rapids, having their tracks completed to a through connection, might have continued to meet their engagements had not the monetary revulsion paralysed the trade and industries along their lines, and deprived them of even the most meagre credit facilities at bank.

The total amount of defaults may be reckoned at close upon 500 millions, and the number of corporations at 110, or a trifle less than five millions each, showing the magnitude of the enterprises undertaken in our days of buoyant hope, and revealing also the large proportion of our roads built upon borrowed money. Unfortunately a large part of the sums drawn upon did not consist of actual long loans, but sales of bonds were anticipated by short, or even call, loans.

Glancing over the field now we find that several of the list have made such composition with their creditors as to permit the companies to enter on the proper administration of their properties and finances. Voluntary concessions have, for the most part, prevailed. In only a few cases, (and in these there was obvious reasons, aside from the inability of the roads to earn the interest) have there been proceedings for a legal change of ownership and direction. The alternatives of the courts are so tedious, expensive and so generally ruinous to the morale of the employees, that it is only desperate cases which call for so exhausting measures. And here it is proper to mention that a part of the above aggregate is composed of defaults which are merely the sequelæ of the original break down. By a peculiarity of our law of bankruptcy the hardships of creditors are sometimes increased. For example a railroad corporation finding itself unable to meet its interest payments is placed like a merchant unable to meet his notes;—he may not even pay a part,—such part as he can—without first getting the consent of the great bulk of the whole number of creditors. This is always a delicate and tedious operation. In this way several of the railroads without the means to pay the larger loans are obliged to withhold from their whole indebtedness, funded and floating, or run the risk of being prosecuted under the law for an illegal diversion of the property and resources. Some of them run this risk in the case of their earlier mortgage bonds, because any complaint from the later lien holders, including floating debt holders is virtually nugatory. In this way the aggregate of debt on which interest payments are suspended is greater than the actual disability to pay—for the law interferes to prevent, with few exceptions, any payment that does not proceed with the consent of the large majority of the creditors.

Gratifying progress has been made by some of the companies. The Atlantic, Mississippi and Ohio (without any new lines in construction) for example, funds only one coupon. The Kansas Pacific funds two coupons and half of three others

the bondholders being further secured by a committee of supervision till the arrears are liquidated. The Missouri, Kansas and Texas, it is thought, will be able to compose there difficulties. The 4 Chesapeake and Ohio coupons are nearly all funded, and no re-organization of this company is now imminent.

The Canada Southern is in a happy way of adjustment, also. The Oswego Midland, it is thought by some, will have to be sold under foreclosure and pass into the hands of the bondholders. The Northern Pacific boudholders are comparatively helpless, their only present hope being an exchange of bonds for lands along the line. The Oregon and California holders have agreed to accept one half of one per cent (!) interest, on the personal guarantee of Mr. B. Halladay. The California Pacific Extension bonds will likely have to be funded into a new low-rate (probably 3 per cent) bond. The Atlanta and Richmond Air Line is now in litigation, as are also the St. Joseph and Denver, the Montclair, and the Southern Minnesota. Most of the far southern railroads are in a helpless condition as well as the holders of their bonds. One or two recent defaults deserve special mention. The Pittsburg, Washington and Baltimore road is a protege of the Baltimore and Ohio Company. It appears that the first mortgage coupons have been purchased at their face value by the protesting company, while the seconds have been allowed to go to protest. The case of the Columbus, Chicago and Indiana Central is similar, the Pittsburg, Cincinnati and St. Louis and Pennsylvania Railroad Companies, being co-guarantors of the $15,000,000 first mortgage bonds, have paid the interest, but have allowed that of $10,000,000 seconds to lapse. The greater part of this last loan is understood to be in the possession of the latter company; and that it will foreclose, subject to the prior liens, and thus wipe out the old stock, of which it is also a large owner.

On the whole it would appear, in spite of the large figures of our roads apparently in disgrace, that the condition of American railroad interests is not so bad as a first glance might suggest; and judging from the comparative tables of earnings, published on another page, it is daily and steadily improving. Recklessness and waste there have undoubtedly been, but these have given way to economy and thrift. A few months of our good crops and active labor will suffice to put all deserving enterprises on a paying basis.

Defaulting States.

At the recent conference of International Law at Geneva, Mr. Gerstenberg, President of the Council of Foreign Bondholders, made the following remarks:

"A short time ago Greece was the only defaulting State in Europe, now Spain was in the same position, and there were other European governments which, although not defaulters, did not strictly fulfill the obligations to which they had bound themselves. In America, before 1864, Ecuador was the only State that did not pay its debt; since then, Venezuela, Paraguay, Mexico, and several of the Central American States were to be ranked in the same category; and in the United States there were Florida, Alabama, North and South Carolina, Virginia, &c., in which financial treaty obligations had been broken in some cases and entirely repudiated in others. The Council of Foreign Bondholders, of which he was chairman, in such cases proceeded to treat a State as they would an individual. If it could show that its difficulties resulted from force majeure, they said to the debtor, you must in the first place prove that you cannot pay all; secondly, you must pay what you can and owe the rest; and thirdly, you must provide us with such security in territory or dues as the nature of the case will admit. With respect to the East they had nothing to complain of. Japan had contracted two loans which had been of great service to her, and had returned a good rate of interest to the holders, and he congratulated his excellency M. Kawase upon the result.

Cincinnati, Sandusky and Cleveland R. R.

The earnings of this road for the years ending June 30, 1873 and 1874, were:

	1873.	1874.
From passengers	$210,307 35	$218,688 41
" freight	455,685 41	440,811 33
" mail and express	43,106 13	50,316 14
" rents, etc.	31,672 89	26,321 33
" net earnings from leased lines	64,343 82	69,214 23
	$805,115 60	$800,351 44
Expenses, viz:		
Maintenance of way	$151,576 84	$122,686 25
Motive power and cars	218,462 20	211,745 16
Transportation	128,595 16	137,266 15
General expenses	66,426 61	61,482 35
	$565,060 81	$533,179 91
Net earnings	$240,054 79	$267,171 53
L. S. & M. S. condemnation suit—suspense		7,277 33
Rush R. Sloan suits—amount thus far realized to treasury		13,923 17
Increase floating debt	$63,407 23	
Less increase floating assets	788 38	
		62,618 85
Total		$350,990 88
Disposed of as follows:		
Paid interest on bonds		$161,133 00
Paid dividends preferred stock		25,731 00
Paid Col., Spring. and Cin. R. R. Co. account rental	$81,827 60	
Balance due rental account	26,612 30	
		108,439 90
Paid interest on notes, etc		7,162 49
Paid account new locomotives		7,526 00
Real estate		3,443 59
Sinking fund		5,291 04
Columbus Round House, and raising grade Col., Spring. and Cin. R. R.		6,995 21
Deficit in wood account June 30, 1873		12,904 62
Deficit in 1163 shares Cin., Sand. and Clev. R. R. stock last year		12,364 03
Total, as above		$350,990 88

The number of tons of way freight carried during the year amounted to 161,810; do. through freight, 159,536—total, 321,346. Number of passengers carried, 255,467; mileage of do., 6,613,488.

The President in his report says:

It will be seen that the gross earnings of the road for the year ending June 30th, 1874, were $800,351 44, and the expenses $533,179 91, showing net earnings of $267,171 53. From these were paid, interest on bonds $161,133, dividends on preferred stock $25,731, rental of Columbus, Springfield and Cincinnati Railroad $80,000, a total of $266,864, and showing a surplus of earnings of $307 53.

It will be seen from the foregoing, that the business of the road, the past year has been sufficient to meet the ordinary expenses, (including the rental of Columbus road,) and the interest on its bonds and preferred stock. Interest on the floating indebtedness of last year and sundry other extraordinary expenditures during the year, had to be provided for by temporary loans and discounts.

The total amount of the floating indebtedness of the company, is now $363,486 47

To meet which we have—

Cash on hand	$10,156 07	
Uncollected earnings and other bills receivable	41,124 46	
Cash with Union Trust Co., and other	2,679 64	
5,163 shares C., S. & C. stock, at present market value, $9 per share	46,467 00	
10,115 shares, Columbus, Springfield and Cincinnati Railroad stock, at estimated value of $5 per share	50,575 00	
Estimated value of property now remaining on hand, received in settlement of suits against Ex-President Rush R. Sloane	200,000 00	
		351,002 17

Showing an estimated deficit of assets, $12,484 30

This deficit, we have good reason to hope and believe, will be more than made up from the proceeds of the "Sloane Property," when realized. The property received from Sloane, in settlement of our suits, was taken at an estimated value of $250,000. About $14,000 of this has been disposed of and realized on at full estimated value, leaving some $236,000, which, in above statement of assets, is estimated at only $200,000. This reduction of $36,000 we think ample to cover any possible shrinking in value, and justify us in the hope expressed above, that it will besides make good the estimated deficit of $12,484 30 as shown above.

In considering the foregoing, as exhibiting as nearly as possible the present condition of the business and property of the company, and the prospects for the future, it should be borne in mind that the past year has been an exceptional one, in its severity on the business of all the railroads of the country. We have suffered in common with other roads, from the general depression in business throughout the country, occasioned immediately by the financial panic of last year.

Ruinous competition between the great East and West lines of railroad, for the small amount of freight that offered, reduced the rates of transportation to much less than cost; obliged to share *pro rata* with them, we have consequently been obliged to share with them in the loss.

This road has heretofore depended for its earnings, to considerable extent, upon the transportation of iron ore and coal, used by the rolling mills, furnaces and other iron establishments at Columbus, and other points at and near the line of our road.

The utter prostration of the iron interest throughout the country, deprived us entirely of all transport of iron ore, and nearly so of coal for a large portion of the year.

Notwithstanding all these discouragements we have entire confidence in the future of the road.

An interest so vital to the general business of the country as the iron industry, cannot in the nature of things, remain much longer in its present depressed condition. It will, before long, again require transport of iron ore and coal over our road, to its and our mutual advantage.

A revival of the general trade and business of the country, will surely increase transportation will all railroads, put a stop to the present ruinous competition, and enhance rates to a paying point.

The reform instituted in the conduct of the business of the various departments of the road, and the reductions constantly being made in the expenses, will, we feel sure, tell favorably on the future net earnings.

The road has been remarkably free from casualties of every kind, the past year, and is in good condition, as shown by the Report of the Superintendent, to transport any amount of freight and passengers that may offer.

From the Report of the Superintendent we learn that the company had at the close of the year 82 locomotives. Of these 20 are first class, 10 second class, and 2 building. 14 burning wood and 18 burning coal. Miles run with passenger trains 318,591, with freight trains 399,274 with construction and wood trains 61,804—total, 779,669; coal burners have run 387,501 miles, and wood burners 392,168 miles. The above is the mileage upon the Main Line, Columbus Division and Findlay Branch. Repairs of engines have cost during the year 5.70 cents per mile. The number and classification of cars is as follows: 20 passenger, 3 sleeping, 5 mail, 1 passenger and baggage, 7 baggage, 333 box, 66 stock, 168 flat, 338 coal, 46 hand and 10 push cars.

The track of the road is in fair condition. There have been laid during the past year 1¾ miles of new and 7¼ miles of re-rolled iron, and 25,785 new ties. About 100 tons of new iron, 400 tons of re rolled iron, and 35,000 new ties will be required the coming year.

President.—JOHN S. FARLOW.

Vice President.—WM. WILSHIRE.

Directors.—John S. Farlow, Isaac D. Farnsworth, N. W. Pierce, J. G. C. Dodge, Boston, Mass.; Elisha C. Litchfield, New York; Wm. Wilshire, Cincinnati; J. H. Thomas, Springfield, O.; Geo. J. Anderson, J. D. Chamberlin, Sandusky, O.

General Manager.—GEO. T. BENEDICT.

Secretary & Treasurer.—J. L. MOORE.

Superintendent.—CHAS. HOWARD.

☞ The earnings of the Atchison, Topeka and Santa Fe Railroad for August, 1874, were $112,681, against $105,352 in August, 1873. The earnings for 8 months to Sept. 1, were $789,986, against $742,218, an increase of $45,768.

Union Pacific Railroad.

The commission, consisting of James Moore, Ira L. Merriam and J. L. Delano, appointed to examine and report whether the deficiencies in the construction of the Union Pacific Railroad, as reported by the commission of eminent gentlemen in 1869, have been supplied, and whether the road has been completed according to law and departmental instructions, have forwarded their report to the Interior Department, from Salt Lake City, under date of Oct. 7. The examination was begun Sept. 25 and completed April 5, and was thorough and in detail. They say that the report of the former commission was made soon after the joining of the rails at Promontory, and before the commission or company had the experience required to determine what material in the peculiar climate of the country was actually necessary to bring the road up to the standard required by law. The former commission felt this embarrassment, and referred to it in their report. In most cases the expenditures of the company in the items reported by the former commission have far exceeded their estimate. The present commission has found it impossible to ascertain whether the exact amounts advised by the former commission have in all cases been expended in the precise localities indicated, particularly as regards the improvement of the water-ways. The commission has been compelled to make a somewhat general comparison of expenditures actually made with those which were estimated to be necessary. The aggregate result is as follows: Estimated deficiency by report of eminent citizens, $1,380,100; actually expended by Union Pacific Railroad Company, $3,596,075 79; excess of actual expenditures over estimates, $2,215,975 79. The company in almost all cases complied faithfully with the recommendations of the former Commissions. The only exception worthy of note is in the building of the machine shops at Evanston, in Wyoming Territory, instead of at the junction. This change was caused by the inability of the road to obtain property at the junction until a very recent date. Experience has demonstrated the Evanston location to be much more desirable. These shops have cost more than three times the amount estimated by the former commission. The commission was instructed "to give full and exact information as to the present condition of the road." In obeying this instruction the commission gives several pages of its report to a statement concerning its location, the Missouri River bridge, the road-bed, tunnels, snow-fences, snow-sheds, the tracks, the water supply, and other subjects. The length of the straight line or tangents of the road is 887⅛ miles, and of the curved lines, 48⅛ miles. The maximum grade of the road is ninety feet per mile, and its sharpest curve is six degrees. The road-bed in bank is fourteen to sixteen feet in width. Two hundred miles of the track have been raised from two to five feet, which dispenses with the need of snow-sheds and fences for that distance. All the truss bridges appear to be sound and capable of sustaining any required weight. The wooden truss bridges are renewed by combinations of wood and iron. Many of the small trestles and culverts have been replaced by stone structures. The company is endeavoring, by raising the track and widening the cuts, to dispense entirely with snow fences and sheds. The track throughout is in excellent condition. The chair joints are being rapidly replaced by fish-plates. At Laramie the company is erecting extensive rolling mills to roll their own rails. Since 1869, 2,000,000 of new ties have been placed on the track, and 400,000 more are now ready to use. All cotton-wood ties have been replaced by pine and oak. The sidings are ample. The ballasting is in good condition, station and freight houses are of good quality and ample in size. The water supply is ample, several additions to the tanks and wells having been made since 1869. The machine shops are capable of meeting double the requirements of the company at the present time. The equipment is first-class and fully up to the present requirements of the road. The Commissioners were instructed, if they found the road completed as required by law and departmental instructions, to ascertain as nearly as practicable the date of such completion. They find that the replacing of some of the high trestles recommended by the former commission was finished in the month of September last, and they report therefore that the road was completed on the 1st of October, 1874, at a total cost, as shown by the company's books, of $115,214,687 79. The report concludes as follows:

We consider the road, as built, a first-class railroad, fully complying with its charter and with the requirements of the law, and in accordance with the instructions of the department furnished to us. The shops and round houses are of brick and stone, its machinery all of the latest and most approved pattern, its locomotives and rolling stock ample and in excellent condition. Its passenger trains are well appointed and first class, giving ample accommodation to the travel. Its structures are fast becoming permanent, iron being substituted for wood and stone, and, if the present policy of the road is continued it will be but a short time before the maintenance of the road-bed will be reduced to the minimum. Its cheap fuel, and the effort being made by the company to develop the resources of the country through which it runs, will develop the local travel and traffic, and add largely to its tonnage and earnings. The condition of the road, its order and discipline, and the evident close attention to details, not only show ability on the part of the general officers, but reflect great credit upon the local management, its superintendents and assistants.

The Secretary of the Interior will now have to consider the report, and if he determines to accept it as evidence of the completion of the Union Pacific Railroad according to law, he will undoubtedly order the issue of the land patents that have been withheld. The purpose and the consequences of the withholding of these patents have been already explained, and the acceptance of this report would end controversy that otherwise will again appear in Congress, as it will give titles to settlers and place the lands granted the company in the reach of the States in which they lie for the assessment and collection of taxes.

☞ The Valley Virginian says that the Baltimore and Ohio railroad, the Valley railroad and the Chesapeake and Ohio railroad have entered into arrangements by which the companies mentioned are to pro rate freight after the 15th instant. All freight coming from the West on the Chesapeake and Ohio railroad destined for Baltimore is to be carried over the Valley road from Staunton, and the freights intended for Richmond, which may have to come from the West by the Baltimore

and Ohio and the Valley roads, are to be pro rata. Major N. H. Hotchkiss, agent of the Chesapeake and Ohio railroad, heretofore with headquarters at Baltimore, will hereafter make Staunton his base of operations, and extend his labors into the western counties of Virginia and West Virginia as a part of his duties.

Pennsylvania Railroad.

The following is a continuation, from our last issue, of the Report of the Investigating Committee on the Western Group of Railroads controlled by the company:

In the Appendix D will be found a statement showing the receipts of these lines for 1868 and 1873, and a comparison of the number of passengers and amount of tonnage. The table shows a satisfactory increase in most of the lines, and fully sanctions the remarks we have made.

A comparison of this table with the list of guarantees will show, first, that the Pennsylvania Railroad Company has not been called upon to pay any money on account of her leases or guarantees on the above lines; second that the Pennsylvania Company, in working these lines, made a clear profit of $1,131,611 03.

We now take up the line of railway west of Pittsburg, operated in your interest through the control given to the Pennsylvania Company by its holding a majority of the stock of the Pittsburg, Cincinnati and St. Louis Railway Company. This, you will notice, involves no liability on the Pennsylvania Company other than that of loss on its stock, in which it is on a par with the other stockholders.

PITTSBURG, CINCINNATI AND ST. LOUIS OR SOUTHERN SYSTEM.

The lines of railway under the control of the Pittsburg, Cincinnati and St. Louis Railway Company, are the following:

	Miles.
1. Pittsburg, Cincinnati and St. Louis Railway, extending from Pittsburg to Columbus.	
Made up of the Pittsburg end, extending from the Union depot to the Washington turnpike gate, owned by the Pennsylvania Railroad Company, and leased to the Pennsylvania Company	1.1
Steubenville and Newark (Pittsburg, Cincinnati and St. Louis proper)	158.9
Newark to Columbus (held in joint ownership with the Baltimore and Ohio Railroad)	33.0
Cadiz Branch, built by the Springfield and Northwestern Railroad	8.0
	201.0
2. Chartiers Valley Railroad, leased to Pittsburg, Cincinnati and St. Louis Railway Company, and worked at cost	22.8
Cincinnati and Muskingum Valley, leased to Pittsburg, Cincinnati and St. Louis Railway Company, but worked at cost	148.4
3. Little Miami Railroad, which consists of the Cincinnati and Springfield Railroad, the Dayton and Xenia Railroad, the Dayton and Richmond Railroad, and the Columbus and Xenia Railroad, in all	196.7
NOTE.—Leased by the Pittsburg, Cincinnati and St. Louis Railway Company, and guaranteed by the Pennsylvania Railroad Company.	
4. The Columbus, Chicago and Indiana Central Railway, extending from Columbus to Chicago through Richmond to Indianapolis, and from Bradford Junction to near Logansport, and from Logansport to State Line, Illinois	581.1
NOTE.—Leased by Pittsburg, Cincinnati and St. Louis Railway Company and guaranteed by Pennsylvania Railroad Company.	
	1,1[illegible]

This is the total length of line operated by the Pittsburg, Cincinnati and St. Louis Railway Company.

In addition to these roads as part of your railway system, we give a statement of the two bridges built in your interest over the Ohio river—the one at Cincinnati and the other at Louisville:

1. THE NEWPORT AND CINCINNATI BRIDGE.

This bridge crosses the Ohio river at Cincinnati, and furnishes a railway connection between the roads north and south of that river converging at Cincinnati, and also gives a common road connection between the cities which give it its name.

Its cost is represented by—

Capital stock	$1,200,000 00
Bonded debt, seven per cent.	1,200,000 00
Floating debt	812,766 55
	$3,212,766 55

Of which the Pennsylvania Railroad Company holds—

Capital stock	$720,000 00
Mortgage bonds	1,200,000 00
	$1,920,000 00

The capital stock was received as a bonus with the purchase of the bonds, and thus secures to the Pennsylvania Railroad Company the control of the bridge.

The Little Miami Railroad Company and others south are under a guarantee of $75,000 per annum to the bridge company for the railway traffic alone. The incidental and road traffic belongs to the bridge company. The business is developing and promises better results, although we fail to see any very good reasons for this outlay of capital by the Pennsylvania Railroad Company.

Gross receipts in 1873	$76,975 88
Expenses and taxes in 1873	23,866 50
Net receipts in 1873	$53,109 38

2. THE JEFFERSON AND LOUISVILLE BRIDGE.

This company has a capital stock of	$1,500,000
Bonded debt	800,000
	$2,300,000

and owns the track (one mile long) connecting the bridge (five thousand two hundred and ninety feet long) with the Louisville and Nashville Railroad station at Louisville.

Under the contract made with the bridge company by the railway companies using the bridge, the tolls are fixed at an amount to pay the cost of repairs, maintenance, taxes, interest on bonds, and sinking fund sufficient to pay them at maturity, and twelve per cent on the capital stock.

The stock and bonds issued by the above named roads and their floating and other debt* amount to—

Stock	$33,359,128 49
Bonds	47,654,760 25
Floating and other debt	4,845,831 78
Total for 1,318 miles	$85,859,720 52
Or per mile of road costing	$65,040 00

We also add a table of the workings of these lines, showing earnings, expenses, rental, profit and loss.

RENTALS PROFIT AND LOSS OF PITTSBURG, CINCINNATI AND ST. LOUIS OR SOUTHERN SYSTEM.

Roads.	Rental.	Profit.	Loss.
P., C. & St. L.	$669,790 00*	.....	$243,106 44
Chartiers	.....	$18,291 15†	.....
Little Miami	710,769 74	.....	769,371 78
C., C. & I. C.	1,343,342 05	.....	1,463,675 17
Cin. & M. V.	.....	19,419 20‡	.....
Showing a loss on their lines of			$2,476,153 39

* This includes the St. Louis, Vandalia and Terre Haute Railroad, with stock, $2,377,779 52; bonds, $5,490,000; debt, $250 557 97; total, $8,127,337 49. Length of road, 168 miles.

* [We have consolidated two columns to get space, and make this note to avoid error; the sum $669 790 being interest on funded debt.—*Ed.*]

† Being worked at cost, this amount was paid to Chartiers Railway Company.

‡ This amount has been placed to the credit of that company to meet its funded debt.

In the Appendix D will be found a statement of gross earnings, number of tons of freight moved, and number of passengers carried by the above lines in 1868 and 1873. This table shows a very satisfactory increase in the earnings and business of each road, and also shows that if the same rates per ton had been received in 1873 that were in 1868 the financial result would have been much more favorable and shown a profit to the company.

The loss on these lines had to be provided for by the Pittsburg, Cincinnati and St. Louis Railway Company first, and in case of their failing, became a charge against the Pennsylvania Railroad Company to the extent of $2,054,111 79.

It is but just to add here that some of these lines were taken by the company in wretched order as to track, power and equipment, and that a large amount has been annually expended in bringing up to a better standard the track, motive power and cars, and we especially note the fine condition of all the western lines in these respects, showing the judicious expenditure of money. In 1873, such was the anticipated increase of business expected by these, as by all other roads, that large outlays were made to provide for the increasing trade, and the General Manager of this line of road reports that the capacity of the line in February, 1874, was fifteen per cent greater than in 1873, owing to the improvement and betterments placed on it during 1873. He estimates these improvements to have cost—

For road and superstructure, including new water stations, bridge, three hundred and forty-eight miles new track, and one hundred and sixty eight miles new ballast.	$1,197,020 72
Motive power, including entire rebuilding of 77 engines	258,626 15
Cars, rebuilding passenger, baggage and freight cars	268,748 64
Amounting to	$1,724,395 51

6. The St. Louis, Vandalia and Terre Haute Railroad is almost wholly owned by the Pennsylvania Company, and is operated under a lease by the Terre Haute and Indianapolis Railway Company.

The net results to the Pennsylvania Company for the year 1873, after paying interest on bonds, &c., was a profit of $4,805 64. Length of road, 168 miles.

The Cleveland, Mount Vernon and Delaware Railroad extends from Hudson, through Orrville, Millersburg, and Mount Vernon, to Columbus, with a branch to Massillon, a distance of one hundred and forty-four miles, with an intended branch from Millersburg to Dresden, on the Pittsburg, Cincinnati and St. Louis Railway, and connecting there with the Muskingum Valley Railroad.

The common stock issued amounts to	$1,390,100
Of this you hold (received as the valuation of the road when reorganized)	1,100,000
Leaving in other hands	$290,100
The preferred stock issued amounts to	$451,450
Of this you hold, and have paid for five thousand eight hundred and two shares, representing	290,100
Leaving in other hands	$161,350
The bonds amount to	$2,800,000

From the main line we cannot expect more than its ability to pay its interest. If the branch is built to Dresden, which should have been done first, and a connection thus be made between the ores at Cleveland and the coal in the Hocking Valley, a more profitable business will be done between Hudson and Millersburg.

Let us now bring these Western roads together.

	Miles.	
The profit on the Fort Wayne system was, for	1,563.6	$1,360,024 38
The profit on the St. Louis, Vandalia and Terre Haute line	168.0	4,805 64
Total profit for	1,731.6	$1,364,830 02
The loss by the Southern system was, for	1,150.0	2,476,143 39
Total loss on lines for	2,881.6	$1,111,313 37
The Pennsylvania Company made a profit in 1873 from other sources of		1,076,296 27
Which would leave a net loss on all the lines west of Pittsburg of		$35,017 10

Or, by the admission of the estimate of the General Manager, as above given, into the statement, it would show as follows:

Profits on the Fort Wayne system and the Vandalia line	$1,364,830 02
Profit on the Pennsylvania Company in 1873 from other sources	1,076,296 27
Profit of Pennsylvania Company	$2,441,126 29
But, as the Pennsylvania Railroad Company owns about eight elevenths of the whole stock of the Pennsylvania Company, this stock would be represented by a profit of	$1,775,360 00
Losses by the Southern system	$2,476,143 39
Less improvem'ts made and charged to expenses, providing an increased capacity of fifteen per cent on eleven hundred and fifty miles of railroad	1,724,395 51
	751,747 88
	$1,023,612 12

Showing a net gain to the Pennsylvania Railroad Company of $1,023,612 12 as the final result of the operations for 1873—very nearly enough to pay for the additions made to the track and equipment of the Southern system of roads.

We also bring together the length of the Western roads and their capital, to show total investment:

	Miles.	Capital.
Northern System:		
Length of road	1,563.6	$83,371,901 57
Southern System:		
Length of roads	1,150.0	77,782,383 03
St. Louis, Vandalia and Terre Haute Railroad:		
Length of road	168.0	8,127,337 49
Cleveland, Mt. Vernon and Delaware Railroad:		
Length of road	144.0	4,225,435 00
Cost of	3,025.6	$173,457,057 09
Average cost per mile, including equipment		$57,341 17

We will hereafter discuss fully the value of the trade brought to and taken from Pittsburg for the Pennsylvania Railroad by these lines, but we desire now to learn—

First.—What are the prospects for the future of these lines?

Second.—At what figure may we place the liability of the Pennsylvania Railroad Company for them?

First, then, the prospects of these lines of railroad for the future. The building of railroads in the West is acknowledged to have gone beyond the ability of the country to make them profitable.

The competition of the trunk lines from east to west has cut down prices of transportation and travel below the point of profit. For some of the direct lines in the near West there has been sufficient trade and travel to have paid at fair rates the interest on their funded debt, and on many of them a dividend on the stock; but roads have been carried to the extreme verge of population, and, to enable the producers at these far points to send their produce to market, prices have been fixed by competition too low to pay the cost of carriage. The stockholders of the new roads holding land grants, and the many roads built on speculation, desire to attract settlers on their lines, and therefore favor the continuance of these low rates until they can dispose of their lines or get rid of their investment.

The most of these land grants to railways have been unwisely given by Congress, and have drawn the people far beyond the point where the farmer can be repaid for his labor by the money value of his products and the railway for its transportation. One or the other or both must go down. There is a limit at which transportation can be done, viz., paying the absolute cost of the work without reference to bonds or stock, and there is a minimum price which the farmer must get for his produce to give him the means of existence. With these two limits fixed, it would not be difficult to define the extreme limit of expense paying production. If the speculators who build these railways were the only losers of money, and the farmer who exiles himself and his family from many of the benefits of civilized life was the only sufferer, we might say, let them do as they please, for the limit of injury would be quickly reached. But the speculator pushes off his worthless stocks and bonds on innocent and confiding persons, thereby inflicting wide spread harm, and seriously affecting the character and credit of the nation, while the farmer inflicts an irreparable wrong on his children. In this whole subject there is a question of morals involved.

It is just these facts that the people in the West should consider. So great has been the infatuation of the public mind in the East, as to the value of the Western trade, that they have thought there was no limit to the ability to produce and the power to transport profitably the staple productions of the West eastward to the Atlantic. The experience of the Pennsylvania Railroad Company, as we shall hereafter show, pricks the bubble of the value of the Western trade and travel to the trunk lines. If these statements are true, what then? Plainly two things—

1. The far West must cease to produce grain, depending on the East and Europe for their market. Population must not go beyond the point where the producer and transporter can be both paid for their labor.

2. To secure the largest and freest development of the rich fields of the West, the consumer must be brought nearer to the farmer; which simply means—the manufacturer and the grain grower must be close together. The less need of transportation the better, as between the producer and consumer. The saving of this cost of transportation is just so much added to the value of the products of the farmer and so much added to the profits of the manufacturer. The valleys of the Ohio and Mississippi must become the great work shop of this country. This realized, any demand from abroad for the cereals of the West would be met by a price which would compensate the farmer for his labor and capital, and the railroad company as the carrier.

The Western railways will not become profitable investments until this end is reached. They cannot be made to pay at any thing like the through rates they have received during the past few years. It would certainly seem reasonable to expect that the able men in charge of our general railway system would not permit the mere question of rivalry to prevail any longer and prevent them from fixing paying rates from east to west and from west to east. They should see that by their own impolitic course they are but extending the evil of a population reaching beyond the point where a living can be made by farming.

If they establish paying rates it will tend to centralize population, develop towns and cities, and create in place of destroying wealth, and the Western people will soon learn the lesson that their produce can no longer be carried below cost nor will the few who travel from west to east and back again be transported in Pullman cars at the cost of the share or bondholder.

Or look at this question from another point of view.

The recent war raised the price of produce to a very profitable figure, and thereby stimulated the building of railways in the West. The success of those lines built and in use during the war, the profits in farming, and the springing up of thriving towns, seemed to prove that such results would continue to the limit of the ability to build railways. But since the war, prices have been gradually decreasing; a succession of large crops, caused by labor returning measurably to its old channels, favorable seasons, and peace in Europe, have so reduced prices that, to meet this reduction, the railways have cut down their tariffs to the point where transportation has become less profitable. Already millions of dollars of capital invested in Western railways which, a few years ago, were thought to be securely invested, have been sunk, and the startling problem is, how much further will this go, and how long will it continue? The freight charges over railroads depending on the carriage of the products of the farm cannot go much lower. The stock of some of such roads is sunk, and any further reduction in rates will destroy the capacity of these roads to pay the interest on their funded debt, and bring them down to absolute cost of transportation.

Pittsburg and Connellsville Railroad.

The annual meeting of the directors of this company was held in Pittsburg on the 14th inst. The report for the fiscal year ending October 1, 1874, shows the total receipts, from various sources, to be $1,564,993 31; the operating expenses, $1,556,347 84; net earnings, $8,645 47. In addition to the operating expenses, the interest account, taxes, &c., amount to $753,957 21, showing a deficit of $745,311 34. The coupons due on the Turtle Creek division and the first mortgage bonds were paid by aid of the Baltimore and Ohio Railroad Company; but those of the second mortgage bonds, due the first of last July, still remain unpaid, and the company having no means to meet those falling due January 1, has been compelled to ask indulgence of the city of Baltimore and other holders of this class of bonds issued for the non-payment of the interest due. This condition of the affairs of the company made the disposal of the remainder of the second mortgage bonds with the view to the reduction of the floating debt an impossibility. The opening of the Southwest Pennsylvania Railroad in March last through the heart of the coke district, together with the suspension of the coal production during the summer months, owing to the strike among the operatives, have caused a loss in the revenues of the road. The total receipts show a slight increase over the previous year, while the operating expenses have been unusually heavy.

☞ Mr. F. E. Hinckley, President of the Chicago and Iowa Railroad, has proposed to the people of Rockford, Ill., to build a branch line from Rochelle northward to Rockford, about 25 miles, provided they will take first mortgage bonds on the new line to the amount of $200,000. He will agree to have the road done by Jan. 1st, and the bonds are not to be paid until the road is finished. The Chicago and Iowa company will give to these branch bonds a traffic guarantee to the amount of 25 per cent of its gross earnings on business to and from the branch.

RAILROAD EARNINGS—MONTHLY.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

The asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics*." State-aid Railroads are distinguished by a "‡."

American Railroad Journal.

Saturday, October 24, 1874.

Stock Exchange and Money Market.

Money has been in more urgent demand, for speculative, as well as legitimate business purposes, and rates have been quoted firmer; the quotations on call loans to even the best Street houses having been more generally 8, than 2@2½ per cent; and on the choicest grades of commercial paper, 6@7 per cent per annum have been the ruling figures. At these rates, the supplies of Money however, have been more than found equal to all the immediate requirements of responsible borrowers. Some further announcements of mercantile troubles and failures, chiefly traceable, this week, to adverse speculative ventures in Grain, and Provisions, tended to unsettle confidence, but as these embarassments grew out of operations, which were outside of regular trade dealings, the reports did not awaken much sympathy for the sufferers, or their immediate backers. The last city bank statement was rather against the easy working of the money market, having shown an aggregate loss of net reserve of specie and legal tender notes of nearly three millions, reducing the excess over the legal requirement of reserve, to liabilities, to $18,174,125. The City banks, last week reduced their reserve of legal tender notes $1,697,200, and their deposit item $3,348,500, while cutting down their specie average $1,938,900. They report an increase of $897,400 in the loans and discounts, and a decrease of $55,300 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $57,016,205, against $57,135,573, the preceding week; and a coin hoard of $57,441,451, against $56,544,087, on the previous return. The City bank exchanges, during the week, were $465,875,347, or a daily average of $77,645,891. The customs revenue of the port, during the week, was $1,964,000. The City banks reported their average of gold last week at $15,007,800, and their greenback average at $60,697,000. Their deposits stood at $230,122,700. The loan item was $282,275,000. The circulation was $25,060,500.

The aggregate of the outstanding U. S. currency, of all denominations, Oct. 1, was $428,806,425. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is over 350 millions.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 33 millions.

The Treasury balances at the opening of business on Wednesday were as follows: currency, $14,150,441; special deposit of legal tenders for the redemption of certificates of deposit, $58,485,000; coin, $79,897,086, including $23,796,900 in coin certificates.

Gold has been more active, and quoted firm. The speculative demand has been more confident. The export and customs drain have been on a reduced scale. The Treasury Department has ordered the prepayment of the November coin interest on the public debt, this week, with rebate; and next week, without rebate. The extremes of the week have been 109⅞@110¼, closing on Wednesday at 110⅛, as against 110 on Wednesday of the preceding week. The specie outflow last week was only $315,265. The imports of specie at this port since Jan. 1, have been $4,416,455, against $8,067,387 same time last year. The customs demand for Gold last week averaged $827,333 a day. Foreign Exchange has been in more demand and quoted with Bankers' sixty day bills on London closing on Wednesday at $4 84½@$4 85½; sight bills on London at @4 88@$4 89 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,552,953.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $6,602,070.

Government Securities have been attracting more attention from investment buyers, and prices have been quoted firmer, on quite moderate offerings of most issues.

U. S sixes of 1881 closed on Wednesday of this week at 118½@118¾; U. S. Five-Twenties of 1862, 118@118½; U. S. Five-Twenties of 1864 at 116@116½; U. S. Five-Twenties of 1865, 117@117¼; U. S. Five-Twenties of 1865 consolidated, 116⅜@116⅝; U. S. Five-Twenties of 1867, 117⅛@117⅞; U. S. Five-Twenties of 1868,

117¾@117⅞; U. S. Ten-forties at 112⅛@112⅜; U. S. Fives of 1881, (Funding Loan) 112¼@112¾; Six per cent. currency Sixes from 118@118¼.

Speculative dealings at the Stock Board have been less animated, and the general market has been weak and irregular. A comparatively light business has been reported in State and Railway bonds, prices of which have been quoted easier, in most instances. Railway and miscellaneous share property has been much depressed on the later movements, which were on a restricted scale, the market winding up feverishly, under the manipulations of operations for lower prices.

Domestic Produce movements have been fairly active, but Cotton, Breadstuffs, Provisions, and Petroleum have been quoted generally weaker in price. Tobacco firm, and quite brisk. Hides and Leather, moving more freely. General merchandise has been in moderate request, at variable rates. Of Iron, we learn of sales of 300 tons Eglinton Pig, and 100 tons Glengarnock do. to arrive, on p. t. and 200 tons Wrought Scrap, deliverable at the East, at $32. Eglinton Pig Iron quoted from yard at $37; Glengarnock, $38@$39; No. 1 American Pig at $28@$30, No. 2 do. at $26 50 @$28; Forge, $24@$27; English Rails at $48@ $50, gold; American Rails at works, $55@$60; Old Rails, $31@$34. Wrought Scrap, $30@$32. Ocean freights, more active, and Grain, Cotton, and Provision rates by steam firmer.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

☞ The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending October 10, at 481,083 tons, and for the coal year 14,465,587 tons, against 15,791,291 tons to corresponding time last year, being a decrease of 1,225,704 tons. The bituminous tonnage for the week is 74,224 tons, and for the year 2,605,598 tons, against 2,589,940 tons to same time last year, giving a total of all kinds for the week of 555,307 tons, and for the year of 17,071,185 tons, against 18,271,221 tons to same time last year, being a decrease of 1,160,042 tons.

☞ The Secretary of the Treasury has given notice that the payment of the November interest on the public debt will begin without rebate on Monday, the 26th inst. The amount of gold interest upon United States bonds, due on 1st of November, is $15,210,375 75; being $11,182,902 upon the five-twenties of 1862, 1864 and 1865 (old), and $4,027,473 75 upon $322,197,900 of the fives of 1881, according to the latest debt statement.

Western Union Telegraph Co.

At the annual meeting of the stockholders of this company, held on the 14th inst., the report of the President for the year ending June 30, 1874, was presented and read. It shows that the capital stock of the company is $41,073,410, of which the company owns and has now in its treasury $7,287,735, leaving an outstanding capital of $33,785,675. The bonded debt is $5,946,000, of which sum $4,448,900 is in seven per cent currency bonds, which will mature on November 1, 1875, and $1,498,000 in seven per cent gold bonds, due in 1902. The bonded debt was reduced during the year by the redemption of bonds of the American Telegraph Company, which matured on October 1, 1873, amounting to $89,500, and by purchase for the sinking fund of $2,000 of bonds of 1902. The company has no floating debt. The receipts for the year from all sources were $9,262,653, and expenses $6,755,733, showing a net profit of $2,506,920. The report also shows a large addition during the year of poles and wires and new offices opened. The receipts from the Cuba cable for the year ending June 30, 1874, were $308,870 99; expenses $71,561 13, leaving a balance as net profits $237,309 86, to which is added $72,000 of bonds issued, making a total of $309,309 86.

The number of messages transmitted was 16,329,256, being an increase of 1,872,424 over the preceding year, giving the average receipt for each message about fifty five cents. The duplex apparatus, by means of which two messages are sent in opposite directions on one wire at the same time, fully sustains its previous utility. This year has produced a still more wonderful telegraph machine, by which means two messages can be sent in the same direction and two others in an opposite direction simultaneously on the same wire. The invention called the quadruplex has been in successful operation between New York and Boston, and is performing an amount of work on one wire equal to the capacity of four wires worked with the ordinary Morse apparatus.

The old board of directors were re-elected except Ezra Cornell, C. W. Field, and Hiram Sibley. James Milliken, Levi P. Morton, and Dan'l Torrence were chosen in their places.

The new board subsequently organized by the election of the following officers: President, William Orton; Vice Presidents, A. B. Cornell, Augustus Schell, George H. Mumford, Norvin Green and Harrison Durkee; Executive Committee, William Orton, James H. Banker, A. B. Cornell, Harrison Durkee, Norvin Green, Joseph Harker, Edwin D. Morgan, Augustus Schell, W. K. Thorn, C. Vanderbilt, Frank Work.

☞ Jacob D. Cox has been re-elected President, W. B. Corneau, Secretary and Treasurer, and B. F. Ham Assistant Secretary and Treasurer of the Toledo, Wabash and Western Railway Company. The Executive committee consists of Jacob D. Cox, John F. Tracy, Sidney Dillon, George I. Seney and A. W. White.

☞ C. J. Osborne has been elected President, and G. P. Morosini Secretary and Treasurer of the New Jersey Southern Railroad Company. The Executive Committee are: C. J. Osborne, S. M. Mills, Nehemiah Perry, Edward C. Taylor and Edwin Eldridge.

Settlement of Southern State Debts.

The Chicago *Times* has a dispatch from New Orleans of the 15th inst., stating that in July last there arrived in this country the duly commissioned representative of European capitalists, holding upward of $200,000,000 of bonds of the Southern States, and he was armed with the power to effect with such States a settlement of their indebtedness, according to certain forms. The dispatch says:

This gentleman is at present in New Orleans, and it has been learned, that, as a partial result of his mission, he has effected understandings with the following States, in the sums here given: Virginia, $34,000,000; South Carolina, $10,000,000; North Carolina, $20,000,000; Alabama, $8,990,000; Arkansas, entire debt, $3,500,000; total, $75,500,000. The $8,000,000 of fradulent debt of South Carolina has not been settled, but negotiations looking to an adjustment are in progress. The terms of the settlement in all the States are in the main similar. The general features of agreement are that, in consideration of these States entering into a contract and ratifying it by State legislation, the foreign bondholders agree to fund the debt, principal and interest, and extend the time of payment of the principal for 30 years, at 4 or 5 per cent. interest, as may be agreed. The agent's visit to New Orleans is for the purpose of effecting some arrangements as to our European State debt, and he has been in conference with Gov. McEnery and other gentlemen, but, owing to the unsettled condition of our affairs he has not yet attempted to give the matter in this State official shape.

The draft of a bill submitted to the various State Legislatures, in ratification of the contract, has been approved by the executives of the States that have already agreed to a settlement, and its passage will be urged by the respective governors. This gentleman states that he has authority to settle with Louisiana for her entire debt, foreign and domestic, principal and interest, and to extend the credit thirty years, and will accept new funded bonds at four per cent., but is only deterred for the reason already alluded to. The act, whose ratification by the States effecting the settlement indicated, provides a sinking fund for the positive redemption of the principal, and vests in the holders and owners of such new bonds absolute power and authority to enforce the levy and collection of taxes, as authorized by the act, wherewith to pay the interest and to provide a sinking fund to pay the principal.

American Railway Cars in Canada.

A return was ordered during the last session of Parliament showing the number of railway cars, both passenger and freight, imported into Canada by our various railway companies. The period which the return was to embrace, extended from the 1st of January, 1873, to the end of April, 1874. It recently came to hand, and we find from it that we contrive to purchase no inconsiderable number of cars from American makers. At the port of Montreal, 17 street cars were imported by the City Railway Co., and 1 ordinary passenger car by the South East Railway Co., being of total value $17,038. At St. John, the Montreal and Chambly line imported 2, valued at $3,000. By far the largest number came in by way of Clifton. The entries at this port were 18 for the Great Western and 21 for the Canada Southern line. The value was $169,924, those of the first-named road being appraised at $108,817. The Hamilton City Street Railway Co. imported 6 cars valued at $4,410. the Canada Southern 2 via London worth $18,000, and the Welland line 1 at St. Catherines, valued at $4,500. At Windsor, the Great Western entered 45 box and 6 flat cars worth $40,185, and a private firm brought in dumpers worth $2,910. On suming these amounts, we find that the value of the American cars introduced into Canada during the period already stated, say fifteen months, was $259,967, the duties upon which came to the sum of $89,067.—*Toronto Monetary Times.*

The New Coal Road.

The new coal road building by the Lehigh Valley Railroad, leading from Easton, Penn., to Perth Amboy, N. J., is progressing rapidly. The Lehigh and Susquehanna Railroad Company having formed a union with the Central Railroad of New Jersey, Judge Packer determined to build a new road leading from Easton to Perth Amboy, which is an excellent point for shipping coal to the East, having superior facilities to those at Elizabethport, as larger vessels can load at that point than at the latter. We find the following notice of the progress of the road in Saward's Coal Circular:

Track has been laid on this road from Perth Amboy to Neshanic, (30 miles.) The track connecting with the Pennsylvania road at Metuchen is nearly completed, and all along the line contractors are at work widening the road bed and grading for the second track, which is to be laid over the whole road.

At the Musconetcong tunnel about 100 men are at work at the east end, and over 200 at the west end. The two headings are now about 1000 feet apart, but are not the full size of the tunnel, only a small part of which has yet been enlarged to the proper size. The tunnel when completed will be about 5300 feet long, nearly all of it through rock.

A large force is at work on the coal docks and trestles at Perth Amboy, which will be very extensive. The coal trestle, or storage dock, will be 2000 feet long by 200 feet wide, and 25 feet above the storage floor. From the outer end of this trestle three piers will run out into the harbor, where a depth of 14 feet at low or 20 feet at high water can be had alongside each pier. A further extension of 700 feet would give 40 feet of water at the end of the piers. The first of these is nearly ready for the track. These coal trestles and wharves can be enlarged to any extent at all likely to be required, as the company owns 400 acres of land with a water front of nearly a mile.

The Pacific Railroads.

It is stated that an agreement has been entered into between the Union Pacific Railroad and Kansas Pacific Railway Companies which specifies that the former shall hereafter pro rate with the latter on all through freight and passenger business, and impose the same charges from Omaha as are charged from Kansas City to Cheyenne. It also stipulates that the former shall so arrange the running of its trains as to enable the trains of the latter company to make the proper connections for the quick transit of their freight and passenger trains. This arrangement, if made, will, it is said, destroy the monopoly heretofore held by the Iowa lines, and will inure greatly to the benefit of the Chicago and Alton Railroad, which now has a through line to Kearney Junction, and will, it is said, put on through cars at once.

☞ We are informed that the misunderstandings between the Southern Maryland Railroad Company and its creditors have all been adjusted, the president of the road agreeing to deposit bonds of the company to secure all claims upon it until such time as negotiations for the completion of the road are completed. This road is designed to run from Washington down the peninsula between the Potomac and Patuxent rivers.

☞ The name of the Chicago and Northern Pacific Air-line Railroad has been changed to "Chicago, Portage and Superior Railroad," and has filed certificates to that effect with the Secretary of State of Illinois.

Cost of Tunnels.

Among the various plans for disposing of the Jones' falls stream or improving its channel, and which have been presented to the council committee, is one by J. E. Sudler, civil engineer, proposing to divert it by a tunnel from a point beyond the city across to the valley of Gwynn's falls, and thus throw its waters into the middle branch of the Patapsco or Spring Gardens. This tunnel would pass in good part under Druid Hill Park and through a rock formation which, it is believed, lies beneath all the hills in that quarter. Never having looked to diversion in that direction, and without pretending to have examined into or formed any judgment in the premises, (the plan lately suggested by the mayor in his special message to the council for improvement within the city being still pending,) it may yet be worth while to inquire into what has been the cost of like tunneling accomplished in other parts of the world. The aggregate cost of this tunnel for Jones' falls, the length of which is 16,000 feet, is put by its author at $2,300,000, or $145 per lineal foot, which is a fraction over $2 per cubic yard. With regard to other tunnels already in existence their cost is given as follows: The great Mont Cenis tunnel cost about $300 per lineal foot, including equipment of road, &c. The Kilsby double track railroad tunnel, (England,) in the construction of which very great difficulties were encountered from the tapping of quicksands, cost $262 50 per lineal foot. Bletchingly tunnel, for a double track railroad in England, cost $120. Terre Noire, on the Paris, Lyons and Mediterranean railroad, cost but $50 per foot; and the very difficult Hauenstein tunnel, between Basle and Berne, Switzerland, cost $133 per lineal foot. The Hoosac tunnel, through a formation of mica slate and quartz, with working shaft upwards of 1,000 feet in depth, cost $300 per lineal foot.

These tunnels were all completed several years ago, and the cost per cubic yard of material excavated varies from $1 50 to $14. The difficulties met with in their execution has led to the invention of improved apparatus, by the use of which the cost of boring, drilling, &c., is reduced from 100 to 300 per cent. The Diamond boring machine was thoroughly tested by Captain Beaumont, R. E., in Lancashire and Cumberland. At Stoughton the borer reached a depth of 689 feet in two months that could not have been got at in less than two years by hand labor. In the Clifton tunnel, Bristolport and Channel Dock railroad, in hard mountain lime stone, the drills advanced at the rate of two inches per minute—outside diameter of boring two inches. The machine advanced, at about five times the speed that could be attained by as many men as could find room to work at a heading. The motor is compressed air. Dynamite is used for blasting, and found to answer admirably. With the aid of these machines the work of tunneling through the hardest rock presents no difficulties of any extraordinary character, and may be executed at a cost very little, if any, greater than the excavation of the same material in open cutting.—*Balt. Sun.*

☞ The Penn Gas Coal Company have been engaged during the last year in constructing a railroad from Irwin to the mouth of the Sewickley, within a mile of the Youghiogheny river, a distance of seven miles. On the line they found it necessary to construct a tunnel nearly seven hundred feet in length, which is now completed and the track laid the entire length of the road. The company is opening out large coal works on the Marchand farm and at the Youghiogheny end of the road.

☞ A dispatch from New Lexington, Ohio, of Oct. 17th says "the Atlantic and Lake Erie railway have iron laid as far as the first tunnel, and next week, no doubt, will ship the first load of coal over their road. The locomotive is to be ere to commence work on Monday morning."

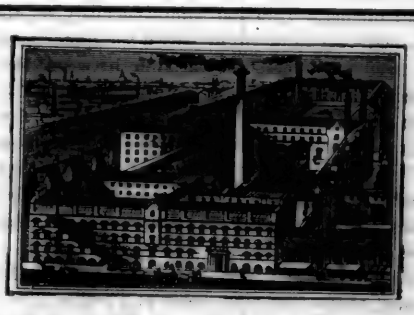
Liability of Employer for Injury to one Employe through the Negligence of another.

By a recent decision in the New York Supreme Court, the Boston and Albany Railroad Company is held responsible in damages for the death of Flike, a fireman, who was killed by collision with a runaway train on which there was an insufficient number of breakmen. The court held that although in general the employer is not liable for injury to one employe through the negligence of another, he is responsible for injuries resulting rom his own carelessness or negligence, in employing unfit or insufficient servants, or furnishing improper and unsafe machinery, materials, or facilities in any work.

Mr. Jefferson C. Rowe, of Portsmouth, N. H., has obtained $12,000 from the Eastern Railroad in settlement of his claim for damages at Revere, Mass., in 1871, whereby he lost his right arm and received other severe injuries while in performance of his duties as brakeman on the ill-fated express train. Mr. Rowe pays his own expenses, which are about $2,000. The preliminary points of the case being settled in the U. S. Court in favor of Mr. Rowe, the railroad officials were desirous of settling, in preference to a continuous suit (which was entered for $35,000 damages) and a possible judgment establishing a precedent by which employes could obtain damages for injuries caused by the carelessness of other employes of the same corporation. Mr. Rowe was an employe of the Portsmouth, Saco and Portland Railroad Company at the time of the accident, the Eastern Railroad having practically leased the Portsmouth, Saco and Portland Railroad and the services of its employes.

☞ Parties interested in the construction of the Spicket River Railroad have effected a permanent organization by the election of the following officers: President, Matthew H. Taylor; clerk, Levi W. Taylor; treasurer, William Taylor; board of directors, M. H. Taylor, G. W. Wheeler and G. C. Gordon of Salem, N. H., John K. Tarbox of Lawrence, James Walton of Methuen, J. D. Ordway of Hampstead, and Charles Sanborn of Sandown. They also chose a committee for making a permanent survey of the road, consisting of the following gentlemen: George C. Gordon, J. D. Ordway and M. H. Taylor.

☞ Mr. W. C. Van Horne, late General Superintendent of the St. Louis, Kansas City and Northern railway, has been tendered and accepted the position of General Superintendent of the Southern Minnesota railroad, and will assume his duties as such in a short time.



☞ The Butler (Pa.) *Herald* says there is talk of the Shenango and Allegheny Railroad extending their line by way of the south branch of Slipperyrock, and down the valley of the Connequessing to Butler, thus getting a road through to Pittsburgh.

☞ The Baltimore and Ohio Railroad company announces a dividend of five per cent. on the stock of the main stem, payable on the 22d proximo; also, a dividend of five per cent. on the stock of the Washington branch for the half year ending 30th September last, payable on the 21st instant.

The Public Lands.

The records of the General Land Office at Washington show that during the fiscal year ending June 30, 1874, 9,530,878 acres were disposed of, or 3,499,734 less than the previous year. The cash receipts were $2,469,998; this includes $548 199 from homestead and timber entry fees and commissions, and $40,804 from fees for lands certified to railroads. The falling off in the number of acres is principally confined to lands certified in aid of internal improvements and railroads, to swamp selections and lands certified for the use of agricultural colleges, universities and common schools, the decrease of area certified for railroad companies alone being 2,819,222 acres. The number of acres surveyed during the past fiscal year was 29,493,110, which added to the area previously surveyed makes a total of 649,393,052 acres. Out of the total area of public land in States and Territories, amounting to 1,834,998,400 acres, there yet remains to be surveyed 1,185,605,348 acres.

☞ A special meeting of the Stockholders of the California and Texas Railway Construction Company was held in Philadelphia on the 13th inst., for the purpose of considering a plan submitted by the Board of Directors for a reorganization of the affairs of the company. The plan was presented and adopted. It provides that the Texas and Pacific Railway Company be requested to reduce its first mortgage bonds from $40,000 to $20,000 a mile, and to make its land grant bond a second mortgage, at $20,000 a mile. Eighty-five per cent of the creditors of the company have signified their acceptance of the bonds in liquidation. The road to the extent of about 350 miles is now in working condition, and is doing a good business. The earnings, it is stated, are sufficient to pay the interest on the bonds.

Manufactory of the Spencerian Pens, Birmingham, England.

SWAN QUILL Action!

SPENCERIAN

STEEL PENS.

These Pens are comprised in 15 numbers; of the Number One Pen alone we sold more than

5,000,000

in 1873.

and the sale is continually increasing.

They are of superior English make, and are justly celebrated for their elasticity, durability, and evenness of point. *For sale by the trade generally.*

☞ *To accommodate those who may wish to try these Pens, we will send a Sample Card, containing all of the 15 numbers by mail on receipt of 25 cents.*

American Railroad Journal.

New York, Saturday, October 31, 1874.

Cincinnati Southern Railroad.

This company recently negotiated, through the American Exchange National Bank of this city, the sale of the second million of Cincinnati City 7-30 bonds, issued for the construction of the road, making two millions in all that have actually been put upon the market, the policy of the trustees being not to dispose of the bonds in advance of the necessity for money. The work on the grading of the road bed is progressing rapidly. About 180 miles are under contract in Kentucky and Tennessee, besides three miles from the Ohio river southward. The portions let comprise all the tunnels and the heaviest work, and the contracts are to be all completed Jan. 1, 1875. The trestles and smaller bridges are let, but no contracts have been awarded for the Kentucky and Ohio River bridges, and nothing can be done as to the latter until the Secretary of War makes his decision as to the location. In the longest tunnel, that at King's Mountain, which is 4,000 feet through, work is in progress from both ends from three intermediate shafts. In one tunnel near the Cumberland River the workmen have struck a vein of oil, and another passes through a seam of coal five feet thick.

Bridges' Patent Lubricant.

Messrs. Lyman Bridges & Co. have taken the agency for this valuable invention for Pittsburgh and all west of that point. It is the invention of and is manufactured by Albert Bridges, 46 Cortlandt street, N. Y., and, from all we hear, should be used on every railway. It is a fine white powder, made from a mineral of talcous magnesian character, free from grit, and is ground and bolted especially for this purpose. It accomplishes a great saving in oil, and entirely prevents hot journals. We have been shown a number of testimonials of the very highest character, especially from the officers of the Erie Railway. It never fails to cool the most heated journals, and is undoubtedly the best article used for that purpose. Messrs. Lyman Bridges & Co. have thus far succeeded in introducing it on the Chicago and Northwestern; Chicago, Burlington and Quincy; Michigan Central; Chicago and Pacific; Chicago, Danville and Vincennes, and Illinois, Bloomington and Western Roads.

Nevada Co. Narrow Gauge Railroad.

On the 11th of April last the Nevada County Narrow Gauge Railroad Company filed articles of incorporation, the object being to construct, put in operation and operate a railroad from Colfax to Nevada City, by the way of Grass Valley. The capital stock was placed at $400,000, the principal place of business being at Grass Valley. Referring to this road, the Union and Transcript of Oct. 17th says:

The Directors of the Narrow Gauge Railroad met at Grass Valley on Tuesday afternoon, and discussed various matters pertaining to the business of the road. A motion was passed that the last survey made by J. H. Bates, engineer in charge, be adopted, provided the citizens of Grass Valley will give the company right of way through the town and ground for a depot in the town. The new line will cost the company more than will the spur line from Union Hill, not considering the right of way in the question. If the company take on an additional expense to get into the town, the Board of Directors think the property owners of the place should help, in some manner, to share the additional expense. The Directors then adjourned to meet at Grass Valley next Monday afternoon at 3 o'clock, when the engineer's report will be complete in all its details and will be submitted to the Directors. Both towns ought to grant the privilege of entering the town and all the land necessary for business purposes. Without the road land will be of but little account. When the engineer gets through "reporting," we presume some definite action will be taken about building the road.

Santa Barbara Cinnabar Mines.

Seven miles north of Santa Barbara have been discovered the richest quicksilver mines of the world, that is, the assays per ton of the ore in the ledges and deposits as far as exploitered show them to be so. These mines have been for several months past quietly visited by cinnabar experts in the interest of the leading moneyed interests of the coast, and the result is that after a searching examination a company has been incorporated for the purpose of working these mines. The names of the principal capitalists who have assisted in this enterprise are as follows: E. L. Sullivan, Ed. J. Pringle, Hon. J. P. Jones, D. D. Colton, Col. Fry, Col. McDowell and J. S. Cassall. This company is now fully organized, and have gone to work. Already a graded pack horse trail has been made from the mine over the Santa Ynez mountains into Santa Barbara. By this trail horsemen can go from this city up and over the mountains, and down to the mines, in three hours.

To enable the company to build furnaces to reduce the ore and to construct a graded road from the mine to Santa Barbara, and to prosecute the work of developing the mines thoroughly, a preliminary assessment of 25 cents upon each of the 100,000 shares of stock has been levied, which will amount to $25,000. This shows that the company intends to carry on the work of development with energy.

In fact, preparations are now under way for the manufacture of brick, of which to construct the furnaces; and it is claimed, by those who have examined the matter, that a first rate quality of fire clay is found in abundance convenient to the mine, from which a durable lining for the furnaces can be made. It seems as if nature had furnished, near at hand, all of the requisites to carry on the business of reducing the ores. There is but one thing wanting in the successful working of the mines, and that is the necessary timber to brace up the excavations from which the ore is extracted. We learn, however, that about twenty miles

distant, on the way to Bakersfield, are forests of white and red pine, which can be reached by an easy wagon grade. The supply for the Santa Barbara mines will have to come from these forests, or else to be drawn from northern shipments reaching the wharves of Santa Barbara.

The company is composed of some of the wealthiest men of this coast. They have ample means for the work, and they are determined to make a thorough examination of their property, whatever it may cost. They have purchased from the Najalayegua claimants all their right to the land on which mine is located, so that the title is now clear and indisputable.

Among the list of the principal stockholders in this quicksilver mine is the name of Hon. John P. Jones, United States Senator from the State of Nevada. Lately he paid over $300,000 for some mines in Panamint, and has subscribed $220,000 to the capital stock of the Los Angeles, Panamint and Cerro Gordo Narrow Gauge Railroad.—*Santa Barbara Index.*

The Granger Movement from a Commercial Point of View.

(From N. Y. Herald Money Article of Monday.)

Politically we have in this column nothing to do with the granger movement. Financially it has become a subject of much discussion among business men, especially since recent results have demonstrated the folly of an attempted innovation upon the natural laws of trade. First, the producer never can fix the price of an article. This work belongs to the merchant and is regulated by supply and demand. Secondly, he can exert no other than a temporary influence on freights, for no general rule can successfully apply to all localities. He may be a communist for a hundred miles around him, but outside of that circle he is more than likely to encounter adverse interests and arouse the antagonism of those who have been more or less fortunate than himself. Wheat in July last was quoted at $1 10 per bushel. To-day it is sold in Chicago at 83½ cents. A prominent Western railroad official said at that time, "when wheat sells at less than $1 per bushel we cannot earn a dividend." The crop has been withheld in expectation of higher prices, but the price of wheat in England is said to be lower than it has been known for twenty years. While Americans have been waiting, France, Russia, Hungary and Austria have rushed in to supply the English market. In all the grain producing countries of Europe there is an era of cheapness and plenty. At home we see only overstocked markets and reduced values, the farmer complaining, the railroads suffering and merchants staggering under a load of unrealized expectations. California affords a salient illustration of the greed of this new combination. Seeking to dispense with "middlemen" the grangers adopted the plan of chartering vessels direct for Europe and shipping grain on their own responsibility. The result has been a concentration, it is said, of about $20,000,000 worth of wheat on the Pacific coast awaiting market. Correspondents in California say that "there is no profit on these farmers' ventures; that they have shut the door to competition, and that there are no other buyers than those who desire to load ships under charter; no life or activity in the breadstuff market and trade almost dead." It is further reported by the California papers that there are ships by the score waiting cargoes in the face of the biggest grain crop ever harvested on the Pacific slope. From these facts it is evident that the grangers have not fully comprehended the magnitude of the changes superinduced by the late panic, and, that, being unable to appreciate the effect of contraction, the necessity of finding a prompt market for their products, the folly of attempting by legislation to regulate natural causes and control great railway enterprises, they have created a whirlwind which up to the present hour they have been unable to ride, and which daily increases in force and volume.

Great Western Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JULY 31, 1874.

At the general meeting in April, 1873, the Directors obtained the sanction of the Shareholders to issue the balance of the share capital, with the corresponding loan capital. The borrowing powers so conferred have been exercised, and in April of this year a small amount of preference stock was also issued. The Directors now propose to issue, pro rata to existing Shareholders, at a price which will be named at the general meeting, the balance of the unissued share capital, viz., 49,918 shares of £20 10s. each. A resolution, in furtherance of that adopted in April, 1873, will be submitted to the Shareholders. The Directors, on acceding to office, found the affairs of the Detroit and Milwaukee railroad in the utmost embarrassment. Proceedings had been commenced in the American courts, the result of which might seriously jeopardise the interest which the Great Western has in that Company; and it has become manifest that, unless full powers are given to the Board to contribute, financially and otherwise, towards the reconstruction of the Detroit and Milwaukee Company, the loss to the Great Western may be serious. A resolution will accordingly be proposed at the special meeting, conferring upon the Board the necessary power and authority to afford such financial aid to the Detroit and Milwaukee Railroad Company, and to concur in such rearrangement of its securities, as they may deem expedient. The Directors, in compliance with an application from the Board of the Wellington, Grey, and Bruce Railway Company, have consented, subject to the approval of the Proprietors, to a further issue of bonds, as authorized by the Wellington, Grey, and Bruce Company's Act of 1871. This, with the previous issues, will make up an amount equal to $12 000 per mile of that Company's line, including sidings. A resolution approving this issue will be submitted to the special meeting. An arrangement with the London, Huron, and Bruce Railway Company was, on a previous occasion, placed before the Shareholders. The Directors have now offered to the Board of that Company fresh terms for a lease of their line, on conditions more advantageous to the Great Western Company. The necessary resolution will be submitted to the special meeting. A lease of the London and Port Stanley railway for 20 years has already been approved by the Shareholders. The Board are advised that this lease was informal; and under a special act of the Ontario Parliament, since obtained, the Proprietors will be asked to renew their approval of the lease. The Board have entered into a provisional agreement with the Canada Southern Railway Company with reference to access by that Company to the Niagara Suspension Bridge. This subject will receive the particular attention of the President when in Canada. The accounts for the past half-year are presented to the Proprietors in the form hitherto adopted; with the single exception that they contain information as to the unexhausted capital powers of the Company, similar to that furnished in the accounts of English railways. The Board have thought it right not to disturb any of the decisions of their predecessors as to the charges on the revenue of the half-year, such as that for steel rails now being laid on the Toronto branch, and the reserve for the renewal and repair of locomotives. But they propose to make a careful scrutiny into these and similar items before the date of the next half-year's report, and they have determined that the accounts for the future shall be, *mutatis mutandis*, in the form prescribed by the Imperial "Regulation of Railways Act, 1868." They have also decided that the loss on the conversion of American currency shall not appear as a separate charge in the net revenue account, but shall be deducted as it accrues, from the several items of receipt and expenditure. Before concluding this part of the report, the Directors desire to state that, having accepted the administration of the Company's affairs at a critical moment in its history, they purpose to treat the Proprietors with the utmost candor in bringing before them periodical statements as to matters affecting their property; trusting that the Board will receive that support and authority from the Proprietors, without which vigorous measures for the protection of their interests and the welfare of the concern will be impossible.

The receipts on capital account during the half-year to 31st July, 1874, amounted to £309,038, as follows:

Share Account.—One share issued for preference stock converted, £20 10s.; less difference on 10 shares transferred from Canada, 9s. 7d.; leaving		£20
Preference Stock.—First instalment, April, 1874, issue	£54,109	
In anticipation of future instalments	7,114	
	61,223	
Less converted into share	20	61,203
Debenture Stock.—On account, 2nd, 3rd, and final instalments, May, 1873, issue		31,415
Amount of April, 1874 issue		223,700
		316,338
Bond Account.—Balance of 6 per cent bonds, due 1st September, 1873, paid off	900	
Six per cent bonds due 15th November, 1873, paid off	6,400	
		7,300
		£309,038

The total receipts on capital account amounted, on 31st July, 1874, to £8,422,888. The charges to capital account during the half year amounted to £134,745, as follows:

For land works, permanent way, and incidental charges, &c	£18,002
Double track account	52,962
Aldanburgh branch—balance	3,310
Fourth car ferry boat	2,343
Locomotives	568
Cars	13,031
Tools for new car shops at London	7 922
Glencoe and Buffalo loop line	12 053
Discount and commission account	25,153
	£134,745

The total expenditure to 31st July, 1874, amounted to £8,238,481, leaving a balance at credit of capital account of £184 407. The receipts and expenditure on revenue account for the half year have been as follows:

Gross receipts		£553,258
Working expenses, including renewals, rents, taxes, and all charges		425,303
		£127,955
Add profit on leased lines		1,081
Surplus from last half year		4,360
		£133,396
From which has to be deducted—Interest on bonds and debenture stock	£95,715	
Discount and charges on American currency, &c	31,623	
Amount set aside for renewal of ferry steamers	2,500	
Alteration of gauge account	9,100	
Balance of cost of repairing damage caused by floods west of Chatham	1,826	
Balance of interest account	9,511	
Investigating Committee's exp..	3,178	
		153,453
Deficit		£20,058

The dividend for the half year on the 5 per cent preference stock (which cannot be paid now, but being cumulative will be a charge on the net earnings of future half years) amounts to £6,270, making a total deficit on the 31st July last of £26,827. In the notice issued by the Board on the 10th instant, it was stated that the balance as given in the rough draft of the revenue account showed a deficit of about £8,100, but that "the final accounts have not been received or audited, and a question will arise on them affecting the amount of the balance; only the actual weight of the steel rails laid down having been charged." The difference between the £26,327 now shown and the above amount of about £8,100 consists of:

Additional charge for steel rails	£13,704
Expenses of Committee of Investigation	3,178
Other adjustments, including balance of charge to rolling stock renewal account on the usual basis	1,617
	£18,499

The aggregate traffic receipts on the main line and branches (exclusive of those of the Galt and Guelph, the Wellington, Grey, and Bruce, and the London and Port Stanley Railways) amounted to £551,863, as compared with £618,976, showing a decrease of £67,113, as follows:

Decrease in through passenger traffic		£7,649
" emigrant traffic		3,802
" way freight traffic		31,771
" way live stock traffic		1,285
" through freight traffic		17,268
" through live stock traffic		15,026
		£76,801
Increase on way passenger traffic	£1,689	
" mails and express freight	1,675	
" freight on Co.'s stores	6,324	
		9 688
Decrease		£67,113

The receipts and ordinary working expenses per train mile for seven corresponding half years compare as follows:

Half year ending July 31,	Gross earnings per train mile. s.	d.	Ordinary working expenses per train mile. s.	d.
1868	8	5	4	8¾
" 1869	8	0	4	8
" 1870	7	8½	4	7
" 1871	7	9½	4	5
" 1872	7	9¼	4	6
" 1873	7	6½	4	11½
" 1874	6	8¾	5	0¼

The following table exhibits the receipts and expenses for seven corresponding half years:

RECEIPTS.

Half year ending July 31.	Passengers, mails, and sundries. £	Freight and live stock. £	Rents. £	Total. £
1868	155,082	200,619	948	356,649
1869	157,930	226,200	937	385,068
1870	153,863	254,230	807	408,900
1871	158,084	300,059	747	458 891
1872	193,951	356,014	769	550,734
1873	197,994	420,902	863	619,839
1874	189,907	361,955	1,395	553,258

EXPENSES.

Half year Ending July 31,	Including renewals & all charges. £	Per cent of gross receipts.
1868	208,462	58.45
" 1869	232,768	60.45
" 1870	251,824	61.58
" 1871	268,276	58.46
" 1872	329,437	59.82
" 1873	417,099	67.28
" 1874	425,303	76.87

The discount and charges on the conversion of American currency for the half year amounted to £31,623, as compared with £39,546 in the corresponding half year. The conversions were made at an average rate of 112½. The ferry steamer's renewal fund has been credited with £2,500 (£500 more than the usual charge), and accrued interest. The balance at the credit of the fund at July 31, 1874, amounted to £13,295. In connection with this fund the mechanical superintendent of the company has specially reported on its insufficiency with the present stock of boats, recommending that the annual charge be increased from £5 000 to £6,000. The usual amount of £9 109 has been charged to revenue on change of gauge account, making a total of £63 700 charged against this account to July 31, 1874, leaving yet to be charged of the original estimate £27,284. The locomotive renewal fund has been credited with £11,168 during the half year, making a balance at the credit of this fund at 31st July, 1874, of £55,225. There is also a balance at 31st July, 1874, at the credit of car renewal fund of £3,715 (£440 having been credited this half year). The operations of the Galt and Guelph, Wellington, Grey, and Bruce, and London and Port Stanley lines, are shown in the working accounts annexed, after deducting the half-year's rental, and the proportion of renewals applicable to the Welland railway, amounting together to £1,704, there remains a profit of £1,081, which is carried to net revenue account. The usual investment will be made in Wellington, Grey, and Bruce bonds to the extent of 20 per cent of the additional earnings from traffic interchange with that line. This amounts for the half year under notice, to £4,086.

On behalf of the Board of Directors
HUGH C. F. CHILDERS, President.
London, 30th September, 1874.

North Pacific Coast Railroad.

Some time ago Judge McKinstry, in the case of W. T. Coleman against the Board of Supervisors of Marin county, denied the plaintiff's petition for an injunction. A subsidy election was held in Marin county January 29, 1872, and it was voted to grant a subsidy to the North Pacific Coast Railroad Company amounting to $160,000. Thereafter it was agreed between the Board and the company that the road should enter the town of San Rafael, the county seat, from the south. This would make the road run through Coleman's land, which is situated on the south of the town. The agreement was afterwards modified so as to permit the company to run the road into the town on the west. By this agreement the extensive lands of Coleman were left out in the cold. Coleman worked hard to secure the subsidy for the company, expecting that his lands would be greatly enhanced in value. He asked that the Board be enjoined from issuing bonds to the amount stated, and that he have judgment for $50,000 damages. He claimed that it was on condition that the route should go direct to San Rafael that the subsidy was carried. On Saturday an important decision annulling the orders and proceedings of the Board of Supervisors was filed by the Supreme Court. The Court decided that it is manifestly the intent of the Act of April 4, 1870, to leave the question of the route to the determination of the electors of the county. If the authority be conceded to the Board to make changes in any material respect, there is no ground on which the authority can be denied to it to make an entire change of the route.—*Sacramento Record.*

☞ It is said that a favorable line has been found for the Aroostook Railroad route, crossing the St. John river at or near Beveridge's landing in Andover. The road will follow the western bank of the St. John to the mouth of the Aroostook, thence along the latter river to the Caribou bridge. To aid in constructing the first ten miles New Brunswick will give $50,000, and towns along the line will make up the remainder. The road will probably be completed at an early day.

San Francisco and San Jose Railroad.

The San Francisco *Alta*, of the 14th inst., says that papers filed recently in the Recorder's office show that Henry F. Williams has leased from F. K. Livingston for twenty years, the land in blocks 339 and 353 on the Potrero, and parts of thirteen other blocks on the Potrero; also, from C. Reis, a lease for ten years, for parts of Potrero blocks; also, from Gustave Reis, for ten years, Potrero Block No. 375; also, southeast corner of Tennessee and Napa streets, irregular shape, and then adds:

This important transaction is believed to indicate a proposed change in the line of the San Jose Railroad, so as to avoid a present heavy grade of twelve miles over the San Bruno Mountains, and permit the easy carriage of freight now brought around by Oakland. The Central Pacific Railroad Company has arranged for the construction of a railway along the shore of the bay from San Mateo line to this city, probably connecting with the Second street freight depot of the overland route. The shore route will avoid the heavy grade, and gain three miles over the other route between San Jose and here. The work of preparing the line for the ties and rails has already been begun.

California Pears.

The Baltimore Sun notices the arrival in that city of two car loads of California pears by rail, via the Northern Central Railway, claimed to be the first direct shipment from San Francisco to Baltimore since the beginning of the now extensive fruit trade overland between the Pacific coast and the Atlantic cities. The cars were twenty days making the trip, owing to an error in transitu. They were shipped October 6, and the freight on each car was $650 which is about the original cost of the fruit in San Francisco. California pears ripen by keeping, and there was not a single one decayed in the present lot, although so long on the road. The fruit coming this way is carefully packed, each pear being carefully wrapped in soft separate paper. The pears are very large, some weighing over a pound each. Some of the varieties, it is said, will keep until Easter.

☞ A single track of the Easton and Amboy Railroad has been finished from Neshanic to Perth Amboy. The company are erecting, on Staten Island opposite Perth Amboy, coal docks and storehouses 2,600 feet in length by 200 feet in width, at a cost of about $1,000,000. A force of three hundred men are engaged upon the tunnel under the Musconetcong Mountain. Forty-three hundred feet have been tunneled, and 1,000 feet yet remain to be cut through. The road will be sixty-two and a half miles in length.

☞ The earnings of the Philadelphia and Erie Railroad for September, 1874, were $336,149 81, the expenses $206,802 54, and the net earnings $129,347 27. For the nine months ending September 30, 1874, the net earnings were $677,887 61, against $220,860 80 for the corresponding nine months of 1873, an increase of $456,527 81.

☞ Joseph Hyckson has been appointed General Manager of the Grand Trunk Railway, with L. J. Sargent as Assistant Manager.

☞ The Monterey and Salinas Valley Narrow Gauge Railroad was finished to Salinas City on the 10th instant.

Pennsylvania Railroad.

We give below the conclusion of the Report of the Investigating Committee on the Western Group of Railroads controlled by the company, portions of which were given in our last and preceding issues:

It is also well to note, as having an important bearing on this question, that the area of grain producing land is increasing, in the great producing countries of the world, while the ability to consume does not show a proportioned increase. The prospect this year is for another large crop following the one of 1873—the inevitable result, unless fortuitous circumstances interfere, will be lower prices for grain and meats. We thus have these three facts before us—

1. That the tendency of prices for the products of the farm is downward;

2. That the cost of transportation cannot be safely reduced below existing rates;

3. That the products of the farm from the far West will not, at the present rates, profitably bear railroad transportation to the East and pay the railroad company a fair price for its carriage, or the farmer a just reward for his labor and capital invested.

With this discouraging outlook into the future, is it strange that we find the Western farmers moving in their strength to find out what can be done to drive away the grim figure of poverty which threatens them? That their first attack is on the transporter is natural; he seems to be their nearest enemy, and as they have none of the stocks or bonds of the railroad companies, and the owners are afar off, the foreigner's property is a tempting object of attack, even to destruction. There is in this truth a moral that the stockholders of the Pennsylvania Railroad Company may well learn: that the strength of a railway company in meeting unjust attacks on its property lies more in the fact of the people who use the road having a strong personal interest in it, as stockholders, than in the justice of their cause. And this is the explanation of the condition of things in Wisconsin and Iowa. The same influences may yet meet you in other Western States. But to return from this digression.

The Western farmers will soon find, if they succeed in destroying the capital invested in the railways, that this will not relieve them. They must realize the truth of their position and acknowledge the fact that they have gone too far West. The farmer of to-day is unlike the farmer of earlier days. He has not his habits of economy and thrift. Many things which are now necessaries to the farmer and his family were unknown to their fathers, or, if known, were considered luxuries. Those who settled the Middle States had the knowledge and ability to feed and clothe their families within themselves, and were, therefore, more independent than the farmer of to-day. Again, we have all been dazzled with the wonderful growth of the West, and, as her cities have arisen in a day, have thought such development could not be without a sound basis to build upon. But as we look closer, we find those cities have grown up and become rich as the home of the middleman between the producer and consumer, the manufacturer and the wearer. These men have fixed the prices of, and speculated on, the productions of the farmer, and have heretofore made large profits on the necessaries of life sold to him. It is, to some extent, reproducing the history of every purely agricultural country in the old world, with cities of great wealth, and surrounding millions of producers in great poverty. To the majority of our people all this may read as an exaggerated statement; but a reference to the books of our merchants will prove the truth of our statements.

We again come to the conclusion heretofore arrived at: that the only hope for the Western farmer is, either to move eastward and let the capital involved in the roads built to the far West be entirely sunk, or to draw the consumer to his side, save the capital expended in the railways, and thereby secure the benefits already stated. The increase of manufacturing in the States of Ohio, Indiana, Illinois, and Missouri shows that the minds of many have appreciated the necessities of their position. They see that their cities must have some surer basis of wealth and growth than acting simply as middlemen, and that the one tends to poverty, the other to wealth.

For the West to think of depending on England as a market for its produce and as a place to purchase its manufactured goods is suicidal, and not much less to depend on the Middle States and the East for the same character of market and the same source of supply. Your committee have felt authorized thus fully to discuss these points, for in them lies much of the future of the roads you are interested in west of Pittsburg. You cannot look forward to much change in their condition while so much of their business is through and low-priced freight, on which they receive but a pro rata of charges between points west and east. Their policy must be to encourage local trade and travel, to offer every inducement for parties to introduce manufacturing and industrial works on their lines, and to let the through business be the surplus products, put into the more concentrated shape of cattle, hogs, &c.

Paradoxical as it may appear, the Pennsylvania Railroad Company will realize more money from its Western investments, and more profit on your main line, when you receive less tonnage, because the products of the farm from those roads, for the tonnage that will be sent eastward will be of higher value, being labor and food in condensed shape, and necessarily bear a higher and more profitable rate of freight.

Your committee, in their visit to the western roads, made diligent inquiry on this point of local trade. Your Northern or Fort Wayne system is profitable, because it has a large and rapidly increasing local business, making exchanges of ore for coal, iron for cattle and grain, &c., &c., and these within the range or limits of its own roads.

For the Southern system so much cannot be said. By competition, the Little Miami Railroad, which until lately was one of the most successful railways in the country, has been reduced to one of the poorest paying of your lines. Owing to some mismanagement, or the rivalry of its northern competitors, it lost the business of the Cleveland, Columbus and Cincinnati Railway, which furnished more than one half its total receipts, and caused that company to build a rival line to Cincinnati via Dayton and Springfield. This loss leaves the rental extravagantly high, and the line is a burden on the Pittsburg, Cincinnati and St. Louis Company. The receipts on this line will gradually increase, as it runs through a rich and thickly settled country, and controls the entrance into Cincinnati on the eastern side of the city.

The Columbus, Chicago and Indiana Central also stands at too high a rental for the character of the road and the country through which it passes. There will be improvement on it, but as it, with its Illinois State Line Branch, passes through an almost purely agricultural country, this improvement in earnings will come slowly, and a large portion of the rental will probably be a charge on the Pittsburg, Cincinnati and St. Louis Company for some years to come.

The Jeffersonville, Madison and Indianapolis road has better prospects, and should soon cease to be a debtor road. The Indianapolis and Vincennes road will continue to be a charge for some years, unless the trade from the Cairo and Fulton road can be secured for it, which is not very probable, and the competition at Cairo of the Illinois Central Railroad would destroy any such probabilities. The Indianapolis and St. Louis road will in time pay—it now clears its interest and has a fair future before it.

The Vandalia Line to St. Louis, as a part of the direct line from New York to St. Louis, will grow rapidly. The new bridge at St. Louis adds greatly to its value; and lastly, the Pittsburg, Cincinnati and St. Louis Railway, a part of the main line to St. Louis, Cincinnati, and the South, with the trade that must be thrown upon it by the many roads that join and intersect it, by the valuable coal traffic that originates on its main line, should be able readily to meet all the interest on its funded debt—with a good prospect for very great improvement in its financial results as a whole.

The second point designated above was to see or to estimate, if possible, the extent of the ultimate responsibility of the Pennsylvania Railroad Company for the engagements of the Pittsburg, Cincinnati and St. Louis Railway Company.

Taking the losses of 1873 as a basis, which amounted to.....	$2,476,143 39
And the General Manager's estimate of value of the betterments as correct, at.....	1,724,395 51
Would leave a balance of.....	$751,747 88

as the real loss on that system of roads.

By the statement of loss on the Southern system of roads, you will note there was an aggregate charge of $540,088 57, being for discount on sale of bonds paid by those roads on account of their floating debt, which would reduce the amount of loss in working those roads to $211,649 31.

Now we do not see how the Pittsburg, Cincinnati and St. Louis line can stand under much more bonded indebtedness than it now has, and we therefore think it safe that you should estimate, as a possible future loss on this line of roads, at least $500,000 a year. This limit may be passed, and yet, with fair success in the administration of your Fort Wayne or Northern system under the Pennsylvania Company, the profits there should square the accounts between the two systems, or leave an unimportant balance on one side or the other.

The trade centres in the West reached by your systems of railway are surely enough, and the responsibilities assumed sufficiently great, to satisfy the most ambitious. You can now stop with safety, and your interests will be best taken care of by carefully nursing these Western investments; limiting their expansion or extension, unless the local demands require it, and hoping for the time when, by some arrangement, it will not be necessary for you to employ so much capital in holding these roads.

It is but just to say, that at the time these contracts were made, the prices for freight were much higher than in 1873. If the same prices had been received in 1873 as existed when they were made, the result would have been much more favorable. It was also fair to presume at the time the contracts were made, that the present low prices were not thought possible, or that managers of railroads would, through mere rivalry, so depreciate their own property.

The same principle that has led your company into unwise investments has drawn prudent men in their private affairs to greater proportionate expansion—the history of trade is full of warning on this point.

2. VALUE OF THE COMPETITIVE PASSENGER TRAVEL AND FREIGHT RECEIVED FROM AND SENT TO THE WESTERN LINES OVER THE PENNSYLVANIA RAILROAD—MAIN LINE.

In former parts of this report, we promised a discussion of this important question. We are led to examine it the more thoroughly from the prominent position which "Western trade and travel" have occupied in the public estimation for so many years.

In the early years of our national existence, the passage of the mountains was accomplished by the turnpike which united the East and West. Philadelphia—at that time the great commercial city of the new nation—commanded the best means of access to the West, and profited accordingly. Soon New York entered upon the construction of her great canal from Albany to Buffalo; and Pennsylvania, not to be outdone, followed with her mixed system of canal and portage railway from Columbia to Pittsburg. Virginia attempted the same on her James River and Kanawha Canal, but failed to complete it. Millions of

dollars were expended in this effort to unite the East and the West.

The introduction of the railway, with the advantage of the speedy locomotive over the weary horse that slowly tugged at the canal boat, soon produced a new competitor; and as the turnpike gave way to the canal as a cheaper medium of transportation, so the canal gave way to the locomotive, in illustration of the adage that "time is money"—and a very large amount of money was expended in the effort to build the New York Central, the New York and Erie, and the Baltimore and Ohio Railroads.

Your line came in at a later period, though completed through to Pittsburg before the Baltimore and Ohio Railroad reached Wheeling. With the completion of these lines began the strong competition for this great prize—"the Western trade and travel," and the parties interested in the New York Central Railroad Company entered into the struggle for the control of the Western lines. The New York and Erie and the Atlantic and Great Western Railroads, after severe struggles, penetrated the West. The Baltimore and Ohio Railroad Company also built her lines to the Ohio, and, besides, made investments north of that river. The Pennsylvania Railroad Company, from the causes heretofore stated, in order to protect itself, was drawn into investments and liabilities heavier than any other line, and being so much involved, felt it to be its true policy to perfect its connections with the great commercial centres of the West, as has been heretofore sketched.

We will now endeavor to ascertain the value to the shareholders of the Pennsylvania Railroad Company of all these efforts.

The traffic that comes East bears the lowest tariff, as is well stated in the last annual report: "A close examination of the accounts of this company will show that its charges for freight upon agricultural products scarcely bear the expenses of transportation, and on many items the charges for transportation are below the actual cost." And the competition of the trunk lines has been so close as to reduce materially the profit of the transportation of the valuable articles which the sale of these products enables the merchants and the farmers to purchase in the East for consumption at home.

Now let us ascertain the value of this trade and travel to the Pennsylvania Railroad Company in 1873. The through tonnage coming from Philadelphia and Baltimore, and destined to points west of Pittsburg, and that sent East from the West through Pittsburg, in the year 1873, amounted to:

Through	Tons.	Yielding.	Mileage.
East.....	873,795	$3,464,690 51	312,362,336
West	319,661	1,111,816 50	114,475,403
	1,193,456	$4,576,607 01	426,887,739

The through freight earnings were. $4,576,507 01
Local freight earnings were..... 15,032,048 06

Total freight earnings $19,608,555 07

The total mileage of tons of freight over the road was..1,384,831,970 miles.
Which is equal to passing over the whole road (three hundred and fifty six miles) of..... .....3,890,000 tons.
The through freight (three hundred and fifty six miles) was..... .....1,193,456 tons.

Leaving the local freight equivalent to..... .....2,696,544 tons.
over the whole line, showing that the through freight was thirty one per cent of the whole average over the road.

The table above shows that the receipts for—

	Cents.
Through freight eastward averaged per ton per mile.....	.0111
Through freight westward averaged per ton per mile.....	.0097
The average through freight earnings would be.....	.0107

If the expenses of conducting transportation in 1873 cost, per ton per mile, .0857 cents, it would be fair to place the cost of the through freight per ton per mile at .0070 cents.

The profit on the through freight would then be On 1,193 456 tons, at .0107—.0070=.0037=$1,588,642 84.

Let us now examine the passenger account.

	First Class.	Emigrant.
Number of passengers delivered to connecting lines in Pittsburg..	79,296	37,445
Received from connecting lines in Pittsburg	79,017	2,110
	158,313	39,555

The average receipt of through passengers per mile was.... .....2.36 cents.
The average expense of carrying through passengers on account of speed, heavy cars, &c., was equal to at least the average cost as given in the expenses for 1873, which was, per mile.....2.01 cents.
Showing profit per passenger per mile of .0035, or three mills and one half.
This, for 158,313 passengers, would give a profit of, at .0035 cents per mile.... .... $197,258 00
The profit on freight carried was... 1,588,642 84

Showing total profit on through passenger and freight traffic.... ....$1,785,900 84

It is curious to note that the through freight and through passengers are very nearly equal to one third the total amount of freight and number of passengers passing over the whole length of your road.

Now the capital employed in your main line in 1873 was $53,360,456 03, and to charge the through business with one-third of this capital would give $17,786,818 68, on which it would show a profit of $1,785,900 84, or a fraction under ten per cent per annum.

This profit is to be considered in connection with the investments of money made, the value of the guarantees given on these western roads, the effect the transportation of this western business has on the cost of the general movement of traffic and passengers on the main line, and the real amount of business the control of these roads gives you.

But whether or not these western roads pay financially to your main line, it is true that the Pennsylvania Railroad was built to bring trade and travel through the State of Pennsylvania to the city of Philadelphia, which it undoubtedly has done, and, if necessary, reasonable sacrifice of some profit should be made for these objects.

INTERESTS SOUTH OF CAIRO.

We cannot omit to mention with regret that a large interest of $1,300,000 is held by the Pennsylvania Company, originally taken by the Pennsylvania Railroad Company, in the line of railroad from opposite Cairo to New Orleans. The principle upon which this investment was made is, in our judgment, indefensible. We are glad to add that recently the company has received large returns from this investment and still controls, for commercial purposes, the whole line of railroad from New Orleans to Cairo without cost.

INTERESTS SOUTH OF BALTIMORE.

This interest is divided into several lines—

1. The Baltimore and Potomac Railroad Company.
2. The Alexandria and Fredericksburg Railroad Company.
3. Southern Security Company.
4. Danville and Atlanta Lines.

The Baltimore and Potomac Railroad extends from Baltimore to Pope's creek, seventy three and one tenth miles, with a branch of nineteen and two tenths miles to Washington, making a single track railway ninety two and three tenths miles long, with a tunnel through part of the city of Baltimore, which is represented by a cost of $9,888,786 (or over $107,000 per mile, including tunnel)—consisting of stock $3,503,900, bonds $4,500,000, and floating debt $1,884 886.

The bonds are guaranteed by the Northern Central and Pennsylvania Railroad Companies, and therefore will always be a safe investment.

The object in constructing this road was threefold: first, to make a southern extension for the Northern Central Railway to the city of Washington; second, a more perfect connection with your New York lines; and, third, to furnish a route for the southern travel from the roads of the Southern Security Company northward and eastward.

The drawback to this whole scheme is that all these three inducements are not enough to make it pay much more than the cost of working it and keeping up and improving the line, as should always be done, without adding to construction account. You must therefore estimate a yearly charge on your profit and loss account of one half the amount of the interest on the bonds of this company.

We regret, with this investment, to add those in the

Alexandria and Fredericksburg Railway stock	$31,600 00
Alexandria and Washington Railway stock	63,724 00
Southern Railway Security Comp'y.	783,734 33
Richmond and Danville Railroad stock,....	600,000 00
Notes of the Richmond and Danville, bonds of the Atlanta Railroad and Richmond and Atlanta Air Line, with collateral of $3,205,691 42..	1,164,997 00
Western Railroad of Alabama stock	60,000 00
Amounting in all to....	$2,704,065 33

which, though charged off to the profit and loss account of 1873, yet reveals an illegitimate direction given to the funds and credit of the Pennsylvania Railroad Company which cannot be approved. The securities above named, with others in the profit and loss account, we have valued at $1,000,000, with not much prospect of improvement. We are glad to add that your company is now in no way liable for any guarantees, leases or otherwise on account of any railroad south of Washington.

☞ The St. Louis Democrat says that the Eastern capitalists, who have recently been in that city looking into the prospects of the Atlantic and Pacific Railroad, "have come to the conclusion that there is very little use in extending the track beyond Vinita until the Government throws open the Indian Nation to general settlement. The best thing which could now be done for St. Louis would be to build a railroad from Pierce City to Austin, Texas, the route to be along the western boundary of Missouri and Arkansas, entering the northeast corner of Texas, and proceeding on an air line to Austin. Such a road would serve not only a large railroadless portion of Missouri and Arkansas, but it would prove a facility for all of the most enterprising portion of the Indian Territory."

☞ The Ohio State Journal says the first mile of track on the Atlantic and Lake Erie Railway was completed on Monday, and a large force of workmen is engaged at New Lexington and southward. The road is to be opened to Moxahala by the 1st of December and finished northward by July 4, 1875.

☞ The first five miles of grading on the Cincinnati Southern Railway, from Emory river toward the Kentucky line, passes through three veins of coal, and the contractor, for shop purposes, uses coal taken out in grading.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.

RAILROAD SHARE LIST, including Mileage, Rolling Stock, Debts, Income, Dividends, &c., &c.

An asterisk (*) occurring in the column headed "Rolling Stock" signifies that the cost thereof is included, in that headed "Railroad." A *dash* (—) across the column signifies "nil," and running *dots* (.....) signify "not ascertained." Land Grant Railroads are printed in "*Italics.*" State-aid Railroads are distinguished by a "1."

American Railroad Journal.

Saturday, October 31, 1874.

Stock Exchange and Money Market.

The Money market shows less animation. The speculative inquiry is much less urgent. From mercantile sources there is also less call for accommodation. The supply of funds has been considerably in excess of the pressing requirements of borrowers. Rates have been ruling easy at 2@3 per cent on call to the leading Street houses, advances having been made quite promptly, on Government Securities as collaterals, at the lower figure, with the best discounts quoted at 5@7 per cent per annum. The comparative dullness at the Stock and Gold Boards has been against the interests of lenders. Advices from London are of an easy movement in the money line, discounts having been quoted at 3⅝@4 per cent, and loans on the public funds at 2 per cent. The last City bank statement shows a general falling off in the averages. The City banks, last week reduced their reserve of legal tender notes $1,866,200, and their deposit item $3,817,900, while cutting down their specie average $1,422,600. They also report a decrease of $401,500 in the loans and discounts, and a decrease of $47,000 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $56,890,828, against $57,016,205, the preceding week; and a coin board of $58,839,289, against $57,441,451, on the previous return. The City bank exchanges, during the week, were $447,768,716, or a daily average of $74,628,119. The customs revenue of the port, during the week, was $1,785,,000. The City banks reported their average of gold last week at $13,585,200, and their greenback average at $58,830,800. Their deposits stood at $226,304,800. The loan item was $281,878,700. The circulation was $25,013,500.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, to $15,839,800.

The aggregate of the outstanding U. S. currency, of all denominations, Oct. 1, was $428,806,425. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is over 350 millions.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 35 millions.

Gold has been less freely dealt in on all accounts. The speculative inquiry has been spiritless. The customs demand has been light. The export drain has been unimportant. The fluctuation in the price has been insignificant. The extremes of the week have been 109⅞@110¼, closing on Wednesday at 110⅛, as against 110⅛ on Wednesday of the preceding week. The specie outflow last week was only $488,059. The imports of specie at this port since Jan. 1, have been $4,635,112, against $12,951,488 same time last year. The customs demand for Gold last week averaged $297,500 a day. Foreign Exchange has been less sought after and quoted easier with Bankers' sixty day bills on London closing on Wednesday at $4 84¼@$4 85; sight bills on London at @4 87½@$4 88⅛ to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $4,743,516.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $4,760,918.

The specie exports, from San Francisco, Jan. 1. to Oct. 15, were $22,589,329, against $19,428,529 same time in 1873.

In view of the weakness in Gold and Foreign Exchange, Government Securities have been quoted a trifle cheaper on moderate offerings and a fair average investment inquiry, mainly on home account.

U. S sixes of 1881 closed on Wednesday of this week at 118⅛@118¾; U. S. Five-Twenties of 1862, 118⅛@118¼; U. S. Five-Twenties of 1864 at 116@116¼; U. S. Five-Twenties of 1865, 116⅞@117⅛; U. S. Five-Twenties of 1865 consolidated, 116⅛@116⅜; U. S. Five-Twenties of 1867, 117⅛@117¾; U. S. Five-Twenties of 1868, 117⅛@117¾; U. S. Ten-forties at 111⅞@112⅛; U. S. Fives of 1881, (Funding Loan) 112⅝@112⅞; Six per cent. currency Sixes from 117⅝@118.

The dealings at the Stock Exchange have been on a comparatively limited scale, with values generally depressed and irregular. The speculative demand has been wholly devoid of spirit. A slow

movement has been reported in State and Railway bonds, generally at easier rates. Railway and miscellaneous share property has been attracting much less attention at lower and unsettled prices.

At the auction sale of Scranton Coal on Wednesday 60,000 tons were disposed of within the slightly advanced range of $5@$6 20 per ton of 2240 lbs.

Moderately active movements have been noted in the line of domestic produce at, however, generally lower prices; Breadstuffs showing most depression, under free offerings of stock. Provisions have been quoted steadier toward the close, under a rather more confident inquiry, chiefly for hog products. Cotton has been fairly active, closing at easier rates. Wool, Hides, Petroleum, and Naval Stores have been moderately sought after. Leather and Tobacco, in good request, and generally held with confidence. Metals have been in moderate demand; Copper steady; Scotch Pig Iron, cheaper, under rather firm offerings; American Pig Iron, essentially unchanged in price. Sales have been reported of 800 tons American, including 500 tons No. 1 Thomas, on p. t. Eglinton Pig Iron quoted from yard at $37@$38; Glengarnock, $39@$40; No. 1 American Pig at $28@$30, No. 2 do. at $27@$29; Forge, $25@$27; English Rails at $48@$50, gold; American Rails at works, $55@$60; Old Rails, $31@$34. Wrought Scrap, $30@$32. Ocean freights, closed weaker as to rates, on a more liberal offering of room; demand for accommodation fair at the current quotations. General merchandise, rather slow of sale.

The following quotations of sales of Railway and other securities are in addition to those given elsewhere in our columns:—

New York.—Morris and Essex 7s, 1871, 97¾; Central of New Jersey 7s, conv., 105; Long Dock bonds, 101¼; Toledo, Peoria and Warsaw 1st mort. E. D., 80; Gt. ☞ Proposals from Contractors are invited until the 10th of November for completing the unfinished work of construction of the Baltimore and Towsontown (Maryland) Passenger Railway, (Steam Narrow Gauge) a large portion of the grading of which has already been done. It is the desire of the Board of Directors that the entire grading shall be done in the course of the fall and the coming winter. For any further information address W. S. Shoemaker, Engineer, St. Clair Hotal, Baltimore.

☞ The New Bedford City Council have voted to submit to the people, on the day of the State election, the question of the city becoming an associate in the New Bedford and Fall River Railroad Company, and subscribing $150,000 to the capital stock when not less than $250,000 shall have been subscribed by responsible parties.

☞ An election for directors of the Camden and Atlantic Railroad company was held in Camden, N. J., on the 22d inst. The total number of votes cast 10,397, all of which were for the old Board. A. K. Hay was unanimously reelected President and D. M. Zimmerman Secretary and Treasurer.

☞ Hon. C. M. Smith of Springfield, Ills., has been elected President, and W. B. Corneau of New York, Secretary and Treasurer, of the Hannibal and Naples Railroad Company.

Improved Portable Cylinder Borer.

For the past twelve years master mechanics, and all parties interested in the repairing of locomotives, have been endeavoring to produce some kind of a machine that will rebore and reface the cylinder, either by power or hand, while the machine is attached to the engine either in the shop or stall. The NEW-YORK STEAM-ENGINE Co. have accomplished this object in a most substantial and perfect manner; their machine is light, strong, easy and rapid in its operation, self-feeding in all its cutting motions, and always ready to receive power or hand motion to the bar.—The machine is so arranged that it can be attached to an engine standing on the track, and is driven or worked either by hand or power. The boring head slides upon a bar four inches in diameter, one end of which is placed in a bushing fastened in a stuffing-box, and the other end runs in a bearing bolted to the cylinder flange. The boring head has three tool-holders, which will receive either boring, facing, or turning cutters, and each or all of the cutters have an automatic and a hand feed; and as a bearing for the boring bar for each end of the cylinder is furnished, if required, it will be readily seen that with this machine a cylinder can be bored and the flanges turned and faced on their edges. These machines will bore a cylinder as small as fifteen inches and as large as twenty inches in diameter, with an extreme traverse of head of thirty-two inches. They are also made of any size and length required for stationary and marine cylinders. Steel wrenches, wrought-iron work case-hardened, and is in every respect complete. Address, New-York Steam-Engine Company, No. 98 Chambers St., N. Y.

The Centennial Buildings.

The work at the centennial grounds in Fairmount Park, Philadelphia, is progressing rapidly, and there now exists no doubt of the completion of the great undertaking by the required time. The massive foundations of the memorial hall are finished, and at least two-thirds of the granite base course is completed. The interior walls of brick are up to the commencement of the second story. The work on the finer granite is rapidly progressing at the quarries, and the stones will be ready for delivery and setting in the early part of next spring. The wide gauge railroad for the steam derrick has now been extended around the building, with a turn stile at each corner, in order to facilitate the quick transit of this ponderous machine to any part of the structure where it will be needed. Nearly all the grading on the plateau of eighteen acres designed for the exhibition pavilion, machinery hall and horticultural conservatory has been finished up to the river road. The work of laying the foundation of the exhibition building has been commenced, and will be rapidly pushed forward.

☞ Track laying on the Cairo and St. Louis narrow gauge railroad was commenced at Cairo, Ills., on the 14th inst. Only about 65 miles of track, between Cairo and Murphysboro, is to be laid, when the road will be completed. The first installment of $50,000 of the $100,000 in bonds subscribed by Union county has been paid over to the company.

☞ A bill has been filed in the Somerset (Md.) County Court to foreclose the mortgage upon the Worcester and Somerset railroad, and also an injunction prayed enjoining certain judgment creditors from levying executions upon their judgments,

Illinois Central Railroad.

Mr. James C. Clarke, the newly appointed manager of this road, recently made a tour of inspection westward with the intention, it is said, of instituting many new improvements with the view to making it a better road than it has ever been, and to put it in a condition to do all the business that can be brought to it. In Iowa, especially, the road bed is to be greatly improved, and the high grades which occur at several places are to be brought down. In this way a great saving of motive power will be effected. The Cedar river branch of the road is to be extended from Mona to Ramsey, in Minnesota, the great object being to tap a portion of the lumber trade of Minnesota and bring lumber from the Minnesota pineries down on the Illinois Central. Rolling stock throughout the whole line, though not run down is to be brought up to the best possible condition, and everything done that can be to increase business facilities and continue the confidence of the public in the company, and in the manner in which its affairs are managed.

☞ Articles of incorporation of the Oregon Central Pacific Railway were filed at Portland, Oregon, on the 18th ult. by B. J. Pengra, B. Goldsmith, W. H. Watkins and E. D. Quickenbush. The proposed line is to extend from Winnemucca to the Columbia River, Goose Lake Valley, Sprauge River Valley, to the middle fork of the Williamette, down to the north side of the river to Springville, Lane County, thence on the west side of the river to Portland, thence to the Columbia River. The capital stock will be $7,500,000, in shares of $100 each.

☞ It is expected that the Newcastle and Franklin (Penn.) Railroad will be completed by the 10th of November.

West Jersey Railroad.

At a recent meeting of the Board of Directors of the West Jersey Railroad, the management and affairs of the road underwent a strict scrutiny and investigation, which has led to a reorganization of the several departments and a reduction of salaries of the officers and employes. Hon. Thomas H. Dudley, Chairman of the Executive Committee of the Board of Directors, will hereafter be the chief executive officer of the road, the Board having clothed him with full authority to perform the duties of President in the absence of that officer. The strictest economy will be observed in all the departments, and all employes not strictly needed will be discharged. Mr. Dudley is one of the largest stockholders in the road, and under his management the railroad will be run in the interest of the stockholders and for the better accommodation of the travelling public and the people of the district through which the road passes.

☞ The contract for the construction of the Jefferson City and Southwestern Railroad has been let to Messrs. Wiley & Co., who are to complete and equip the road from Jefferson City, Mo., southward to the county line. The contractors are to receive $90,000 in town bonds, besides other property.

☞ Mr. J. S. Kennedy of the firm of J. S. Kennedy & Co., New York, has been chosen President of the International and Great Northern railroad company in place of Hon. G. A. Grow, resigned.

☞ The officers of the Des Moines and Minnesota Railroad Company, recently elected, are: President, James Callanan Jr.; Vice-President, J J. Smart; Treasurer, C. H. Getchell; Secretary J. B. Stewart.

Railroad Law.

COMMON CARRIERS.—CONSTRUCTION OF RECEIPT. MEANING OF WORDS "THE ARTICLE FORWARDED." RULE OF DAMAGES.

The interesting case of Wetzell *vs.* Dinsmore, (54 N. Y., 496), has lately been decided by Judge Reynolds of the Commission of Appeals. The facts are clearly stated in the following opinion:

On the 10th of October, 1865, the defendant's company received of Demas Barnes & Co., in New York, for transportation to the plaintiffs at St. Louis, one package, contains three gross or cases of Shallenberger's pills, of the value of $340 50, each gross or case being worth $113 50. The contract under which the transportation was undertaken had this provision, "nor in any event shall the holder hereof demand beyond the sum of fifty dollars, at which the article forwarded is hereby valued, unless otherwise herein expressed, or unless specially insured by them and so specified in this receipt, which insurance shall constitute the limits of the liability of the Adams Express Company." It is not questioned but that this contract was valid and binding on both parties. It appeared that only one of the three cases or boxes of pills reached the plaintiffs. When delivered to the Express Company, the three boxes were severally addressed to the plaintiffs and were wrapped together in a single package by a paper cover likewise addressed to the plaintiffs. It does not appear that the defendant was advised of the contents of the one package received for transportation, save what may be inferred from the receipt itself, that the package contained three cases or boxes of drugs, or how the three cases enclosed were addressed. We are not informed whether the twelve dozen pills in each of the three boxes were again confined in smaller separate parcels, or whether the 144 pills in each box were permitted to lay around loose.

In the court below the plaintiffs recovered upon a construction of the contract that applied the valuation of fifty dollars to each of the three boxes confined in the single package received by the defendant for transportation. "The article" to be forwarded was agreed to be valued at fifty dollars, and consisted of 432 pills, all contained in one package, addressed to the plaintiffs. The interior of this package was subdivided into three boxes, and each of the three boxes was again subdivided into smaller parcels, or the 144 pills were confined only by the box, upon which the address of the plaintiffs was written. A single commodity was the subject of transportation; and it can hardly be said that each individual pill of the 442 in the package was valued at fifty dollars, but this may as well be said as that the contents of each of the three boxes, containing one-third of them, and all inclosed in a single package, was rated at that value. If three bushels of wheat in three separate bags, and all inclosed in one parcel, were delivered for transportation and "the article" to be forwarded valued at fifty dollars, it could not be fairly said that each one of the separate bushels of wheat was "the article" referred to, any more than it could be said that each kernel of wheat was agreed to be of that value. We think "the article" valued at fifty dollars was the single package received, in its entirety, and it seems to have been so adjudged. Wyld *vs.* Pickford, 8 Mees. & Welsb., 443; Bernstien *vs.* Baxendale, 6 Com. B. [N. S.], 251; Henderson *vs.* The London & N. W. R. R. Co. [Law Rep.], 5 Exch., 90; Baxendale *vs.* Great Eastern R. R. Co. [Law Rep.]

☞ The formal opening of the Sherbrooke, Eastern Townships and Kennebec Railway took place at Sherbrooke, Province of Quebec, on the 24th inst. The road is designed to extend from the town of Sherbrooke, to connect at the Chaudiere River with the Levis and Kennebec Railroad, which latter, starting from Quebec, runs southerly to the boundary line connecting at that point with the railway system of Maine, Sherbrooke and Quebec being the termini. All the road is located, and by December 1 forty-five miles, from Sherbrooke to Weldon, will be finished. This is graded for the greater part of the way, the iron is laid for about twenty-six miles, and about eighteen miles are now in active operation. The line will be completed by September of next year, and is expected to cost about $1,900,000. It will shorten the distance from Quebec to Boston thirty-nine miles, and from Quebec to New York fifty-eight miles. A large number of distinguished Canadian and American gentlemen were present.

☞ The representative of European capitalists, holding, it is said, over $200,000,000 of Southern State Securities, recently visited Little Rock, for the purpose of conferring with the State authorities there relative to the settlement of the debt of Arkansas. He proposes to fund the debt, principal and interest, extending the time thirty years for the payment of the principal, and will accept funded bonds bearing 4 or 5 per cent interest, should the Legislature ratify such action by the State authorities. The entire debt of Arkansas is $3,500,000.

☞ A general meeting of the stockholders of the Baltimore and Ohio Railroad company will be held in Baltimore on the 16th of November for the purpose of electing twelve directors for the ensuing year, and also for the purpose of ratifying and perfecting the arrangement to purchase the Baltimore, Washington and Alexandria Branch of the Washington City and Point Lookout Railroad and the conveyance of the same to this Company.

☞ On the 2d of September last acting Commissioner Rogers announced that bank checks, drafts or orders, payable at sight or on demand, drawn by any party, for any amount, upon a bank, banker or trust company, are subject to a stamp tax of two cents. All other papers issued on or since October 1, 1872, are exempt. This decision, of course, carries with it exemption from stamp tax on all checks or drafts payable after date.

☞ Subscription books have been opened at Xenia, Washington and Jamestown for the Dayton and Southeastern narrow gauge railroad, from Xenia to Washington C. H., a distance of thirty miles. It will be put under contract at an early day.

☞ The contract for the construction of the Chicago and South Atlantic railway between Dyer, Ind., and Englewood has been awarded to Gurches & Co., who will commence operations at once.

Peoria, Atlanta and Decatur R. R.

We understand that the gap in the Peoria, Atlanta and Decatur railroad, between this city and Atlanta, will be nearly completed to day. The force of men at work upon it have been laying about half a mile of track per day toward Peoria, and they are expected to reach the bridge, which is already completed over the Macinaw Creek this evening. Only about a mile and a half of track remains to be laid, and we shall have a continuous track from this city to Atlanta. When completed trains will commence running immediately, leaving this city in the afternoon, running to Atlanta, remaining over night and returning in the morning. A large force of men are at work upon the line of the road, between Atlanta and Maroa, which it is expected will be finished by December.—*Peoria Transcript, Oct.* 10.

☞ At the regular annual meeting of the stockholders of the Cincinnati, Sandusky and Cleveland Railroad Company, held at Sandusky, Ohio, on the 21st inst., the following gentlemen were elected directors: J. S. Farlow, Isaac D. Farnsworth and J. Atkinson of Boston, J. G. Deshler of Columbus, and G. J. Anderson of Sandusky. The following hold over: N. W. Pierce of Boston, Wm. Wilshire of Cincinnati, J. H. Thomas of Springfield, and J. D. Chamberlin of Sandusky. At a meeting of the Board of Directors the following officers were elected: J. S. Farlow President, Wm. Wilshire Vice President, and J. L. Moore Secretary and Treasurer.

☞ The Philadelphia *Ledger* reports the total authracite coal tonnage for the week ending October 17, at 490,932 tons, and for the coal year 14,886,257 tons, against 16,141,000 tons to corresponding time last year, being a decrease of 1,254,743 tons. The bituminous tonnage for the week is 76,584 tons, and for the year 2,667,267 tons, against 2,621,259 tons to same time last year, giving a total of all kinds for the week of 567,466 tons, and for the year of 17,553,524 tons, against 18,768,259 tons to same time last year, being a decrease of 1,214,735 tons.

☞ The contract for the construction of the New Railroad and Wagon Bridge over the Mississippi river at Clinton, Ia., has been let to Messrs. Wells, French & Co., bridge builders of Chicago, Ills.

☞ The bondholders of the Chicago, Dubuque and Minnesota and Chicago, Clinton and Dubuque railroads have voted unanimously to accept a proposition submitted by the two companies for funding the coupons.

☞ The Buffalo Valley Railroad, 9 miles in length, extending from Garrett's (a point on the Pittsburg, Washington and Baltimore Railroad, about 99 miles from Pittsburg) to Berlin, was formally opened on the 21st inst.

Notice to Bridge Builders.

SEALED PROPOSALS will be received at the Commissioners' Office, in Pottsville, (Penn.) until Saturday, November 7th, 1874, for erecting an iron bridge over the Schuylkill at Port Carbon. The bridge will be fifty-two feet span and sixteen feet in the clear. The masonry will be given out by the perch. Plans and specifications may be seen at the office of the Commissioners.

By order of the Commissioners.

VALENTINE BENNER,
MOSES HINE,
PATRICK CONERY.

Attest: O. J. AREGOOD, Clerk.

American Railroad Journal.

New York, Saturday, November 7, 1874.

The California Grangers and their Wheat.

The policy adopted by the California farmers of hoarding their wheat, has not been very successful, and it is not likely that they will be persuaded, another season, to attempt to regulate the market. Besides what they are likely to lose in the cost of storage, interest, etc., the failure of Morgan & Sons has involved them in a direct loss of $200,000. The *California Farmer*, published at San Francisco, presents the following gloomy view of the situation:

Wheat comes to market more freely from necessity. The rainy season has been commenced in good earnest, and the vast amount of grain now in the field must be cared for there. The market is sought, although wheat sells at lower rates than for several years past. There are at the present time nearly fifty ships on the berth for cargoes, and half as many now disengaged. How unfortunate it is for our grain growers, for our business men, and for our State, that all these ships could not be immediately loaded and the grain sent abroad, and the value of this wheat come into circulation for the good of all the interests we have named. How much better it would have been for our grain growers to have sold their wheat, receiving its full value, from $1 65 at early season to $1 50 later, than to have shipped on their own account, and to receive $1 advance; for, as sure as the earth turns round, so sure is it that the great majority will never realize anything beyond the first advance, and many will be called upon for reclamations. This is an unfavorable prospect, but a certain one, and they should prepare for it. The loss to our Grangers will approximate to $3,500,000 already, besides the grain now in store which should have been sold will be $5,000,000 to $8,000,000 more of capital kept out of use.

"Raising" Numbers.

With a view to prevent frauds in the alteration of the number of shares represented in certificates of stock, which alteration is known under the technical name of "raising," the Pennsylvania Railroad Company have just adopted a new system regulating the issue of certificates of its stock, to take effect on and after November 16, 1874. The main features of this new system are:

1. All certificates shall have the number of shares thereby represented engraved in letter form in the body of the certificate and the corresponding numeral in figures engraved in the upper right hand corner.

2. That a separate certificate shall be issued for each amount of shares from one to ten shares inclusive, and for each multiple of ten shares up to and including one hundred shares.

3. That no single certificate shall be issued for an amount exceeding one hundred shares.

4. That the said certificates to be issued shall be numbered commencing with number one and then be numbered consecutively.

Thus, for instance, a purchaser of seven shares would receive one certificate; for seventy-seven shares he would receive one certificate for seventy shares and one certificate for seven shares; for one hundred and seventy-seven shares he would receive three certificates, one for one hundred, one for seventy and one for seven shares. The officers of the company think this plan, if carefully observed, will effectually stop the raising of certificates of stock hereafter, and, indeed it has every appearance of that result. The company has nineteen different certificates that it uses, viz., from 1 to 10, and 20, 30, 40, 50, and so on to 100. The ink used in the engraving of the number of shares of each certificate cannot be removed with any known acid.

Redemption of Five-Twenty Bonds.

The Secretary of the Treasury, in the thirteenth call for the redemption of five-twenty bonds of 1862, says:

"I hereby give notice that the principal and accrued interest of the bonds hereinbefore designated, known as five-twenty bonds, will be paid at the Treasury of the United States, in the city of Washington, on and after the 2d day of February, 1875, and that the interest on said bonds will cease on that day. That is to say, coupon bonds known as the fourth series, act of February 25, 1862, dated May 1, 1862, as follows:—Coupon bonds, $50, No. 4,201 to No. 4,961, both inclusive; $100, No. 6,201 to No. 10,500, both inclusive; $500, No. 5,001 to No. 7,000, both inclusive; $1,000, No. 14 901 to No. 20,000, both inclusive. Total, $5,000,000. The amount outstanding (embraced in the numbers as above) is $5,000,000 of coupon bonds."

This, together with previous calls, reaches a total of $55,000,000 called for redemption since August 1st, 1874, being the amount of 5 per cent bonds of the loan of July 14, 1870, and January 20, 1871, absolutely subscribed for under the proposals of July, 1874. The parties who contracted for the $45,000,000 of the above named amount have the option of the balance of the 5 per cent loan until January 31, 1875.

Car Brakes.

A series of experiments were recently made by the Baltimore and Ohio Railroad Company to test an improvement made by Mr. Loughridge in car brakes. The object was to determine in what time and distance a single car could be stopped at high speed in comparison with the old system when the hand brakes are used, which was determined by drawing the coupling pin and separating two cars from the train. The results were that when the pin was pulled and the brakeman signaled to apply the brakes the car with the new system was stopped when running at a speed of forty eight miles an hour within a distance of 550 feet, and within 13½ seconds' time, whilst with the other car it required 1,255 feet distance. Several stops were made which showed great power and a remarkable uniformity of action in the new brake. Mr. Loughridge claims this as the shortest distance in which a car has ever been stopped with hand power, as some two hundred feet were required to fully apply the power with a brake-

man, and that with this improvement the effectiveness of the air brake will be proportionately increased.

Lima and Pisco Railway.

The contract for the construction of the Lima and Pisco Railway, Peru, 145 miles long, tapping the rich and productive valleys and sugar plantations between Surco Choirelles, Lurin, Mala, Conyalla, Canese, Chincha Alla, and Chincha Maja, and connecting the important towns of Lima and Pisco, with the now flourishing shipping ports of Callao and Pisco, on the Peruvian coast, has been taken by Mr. Robert Walker, contractor and engineer, of 4, Westminster-chambers, Victoria-street, Westminster, S. W., the Peruvian Government having granted a concession giving the land, and guaranteeing £1,040,000 towards the work, which will be proceeded with forthwith, and the railway will be completed in three years.—*Herapath, Oct.* 17.

Grand Trunk Railway of Canada.

REPORT OF THE DIRECTORS FOR THE HALF YEAR ENDING JUNE 30, 1874.

The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines, have been.....		£1,008,561
Deduct—		
Working expenses, including renewals (being at the rate of 77.54 per cent, against 80.30 for the corresponding half of last year).....		782,002
Which leaves an available balance earned in the half year of.....		£226,559
Deduct loss on American currency....		9,019
Leaving a sum of		£217,540

To which has to be added the balance from the net revenue account of last half year of £241, making a total of £217,781; from this, however, has to be deducted the postal and military revenue due for the half year to the postal bondholders, £16,209, which leaves £201,572 applicable for the following payments, viz:

Interest on hired cars		£10,007
Interest, &c., paid on lands.....	£1,915	
Interest on mortgage to Bank of Upper Canada	4,424	
Interest on temporary loans, bankers' balances, promissory notes, European exchange, &c.....	1,028	
Interest on British American Land Company's debentures	617	
Interest on Montreal Seminary debentures	616	
Interest on Island Pond debentures	2,700	
Half yearly instalment on Portland sinking fund.....	2,568	
		13,868
Atlantic and St. Lawrence lease (in full)	£48,621	
Detroit line lease (in full).....	11,250	
Montreal and Champlain bond interest	12,081	
Buffalo and Lake Huron rent...	32,500	
		104,458
1st equipment bond interest.....		15,000
2d " " " "		15,000
Making the balance available for divid'd.		43,244
		£201,572

The balance available for dividend for the half year thus amounted to £43,244 1s. 4d., out of which the Directors paid on the 1st September last a dividend on the First Preference Stock for the half year ending 30th June at the rate of £2 10s. per cent per annum, absorbing £40,226 17s. 6d., and leaving a balance of £3,017 3s. 10d.

Comparing this half year with the corresponding period of 1873, the gross receipts show an increase of £109,860, or 12.22 per cent. The increase in the passenger receipts was £19,291, or 6.59 per cent.; and in the freight receipts, £83,703, or 13.60 per cent. The total number of passengers carried was 903,425 against 701,741; and the quantity of freight was 908,750 against 772,572 tons. The average receipt per passenger was 6s. 1d. against 6s. 9d., and per ton of freight 15s. 7¼d. against 15s. 7¼d.

The following is the usual comparative statement:

Half year.	Nos.	Average per Passenger. s.	d.	Freight Tons.	Average per ton. s.	d.
1874, June..	903,425	6	1	908,750	15	1¼
1873, Dec..	1,073,204	6	4	836,012	16	8
" June.	761,741	6	9	772,572	15	7¼
1872, Dec..	984,625	6	6	797,935	15	4
" June.	733,748	6	5	737,361	16	3
1871, Dec..	961,482	6	1	789,231	15	5
" June.	764,376	6	0	666,092	15	5
1870, Dec..	937,879	5	11	691,801	14	0
" June.	700,384	6	5	612,959	14	6
1869, Dec..	892,697	6	3	611,809	15	7

" June.	619,298	6	8	505,987	16	1
1867, Dec..	794,213	6	10	527,227	15	4
" June.	623,227	6	8	489,647	15	1
1866, Dec..	792,487	7	2	526,655	15	5
" June.	638,708	7	0	497,292	15	4
1865, Dec..	784,346	7	2	523,830	15	5
" June.	596,571	6	3	477,837	16	11
1864, Dec..	722,446	6	6	443,930	16	1
" June.	523,284	6	0	430,034	16	3
1863, Dec..	529,783	6	5	372,984	15	1
" June.	395,066	6	0	339,484	17	3

The expenses for the half year amounted, including renewals as charged in the ordinary revenue account, to £782,002, or 77.54 per cent of the gross receipts; as against £721,649, or 80.30 per cent, for the corresponding six months of 1873. Excluding the renewals, the ordinary working expenses were 72.78 per cent against 73.21 per cent. There was an increase of expenditure for the half year of £60,353, or 8.36 per cent, against an increase, as above stated, of £109,960, or 12.22 per cent in the receipts. The principal increase in the expenditure was in the cost of fuel, and this was in consequence, partly of the greater quantity used, and partly of the higher price of fuel in 1874 than in 1873. The expenses in the traffic department have also been considerably increased, owing to extra labor necessarily required for the increased traffic, and in some degree to the break of gauge (which now no longer exists) at Montreal. There has further been charged for the first time against working expenses the amount (£10,000) payable to the International Bridge Company for the half year.

The total train miles ran were 3,759,869, against 3,292,746, showing an increase of 467,123 train miles; but the cost per train mile in the locomotive department was 37.03 cents, against 38.11 cents showing a decrease of 1.08 cents per train mile. The increase in the item of fuel was £27,964.

The car mileage was 56,728,602, against 41,940,654, showing an increase of 14,787,948; but the cost per car mile was 2.45 cents, against 2.99 cents, showing a decrease of .54 of a cent per car mile.

The amount charged to capital account for the half year is £166,990, the details of which are given in the accounts. This amount includes £87,328 charged in respect of steel rails and renewal of bridges for the half year.

The receipts in American currency during the half year amounted to $3,629,852, against $2,974,856, of which $496,682 was converted into gold, against $551,800; entailing a loss of £9,019, against £9,903 for the corresponding period of 1873.

The gauge of the line for 393 miles from Montreal to Portland and Quebec, and 118 miles from Chaudiere Junction to Riviere Du Loup, was successfully changed, the former on the 26th and the latter on the 28th October, and the gauge of the Arthabaska branch, 35 miles long, on which broad gauge rolling stock was temporarily stored, will shortly also be changed. The whole undertaking of the Grand Trunk will then be on an uniform standard gauge of 4 feet 8½ inches.

The Grand Trunk Debenture Stock Act, 1874, a copy of which has been sent to each registered Proprietor, was submitted to a special general meeting of the company on the 9th July last, and unanimously accepted.

The President is in Canada, and he will be unable to return in time for the half yearly meeting on the 29th October; it will therefore be proposed, after the transaction of the ordinary business, to adjourn until the 17th December, when the President will communicate to the Proprietors the result of his visit.

H. W. TYLER, Vice-President.

Rockford, Rock Island and St. Louis R. R.

The managers of this road have recently issued a report covering a period of twenty two months, from July 1, 1872, to April 30, 1874, from which we learn that the earnings during that time were:

From passengers.....		$427,250 01
" freight		1,166,965 64
" mail		44,656 50
" express.....		41,227 14
" miscellaneous.....		16,024 78
Total.....		$1,696,124 07
And the expenses were:		
Operating road.....$1,118,852 18		
Taxes.....	60,685 78	
Interest and insurance	18,114 98	
Track rent, Indianapolis & St. Louis leased	69,483 56	
Do. Rock Island and Peoria, do.....	59,333 26	
		1,326,420 71
Net profits.....		$369,703 36
Payment of coupons Nos. 9 and 10 and interest due August 1, 1873, on certificates of indebtedness, including premium, &c.....		379,144 41
Payment of No. 5 and previous coupons, including premium.....		2,621 66
Total.....		$381,766 07
Payments in excess of net profits...		$12,062 71

The receipts and payments during the period under review, also the excess of liabilities at the commencement and close of the same, are shown in the annexed statement:

Balance, June 30, 1872, (being excess of liabilities).....	$290,540 85
Interest payments, as above.....	381,766 07
Old construction account increased..	42,723 02
New construction account increased..	59,703 54
Materials on hand increased.....	1,897 84
	$776,630 32
Net profits, as above.....	$369,703 36
Received from sale of securities.....	27,400 00
Balance (being excess of liabilities) April 30, 1874	379,527 46
	$776,630 32

Telegraph Lines.

The Western Union Telegraph Company has extended its lines from Greenfield (Mass.) to Turner's Fall's, where it has established an office in the Farren House. This office will prove a great accommodation to the Falls manufacturers, who have heretofore been obliged to rely on the Greenfield office.

The extension of the Franklin Telegraph Company to Straw's Point, N. H., where it will be connected with the new transatlantic cable, has been completed. The new line is equipped with Brook's insulators, and is a fine specimen of workmanship.

Western Maryland Railroad.

The gross earnings of this road for the year ending September 30, 1874, were:

From passengers	$131,028 04
" freight and express	125,047 72
" milk and marketing	14,333 02
" mails	6,867 50
" miscellaneous sources	1,015 96
Total	$277,792 24
Operating expenses	194,442 38
Balance	$83,349 86

The increase of revenue over 1873 has been $59,407; operating the road has not exceeded 70 per cent. of the gross revenue. The average earnings have been $3,086 per mile, and the increase over 1873 has been 27.2 per cent., due in great part to passenger business during the summer months. During 1874 the number of passengers moved was 255,392; in 1873 there were 149,603 passengers, making an increase of 105,789, or 70 per cent. and in receipts $32,149. Under a recent arrangement with the Baltimore and Potomac Company for "trackage" through their tunnel, it is believed a moderately remunerative coal business can be done with Canton, but preparatory to its inauguration it will be necessary to procure additional and more suitable equipment. The disposition of the Potomac road being shown to co-operate in through arrangements, the proposed line, 8½ miles, connecting the Western Maryland and the Union roads, via Woodberry, through the depression west of Druid Hill Park and along the east side of Jones' Falls to Union Junction, was abandoned after full reconnoisance had been made. The President thinks that the large increase in the revenue of the company warrants the belief that at an early day the current interest on the first and second mortgage bonds can be met with the surplus earnings of the road. In regard to further extension, the report says:

"It is not the policy of your directors to rest satisfied with a road to Williamsport; but in view of the great importance to yourselves and the city of Baltimore, steps will be taken as early as practicable to secure two important extensions or branches, which, if successful, will make the Western Maryland one of the important roads of the country, and will be the means of largely promoting the growth and trade of the city by bringing to it business entirely new, enabling it to recover that which it has temporarily lost, and securing it in much that it now possesses, by warding off or neutralizing the encroachments of her rivals.

East Broad Top R. R.

The East Broad Top Railroad, which has just been opened for business, extends from the Trough Creek coal district, on the eastern side of the Broad Top region, to the Pennsylvania Railroad at Mount Union, a distance of thirty miles. It passes through a country abounding in iron ore, both fossil and hematite, lying around the southern end of Jack's Mountain, and in the Aughwick Valley, between Jack's and Black Log Mountains. The coal lands developed by this railroad belong almost entirely to the Rockhill Iron and Coal Company, and are capable of producing several hundred thousand tons per annum. The Rockhill Company also own extensive ore rights and leases, including nine miles of the Fossil Vein on Black Log Mountain, and have nearly completed, at Orbisonia, on the line of the East Broad Top Railroad, two blast furnaces. The business of the road from these sources will, it is expected, prove amply remunerative to its enterprising projectors.

Chester Creek R. R.

This is a short road, 7¼ miles along, connecting the Philadelphia, Wilmington and Baltimore Railroad at Lamokin with the Philadelphia and Baltimore Central Railroad near Leuni. The capital stock is $185,000, par $50, full paid. The mortgage debt is $185,000, at 6 per cent, and matures January 2, 1903. The road is leased to the Philadelphia and Baltimore Central, which guarantees interest on bonds and stock. The Philadelphia, Wilmington and Baltimore Railroad agree to make up any deficiency of interest on bonds or dividend on stock not met by the Philadelphia and Baltimore Central Company. The dividend periods are January and July 1, free of tax.

Erie Railway.

REPORT OF THE ACCOUNTANTS.

To the Executive Committee of the London Banking Association:

Gentlemen,—We have the honor to submit the following report of the results of the investigation, which, in pursuance of your letter of instructions to us, dated the 29th of April last, we have made at New York, of the books and accounts of the Erie since its reorganization under its then existing board. The existence of that board dates from the 11th March 1872, and the appointment of Mr. Peter H. Watson to be president from the 9th July 1872.

Our investigation has been directed to the special object stated in your instructions to us—namely. "To inform the English bond and share holders whether the accounts published by the company are correct and have been properly kept since the present administration entered upon the management, and whether the expenses which, according to sound principles of railway management, are chargeable against the earnings have been so debited, and not carried to construction or capital account, and whether the dividends have been properly earned."

The period embraced by our investigation is that from 30th September 1871, the date of the last accounts published by the Jay Gould administration, to 31st March 1874, that being the date up to which we found the books of the company written up and balanced, and containing important matter having reference to the period comprised by the published accounts, the last of which were to 30th September 1873.

The following are the accounts published by the company since the appointment of the new board of directors, on 11th March 1872, viz:—

1. The accounts for the period of nine months, from 30th September 1871 to 30th June 1872.

2. The statutory accounts for the year ending 30th September 1872, as required by law and sworn to as approximately correct by H. D. V. Pratt, superintendent, and S. H. Dunan, auditor.

3. The accounts for the period of nine months, from 30th September 1872 to 30th June 1873.

4. The statutory accounts for the year ending 30th September 1873, the same being sworn to as correct by S. H. Dunan, general auditor, and J. C. Clarke, acting superintendent.

The accounts (No. 1 and No. 2) include the transactions of the interval between the date of the last accounts published by J. Gould administration and the appointment of the new board—i. e., from 30th September 1871 to the 11th March 1872.

The statutory accounts (No. 2 and No. 4) comprise together a period of two years, and the other published accounts (No. 1 and No. 3) a period of eighteen months, such eighteen months being included in, and forming part of, the two years of the statutory accounts.

We have ascertained the foregoing accounts to be incorrect, and we now proceed to describe the inaccuracies disclosed by our investigation, and to show the effect of their correction on the profit and loss account and balance-sheet of the company, as on 30th September 1873.

No. 1. These accounts which accompanied the report to the shareholders, dated 9th July 1872, signed by John A. Dix as president, were, as stated in such report, made up partly of estimated results, and their subject-matter being comprised in the statutory accounts for the year ending Sept. 30, 1872 (No. 2), we offer no further remarks upon them.

No. 2. The accounts No. 2 include a profit and loss account for the fiscal year, ending 30th September 1872, exhibiting a credit balance of $2,816,768

Which is composed as follows:—

By balance of account, 30th Sept. 1871		$1,688,507
By net earnings for the twelve months	$5,644,464	
Less interest, rents, and other deductions	3,913,621	1,730,843
		$3,414,351
Deduct dividends, No. 11 and No. 12, on preferred stock to 30th June 1872		597,583
		$2,816,768

Our examination of this statement results in showing that, instead of a credit balance of $1,683,508 existing on 30th September 1871, there was in fact a deficit of $456,444, and as to the alleged profit of the year, stated at $1,730,843, that it did not in point of fact exceed the sum of $1,021,347; the difference of error as to the balance of 30th September 1871 being .. $2,139,952

And as to the profit of the year 709,498

$2,849,449

Leaving the balance at the debit of the profit and loss account on 30th September 1872 at the sum of 32,681

Instead of a credit balance of $2,816,768

exclusive of any loss that may arise on the realisation of the book debts and securities which then were and may be still outstanding. A comparative profit and loss account to 30th September 1872 is given in the appendix marked A, showing in juxtaposition, the figures of the published accounts and of the corrected accounts.

No. 3. The accounts No. 3 were issued with the semi annual report of President Watson to the shareholders, dated 24 September 1873, and were for the period of nine months, ending 30th June 1873. Their subject-matter is comprised in the statutory accounts (No. 4) for the year ending 30th September 1873. These accounts comprise a profit and loss account, to the credit of which, as on 30th September 1872, is brought forward the balance of $2,816,768 reported on under No. 2. We find that from this profit and loss account are omitted certain items proper to it, and which are included in the succeeding statutory accounts; the effect of such omission being to overstate the apparent profit of the period to the extent of $549,194. The particulars of this sum are set out in the statement marked B in the appendix.

No. 4. The statutory accounts (No. 4) accompany a report made to the bond and share holders by President Watson, dated London, 4th February 1874. These accounts include a statement designated "Earnings and cash receipts and payments," which is in effect a profit and loss account for the year ending 30th September 1873; but in which the nominal credit balance of $2,816,768 shown by the preceding statutory account (No. 2) is not brought forward. This statement exhibits a "surplus for the year" of $368,884

After payment of proportion of dividends on stock chargeable to the present fiscal year, ... 1,569,437

Showing the profit of the year to have been $1,938,321

a result which agrees with the profit and loss account as for the year in the company's ledger.

There are, however, corrections applicable to these accounts amounting to $1,494,449, which reduce the apparent profit of $1,938 321 to $443,-872. A comparative profit and loss account for the year 1872 3, marked C, is set out in the appendix, showing in juxtaposition the figures of the pub lished and of the corrected account.

It appears that the total amount available for dividend during the two years ending 30th September 1873 was $1,008,775, instead of $5,352,-673, the amount appearing in the published accounts of the company, the difference being $4, 343,898 ; the details of such difference are set forth in the statement marked D in the appendix ; the corrections affect both sides of the profit and loss account, thus :—

Corrections to the debit	$5,221,176
Corrections to the credit	877,278
Balance of corrections	$4,343,898

This amount of ascertained error is liable to be increased in respect of the following matters, which cannot be at present determined :—

1. The sum of $400,000 is charged by Messrs. Bischoffsheim and Goldschmidt, under date of 19th October 1872, against the company, as for "special" expenses paid in connection with the removal of the board of directors, under the presidency of Mr. Jay Gould : this charge, we understand, is not admitted by the company, but, should it be successfully maintained, we are of opinion that it will constitute a further debit to the profit and loss account.

2. Certain items at present standing charged to capital, but questionably so, to the extent of about $160,000.

3. The loss incurred in the issues of consoli dated and convertible bonds, amounting on 30th September 1873 to $1,214,901 : the whole of this sum we consider to be properly a charge against earnings, but to be spread over the period of the currency of the bonds, and charged periodically to profit and loss in such proportions as would exhaust the entire amount at the due date of the bonds.

4. Any liability which might arise in respect of bonds of the Boston, Hartford, and Erie beyond the special guarantee given by the Erie in respect of $1,900,000 bonds dealt with by the company.

5. The extent (if any) to which the profit and loss account of the period under investigation may have been short charged in respect of deteriora tion of permanent way and rolling stock : from the absence of the necessary returns we are unable to express any opinion on this point.

We propose now to make some explanatory re marks on certain of the more important errors disclosed by our investigation and included in the preceding statement : they are as follows :—

Debit Items.

A. Atlantic and Great Western profit and loss account	$1,665,288
B. Boston, Hartford, and Erie guaranteed interest account	605,810
C. Messrs. Bischoffsheim and Goldschmidt's account of interest and charges	254,049
D. Surplus stock, result of inventory taken 31st December 1872	602,196
E. Reparation of roadway and building account	508,101
F. Reparation of motive power and cars account (rolling stock)	404,304

Credit Items.

G. Coupons on consolidated bonds, due September 1872 and March 1873	130,118
Coupons on convertible bonds, due March 1873	162,816
H. Over-charges to road department	170,000

Remarks on Item A (Atlantic and Great Western)—Amounting to $1,665,288.

This sum represents the loss incurred by the company in connection with the working of the Atlantic and Great Western, and consists of loss which to the extent of $1,081 251 had been ascer tained and shown by the books to have existed up to 30th September 1871, and which had been set forth and treated as loss in the several statutory accounts for the years 1869 70 : and 1870-71 notwithstanding these facts, the item, increased to $1,256,645, has been suffered to remain on the books as an asset, and was included in the statement of assets published by President Watson with his report dated 24 September 1873, accompanying the accounts to 30th June 1873.

Remarks on Item B (Boston, Hartford and Erie)—Amounting to $605,810.

In virtue of special guarantees given by the Erie, interest had been paid on bonds of the Boston, Hartford and Erie to 30th June 1873, amounting to	$572,560
And three months' further interest thereon and accrued due to 30th September 1873, amounting to	33,250
Together	$605,810

The company has ceased to exist, while the liability of the Erie to future annual payments of $138,000 still subsists. The circumstances in which the Boston, Hartford, and Erie had been placed for years were such as to render any recovery from it improbable, and the payments made should not have been treated as assets, but charged off from time to time to the debit of profit and loss. The true character of these payments appears to have been appreciated by the Erie under the Jay Gould administration, for we find that, so far back as September 1870 the payments made to that date, amounting to $130,240, were transferred to the debit of profit and loss, which sum was, however, retran ferred, through the medium of an account called the "Profit and Loss Adjustment Account," to the credit of profit and loss, under date of September 1873.

Remarks on Item C (Messrs. Bischoffsheim and Goldschmidt's Account)—Amounting to $254,049.

Various charges for interest on loans, commissions, and certain expenses incurred in London made by the above firm in their capacity of agents have not been entered in the company's books, and have consequently not been debited as they should have been to profit and loss account, although they duly appear in the several accounts current rendered by that firm from time to time to the company. The total of the items so omitted from profit and loss is $254 049.

Remarks on Item D (Surplus Stock) Amounting to $602,196.

In pursuance of instructions (for copy of which *vide* Appendix E) issued by President Watson to the "officers of the departments of transportation, road, and rolling stock," dated 14th December 1872, an inventory was taken of all tools and materials on hand on 31st December 1872.

These instructions pointed out that the inventory of the transportation department, for example, was to embrace *inter alia* all tools, office equipments, stationery at stations and offices—all materials and tools on trains and engines—wood, sawed and unsawed—coal, anthracite and bituminous—oil, waste, tallow, and all other materials and tools held for use or in hand, old or new, and from whatever source received—all materials and tools not available or unsuitable for use as far as known. Like directions are given in reference to the inventories of the road department and the rolling stock department.

These instructions involved the adoption of a different method of arriving at the amount of available materials on hand from that which had previously prevailed ; the former method was to consider all tools and materials issued for any specific use as consumed, and consequently as forming direct and final charges against revenue or capital, as the case might be, at the time of issue, and, therefore, not proper to be included in any subsequent inventory of available materials on hand. For instance, a considerable part of the property coming under the description of "office equipments at stations and offices" would consist of furniture and fittings forming part of the assets taken over from the New York and Erie, on its absorption by the Erie in 1861, and the amount of which had been properly treated as part of the original capital expenditure of the Erie. Other items of property similarly circumstanced and spread over the lines, works, and stations, would also, under the instructions, be included in the inventory. The practical effect of compliance with the instructions was, therefore, to bring back into the stock account a vast quantity of miscellaneous property, which had been previously treated in the accounts as consumed for both capital and revenue purposes, thereby creating an apparent surplus of available materials in excess of the balances shown by the several ledger accounts purporting to represent the value of the stocks of materials on hand.

Remarks on Item E (Reparation of Roadway and Buildings)—Amounting to $508,101.

The profit and loss account for the six months ending 30th June 1873 was relieved from expenditure under this head to the extent of $719,600, on the ground that the actual expenditure of the period was in excess of the amount properly due to the traffic of the period by that amount. This amount was accordingly credited to profit and loss, and debited to an exceptional account called "reparation of roadway and buildings ;" but this account was subsequently credited with the estimated difference in value between steel rails laid to replace old iron rails during the nine months ending 30th June 1873, amounting to $211,498, whereby the original debit to the reparation account was reduced to a balance of $508,101, at which figure it still stands in the books as an open balance, not charged off to either capital or revenue.

On this state of things we remark that, assuming the expenses of the six months to 30th June 1873 to have been rendered larger than would have been necessary had the roads and buildings been kept in proper repair in former periods, the circumstance would afford no justification for transferring the excess to an inoperative account, such as the so called reparation account. As a matter of fact, the expense had been incurred and remained a charge on the revenue of the company, and the utmost use that could legitimately be made of the comparis n of it with that of former periods was to account for and explain the excessive amount of expenditure incurred during the period ending 30th June 1873.

Remarks on Item F (Reparation of Rolling Stock) Amounting to $404,304.

The process by which profit and loss has been relieved of the charge of $404,304 is exactly similar to that adopted in reference to the last item, the amount being transferred from the account of expenses rolling stock department to an account designated "Reparation of Motive Power and Cars," and allowed to remain at the debit of such account as an open balance. The remarks made on the preceding item are equally applicable to this.

In respect of both these items, the comparison instituted with former periods is fallacious ; inasmuch as the expenditure during the period taken as the basis of the comparison is admitted by the official reports to have been insufficient to cover the deterioration due to the traffic of that period.

Remarks on Item G—Amounting to $292,934.

Coupons due in September 1872 and March 1873 on consolidated bonds. Coupons due in March 1873 on convertible bonds.

The full amount of the coupons due at the above quoted dates is in the books of the company charged direct to the debit of profit and loss ; but, being the first coupons payable on the bonds of those issues, their amount is in excess of the interest that would accrue on the periodical instalments paid to the company on account of the principal of the bonds, and constitute *pro tanto* an addition to the discount at which the bonds were issued, and ought to be distinguished accordingly. This we have done, and find that the amount of such coupons is in excess of interest to the extent of $292,934, which sum we transfer from the

debit of profit and loss to that of an account to represent loss on the issues of bonds.

REMARKS ON ITEM H—AMOUNTING TO $170,000.

This item arises in connection with the expenses of the road department for the months of October, November, and December 1872; the amount of such expenses for that period was based, not upon the data presented by the ordinary current accounts kept for recording them, but upon returns made by the outdoor officers of the department.

The ledger accounts showed the following amounts as the expenses incurred during the three months ending 31st December 1872, viz:

Wages and vouchers	$563,245
Materials purchased	126,163
Materials from other sources	152,495
	$841,904
Less amounts charged to other departments and to construction	222,941
Amount to debit of expenses of road department	$618,962
The amount derived from the returns was	1,014,503
Excess over amount charged in the books	$395,541

This excess was taken to represent the value of materials issued from the company's engineering stores during those three months, and was dealt with accordingly in the books, by means of an entry under date of 31st December 1872 for the total sum of $395,541 as for materials issued and consumed.

We have endeavored to arrive at the correct amount of the materials issued during those three months; but, owing to the circumstance that no account of them was entered in the books, and to the defective character of the documents available for the purpose of the inquiry, we are not enabled to state the precise amount of such issues; however, from a consideration of the available data and of the effect of crediting the amount of the excess to the account of "materials road department," which was to reduce the balance considerably below its normal average amount, we estimate that a sum of $100,000 or there abouts has been overcharged to profit and loss. In adjusting that account we have accordingly given credit for this estimated overcharge.

In March 1873 a payment of money was made to the Elmira Rolling Mills Company in lieu of old rails which should have been delivered to them in terms of their contract for the exchange of rerolled rails, supplied by them at various previous dates. This payment has been charged to the account of "expenses of road department," whereas it should have been charged to the account of "materials road department," the effect of this error was to overstate the expenses of the department by about $70,000, which we correct in our adjustment of the profit and loss account by crediting it with that amount.

DIVIDENDS.

The following is a statement of the dividends declared and paid during the period embraced by our investigation:

Date.	On Preference Stock.	On Common Stock.	Total.
29th Dec. 1871. *a*	$298,791	.....	$298,791
29th May 1872. *b*	298,791	.....	298,791
11th Feb. 1873. *c*	298,791	*e* $1,365,000	1,663,791
2d Sept. 1873.. *d*	298,791	*f* 780,000	1,078,791
	$1,195,167	$2,145,000	$3,340,167

The board minute on which the declaration of the dividend (*a*) proceeded states it to be based on "an estimate of the earnings of the Erie for the six months beginning 1st July 1871; that a sufficient amount has probably been earned in that period to justify the resumption of dividends on the preferred stock;" and a dividend was accordingly declared of 3½ per cent for the six months ending 31st December 1871.

The minute declaring the dividend (*b*) states it to be 3½ per cent "from the earnings of the current six months."

The dividends (*c*) and (*e*) proceeded upon a report from the president on the earnings and expenses of the company for the year ending 31st December 1872, and on an identical statement of figures from the Auditor-General, but how those figures were arrived at the books do not show. After considerable discussion, resolutions were passed declaring a dividend of 3½ per cent upon the preferred stock "out of the earnings of the company for the six months ending 31st December 1872," and a dividend of 1½ per cent upon the common stock for the twelve months ending 31st December 1872.

The accounts presented by the auditor and the question of dividend for the six months ending 30th June 1873 on the common stock and the preferred stock were, by a minute of the board, dated 28th August 1873, referred to a committee, who made their report to the board at its meeting on 2d September 1873, recommending a dividend of 3½ per cent upon the preferred stock and of 1 per cent upon the common stock; and a resolution was thereupon passed by the board declaring dividends (*d* and *f*), in pursuance of such recommendation, "out of the earnings of the road, appearing to its credit as by the auditor's accounts."

The accounts here referred to are identical with those published with the semi-annual report of the president, dated 2d September 1873.

A copy of the above mentioned minutes are set out in the Appendix marked F.

With respect to the dividends declared upon the preferred stock, the result of our investigation is to show, subject to the effect on the profit and loss of the periods to which they relate, of the adjustment of the charge of $400,000 made by Messrs. Bischoffsheim and Goldschmidt and of the other outstandings already indicated—that the earnings were sufficient to justify their payment; the corrected amount of these earnings for the two years ending 30th September 1873 is..$1,465,219

The four dividends (*a*, *b*, *e*, *d*) on the preferred stock for the two years ending 30th June 1873 amount to	1,195,167
Leaving the sum of	$270,052

which would have been presumably applicable to the payment of dividend on the common stock but for the deficit of $456,444, shown by the corrected profit and loss account to have existed on the 30th September 1871.

It follows, therefore, that there existed no balance of profits applicable to the payment of the dividends (*e* and *f*) declared upon the common stock, amounting to $2,145,000.

LIABILITIES AND ASSETS.

The only statements of liabilities and assets published during the period under investigation are those comprised in statutory accounts to the 30th September 1872 (No. 2), and those accompanying the president's semi-annual report to the shareholders to the 30th June 1873 (No. 3).

The following is an abstract of the statement of liabilities and assets to 30th September 1872:

Liabilities, 30th September 1872:	
Stock	$86,536,910
Bonds	26,895,000
Floating debt and bills payable, after deducting cash in hands of treasurer and agents of the company, and current accounts receivable	2,517,301
Profit and loss	2,816,768
	$118,265,979
Assets, 30th September 1872:	
Cost of road and equipment	$108,807,687
Construction accounts	2,601,705
Lake Erie propellers, and other items	1,287,360
Bonds of other companies	3,205 431
Stocks of other companies	766,894
Materials on hand and in shops	1,597,400
	$118,265,979

The item of "bonds" includes the sum of $3,000,000 consolidated mortgage bonds, which according to the books had been re-purchased by the company previous to the date of the statement, and were not then extant, and does not include the bonds which, although not entered in the books, had been issued prior to and were existing at that date, amounting to $4,383,500.

The item of "floating debt," &c., was made up of the following sums:

Creditor ledger balances	$11,161,077
From which were deducted cash and other debtor ledger balances	$5,643,776
Bonds re-purchased	3,000,000
	8,643,776
Producing the sum of	$2,517,301

as appearing in the statement of liabilities.

By the method thus adopted, the totals both of liabilities and assets were incorrectly reduced by $8,643,776.

The statement marked G in the Appendix is a comparative balance sheet to 30th September 1872, setting out in parallel columns the items forming the statement of liabilities and assets as published, the same as shown by the books of the company, and as corrected by the result of our investigation.

The subject matter of the statement of liabilities and assets included in the published accounts to 30th June 1873 being substantially incorporated in the balance sheet prepared by us to 30th September 1873, it has not been necessary to subject that statement to separate and distinct examination and correction.

Information elicited by our investigation, together with that contained in the books, has enabled us to prepare the accompanying balance sheet to 30th September 1873 in corroboration of the results arrived at by us in relation to the profit and loss account, which exhibits a net deficit of $2,331,392 at that date, subject to the probable increase in respect of matters previously referred to.

This balance sheet also presents a general view of the position of the company as on 30th September 1873, according to the books, and inclusive of our corrections; but an authoritative examination and determination of the many questions both of law and fact which affect the nature, extent, and value of its multifarious liabilities and assets must be accomplished before a complete elucidation of its present financial position can be effected. And for the purposes of such an examination, much useful information accumulated in the course of our investigation—though not directly bearing on the special object of it, as indicated by our instructions—can be made available.

From the information acquired by us with respect to the item of $8,229,284, the nominal amount of real estate and bonds and shares in various companies, recovered from Jay Gould, we are of opinion that the actual value of the recoveries will fall very far short of the sum stated. The amount ultimately realised should go to the credit of capital account.

The system of accounts requires amendment in many important particulars, and should be remodelled.

The president and officers of the company in New York readily gave us complete access to the books and documents under their charge, and generally rendered us every facility for the prosecution of the inquiry intrusted to us. We remain, gentlemen, your most obedient servants,

QUILTER, BALL, AND CO.
TURQUAND, YOUNGS, AND CO.

London, October 6, 1874.

☞ Ryland's trade circular reports all the metal industries of England dull, and says of the cutlery branches, chiefly established at Sheffield: "The American manufacturers have nearly monopolized their home demand for cheap table cutlery, and they are now endeavoring to secure the trade in cheap pocket goods."

American Railroad Journal.

Saturday, November 7, 1874.

Stock Exchange and Money Market.

The Money market has been working rather less favorably for the borrowing interests since our last. The demand has been more active, mainly on speculative account, and for use at the Stock and Gold Boards, especially the former. The inquiry from mercantile sources has been comparatively moderate. Call loans have been brisker within the range of 2@5 per cent, closing generally at 3@4 per cent to the leading Street houses. Commercial credits have been rated at 6@8 per cent per annum, on very choice to prime short date paper. The last public debt statement from Washington shows a liquidation of $681,000. The week has been partially broken by holidays here and in England; Monday (All Saints' Day) having been observed in the latter country as a holiday; while Tuesday (Election Day), as a legal holiday, was marked by a total suspension of wholesale business, in financial and commercial circles, in this city. The last weekly statement of the City Banks indicated a further reduction of net reserve, over the legal requirement, of specie and legal tender notes, over deposits and circulation, of $660,275. Government will sell only two millions of Gold, during the current month; half a million on each Thursday of the month. Another call for five millions of Five Twenties of the fourth series of the issue of 1862 has been issued by the Secretary of the Treasury, for redemption Feb. 2, 1875, on and after which interest on the designated bonds will cease. The City banks, last week enlarged their reserve of legal tender notes $790,800, and reduced their deposit item $452,100, while cutting down their specie average $1,564,100. They also report an increase of $85,000 in the loans and discounts, and an increase of $44,000 in their circulation. The U. S. Sub Treasury in this city closed the week with a currency balance of $56,277,344, against $58,890,823, the preceding week; and a coin board of $60,304,393, against $58,839,289. on the previous return. The City bank exchanges, during the week, were $394,770,672, or a daily average of $65,795,112. The customs revenue of the port, during the week, was $2,096,000. The City banks reported their average of gold last week at $12,021,100, and their greenback average at $59,621,600. Their deposits stood at $225,852,700. The loan item was $281,958,700. The circulation was $25,057,500.

The U. S. Sub Treasury receipts from all sources, at this port, in October, were $42,488,593, including $9,055,588 from customs; payments on all accounts, $35,758,305, including $2,466,493 of coin interest.

The City Bank net reserve of specie and legal tender notes now shows an excess, over the legal requirement of reserve, to liabilities, of $15,179,525.

The aggregate of the outstanding U. S. currency, of all denominations, Nov. 1, was $430,752,687. The outstanding amount of legal tender notes is 382 millions. The National bank circulation is over 350 millions.

The income of the Government, from internal revenues, thus far, in the fiscal year, commencing with July 1, 1874, has been over 37 millions.

Gold has shown more activity, and has been quoted stronger in price. The speculative inquiry has been more spirited. The customs inquiry has been moderate. The export drain has been light. Government has been disbursing the November coin-interest on the public debt quite freely during the week. The extremes of the week have been 109⅞@110⅛, closing on Wednesday at 110⅛, as against 110⅛ on Wednesday of the preceding week. The specie outflow last week was only $400,121. The imports of specie at this port since Jan. 1, have been $4,675,723, against $14,080,654 same time last year. The customs demand for Gold last week averaged $349,333 a day. Foreign Exchange has been in fair demand and quoted firmer toward the close with Bankers' sixty day bills on London leading off on Wednesday at $4 83¾@$4 84½; sight bills on London at 4 87@$4 88 to the £ sterling. The week's exports of Domestic Produce have been to the currency value of $5,236,120.

The import entries of Foreign Merchandise at New York, including dry goods, amount for the past week to $4,770,530.

Government Securities have been offered quite moderately and have shown more firmess, with

the leading issues in fair request, on investment account.

U. S sixes of 1881 closed on Wednesday of this week at 118⅜@118¾; U. S. Five-Twenties o 1862, (ex-Nov. coupon) at 110¾@111; U. S. Five-Twenties of 1864 (ex-Nov. coupon) at 113½@113¼; U. S. Five-Twenties of 1865, (ex-Nov. coupon) at 114½@114¾; U. S. Five-Twenties of 1865 consolidated, 116¼@116½; U. S. Five Twenties of 1867, 117¾@118; U. S. Five-Twenties of 1868, 117¾@118; U. S. Ten-forties at 112¼@112⅜; U. S. Fives of 1881, (Funding Loan) 111½@111⅝; Six per cent. currency Sixes from 117¾@118.

Business at the Stock Exchange has been on a restricted scale, with values generally depressed and lower, influenced, in part, by the firmer range of loan and discount rates, especially as against speculative borrowers. The inquiry for State and Railway bonds, has been moderate at irregular rates. Railway and miscellaneous share property has been more generally pressed for sales, leading to renewed weakness, and irregularity in values, on a less active speculative movement.

General business been less active. The movements in domestic produce have been less extensive. Values have been unsettled, and lower, in most instances. Foreign merchandise has attracted less attention, without leading to any important alterations in prices. The Metal trade has been somewhat brisker. The sales of Ingot Copper have been larger, in good part for forward delivery, at steady rates. A moderate movement has been noted in Iron, chiefly in Pig, and Wrought Scrap, at about previous figures. Eglinton Pig Iron quoted from yard at $37@$38; Glengarnock, $39@$40; No. 1 American Pig at $27@$29, No. 2 do. at $25@$27 50; Forge, $24@$26; English Rails at $48@$50, gold; American Rails at works, $55@$60; Old Rails, $31@$34. Wrought Scrap, $30@$32. Ocean freights have been moderately active, and at the close, quoted firmer.

The following quotations of sales of Railway and other securities are in addition to those giver elsewhere in our columns:—

☞ Lines are now being surveyed for a new railroad between the Niles and New Lisbon Railroad and Salineville, Ohio. The new road will be fifty miles in length, and pass through a fine tract of country in Eastern Ohio.

☞ The Rivier du Loup Railway is now opened for traffic as far as East Florenceville, 91 miles from Fredericton, and work is being rapidly pushed forward to complete the Line to Tobique before the end of the year.

☞ James E. Neal, of Philadelphia, has been awarded the contract for bridging and grading the Delaware Shore Railroad, and will commence operations in about two weeks.

☞ The Wells and Mankota Railroad in Minnesota was completed on the 31st ult., making a new route from the east to St. Paul via La Crosse.

☞ The Ohio and Toledo Railroad (narrow gauge) has been completed from Minerva to Carrollton.

☞ The Atlantic and Lake Erie Railway is completed to the tunnel, two and one-half miles south of New Lexington.

The Coal Trade.

The Philadelphia *Ledger* reports the total anthracite coal tonnage for the week ending October 24, at 508,179 tons, and for the coal year 14,794,698 tons, against 15,890,700 tons to corresponding time last year, being a decrease of 1,197,102 tons. The bituminous tonnage for the week is 77,419 tons, and for the year 2,745,559 tons, against 2,712,438 tons to same time last year, giving a total of all kinds for the week of 585,598 tons, and for the year of 17,540,257 tons, against 18,603,188 tons to same time last year, being a decrease of 1,062,881 tons; and then adds:

At Port Richmond for the week ending the 31st ult. the receipts of coal were 64,000 tons, the shipments 63,000 tons, leaving 95,000 tons on hand. The coal and coke tonnage of the Pennsylvania Railroad last week was 91,204 tons, and for the year 2,604,014. Of anthracite and bituminous there were 2,216,517 tons, and of coke 388 521 tons. This includes the tonnage of coal both east and west. Vessels during the past week have been in fair supply, with freights ruling steady at $1 35@1 40 to Providence, $1 60@1 70 to Boston, and 95 cents to New York. The coal production the past week was unusually large, and especially so from the Schuylkill region, the tonnage of the Reading's road and canal reaching 159,532 tons as against 82,820 tons in corresponding week last year. This increase of tonnage has no doubt been materially stimulated by the announcement of the advance in coal prices to take place to-day. The advance this year is ended. What may be determined on for the next is as yet unknown, though it is altogether probable that some working arrangement or understanding similar to that of the present year will control the coal trade of 1875. The coal market is fairly active on a large supply of coal on hand. The last public sale of Scranton coal at New York showed an average advance in prices of 18 cents per ton, thus evidencing an advance in the market for coal over that put on by the producing companies for the current month.

☞ The Somerset Railroad, which runs from West Waterville to Norridgewock, Me., a distance of thirteen miles, is now being extended to Madison, an additional distance of eight miles, and will probably be completed to Bangor early in December. This is the eastern section of a road designed to run to Quebec direct, saving about forty miles between that city and Portland. Thirty miles of the line at the other end have been opened this year, thirty miles more are to be built next season, and an additional subsidy from the Canadian government is expected.

☞ The St. John *News* says that a ship load of spikes and iron for the Louisburg Railway, and a schooner laden with iron, &c., for the bridge over Mira River, N. S. have arrived at Louisburg, C. B., which is a tangible indication that the Louisburg Railway is really going ahead.

☞ The Connecticut Board of Railroad Commissioners are now making an examination of the Railroads of that State. There are twenty-two railroads in the State, and twelve or fifteen of them have already been passed over by the board.

☞ The Boston and Lowell Railroad Company is substituting steel rails for the iron ones now in use. The intention is to equip the entire line with rails of this material.

☞ The directors of the projected railroad between Augusta and West Waterville contemplate a survey of the route before the winter sets in.

Public Debt of the United States.

By the report of the public debt of the United States for October, given in another column, it will be seen that the debt was decreased during the month $681,434 50. The total principal of the debt outstanding is $2,260,957,102 68, on which there is due and unpaid of interest $37,115,670 78, giving a total of principal and interest of $2,298,072,773 46. There was at the same time cash in the Treasury, of coin, $90,089,241,46; of currency, $16,896,770 18, exclusive of $52,525,000 of special deposits for redemption of certificates, making the total of cash in the Treasury $159,011,011 64, reducing the total debt, less cash in the Treasury, November 1, 1874, to $2,139,061,761 82. Debt less amount in the Treasury 1st of October, 1874, $2,139,743,193 32—showing a decrease during the past month of $681,434 50. Decrease of the debt since June 30, 1874, $3,026,479 34. Bonds issued to Pacific Railroad Companies, interest payable in lawful money, principal outstanding, $64,623,512; interest accrued and not yet paid, $1,292,470 24; interest paid by United States, $24,825,896 98; interest repaid by transportation of mails, etc., $5,497,253 60; balance of interest paid by United States, $18,828,148 87.

☞ The Hoboken Land and Improvement Company has foreclosed its mortgage on the terminal ground of the New York, West Shore and Chicago Railroad Company, consisting of twenty-eight acres in the Elysian Fields at Hoboken, N. J. The principal amounted to $1,546,208, and the accrued interest to $300,000, which with the arrears of taxes, made a total of more than two millions of dollars.

☞ At a meeting of the first mortgage bondholders of the Indianapolis, Bloomington and Western, and Danville, Urbana, Bloomington and Pekin Railroads, recently held in this city, a committee was appointed by each class of bondholders to make an investigation into the affairs of the roads and to take such action as should be for the best interests of the bondholders.

☞ Senator Foster of the Canada Central Railway and Mr. Potter of the Grand Trunk Railway have gone to Pembroke, Ont., to arrange for the immediate extension of the Canada Central from Renfrew to Pembroke. The gauge of the road will be changed to correspond with the Grand Trunk.

☞ The Midland (Eng.) Railway Company has resolved on the first day of January next to abolish second class carriages, to reduce the fares of first-class to three-halfpence a mile, and to discontinue the issue of return tickets.

☞ The contract for the entire line of the Michigan and Ohio Railroad, extending from Grand Haven, Mich., to Portsmouth, Ohio, 400 miles, has been let to C. Howland White & Co., of Defiance, Ohio, who are now making sub-contracts.

☞ Grading on the first twenty miles of the Utah Western railroad is nearly finished, and the iron for it is now on the way. Track laying will commence immediately.

☞ George H. Burroughs has been appointed General Superintendent of the Toledo, Wabash and Western Railway.

Boston, Hartford and Erie R. R.

In the U. S. Circuit Court, Boston, on the 30th ult., Judge Shepley gave a decision in the case of James M. Barnard et al., assignees in the bankruptcy of the Boston, Hartford and Erie Railroad Company, against A. J. Farwell & Co. The case presented in the bill is that of a transfer or attempted transfer by the directors of an insolvent corporation to one of their own number, as security for a debt due to him from the corporation, of all the available assets of the corporation, more than nine months before the petition in bankruptcy. Judge Shepley decided that the transfer in question cannot, under the circumstances, be declared valid; that the court cannot permit trustees to obtain any benefit or advantage for themselves to the injury or prejudice of those for whom they are acting in a fiduciary relation, or to protect, idemnify, or pay themselves at the expense of those who are similarly situated in relation to the fund. A trustee is an agent acting for others, and he cannot be permitted to act adversely to his principals.

☞ The Ohio State Journal says that work on the Wheeling and Lake Erie Railway is progressing slowly on account of the necessary detention of Mr. Shanley in Massachusetts at the Hoosac tunnel. The tunnel will be publicly opened November 1, and after that it is expected that Mr. Shanley will come on to Ohio and push the road through. Gen. McKee has several miles graded and ready for ties and iron near Dalton and Pike's station, and work is to be begun soon at Lodi.

☞ The officers of the Danbury and Norwalk Railroad company, recently elected, are: President, R. P. Flower, of New York City; Vice-President, James W. Hyatt, of Norwalk, Conn.; Superintendent, John W. Bacon, of Danbury, Conn.; Secretary and Treasurer, H. Williams, of Danbury, Conn.; Executive Committee, W. C. Street, H. H. Hollister, and Orrin Benedict; Auditing Committee, D. P. Nichols, Edgar S. Tweedy, and L. P. Hoyt.

☞ On application of the trustees of the first consolidated mortgage bonds of the St. Louis and South Eastern Railroad Company, the United States Circuit Courts in the States through which this road runs have appointed J. F. Alexander, Treasurer of the Company, Receiver, to have charge of all property of the road in Illinois, Indiana and Tennessee, and John Boyle, Receiver, to have charge of the property in Kentucky.

☞ At the annual meeting of the stockholders of the Louisville and Nashville Railroad, held in Louisville, Ky., on the 7th ult., E. D. Standiford, H. O. Newcomb and W. B. Caldwell were chosen directors for the ensuing three years. The board chose Thomas J. Martin President, to succeed the late H. D. Newcomb, and E. D. Standiford, Vice-President.

☞ J. M. Hood has been re-elected president and general manager, Alex. Rieman vice-president, and John S. Harden secretary and treasurer of the Western Maryland Railroad Co.

☞ C. Truesdale, M. Lee and F. Weyerhauser have been elected directors of the Rockford, Rock Island and St. Louis Railroad Co.

Pier Sheds.

A DECISION OF INTEREST TO THE OWNERS OF SHIPPING.

The General Term of this district has rendered a decision of importance to the owners of shipping, as effecting their right to erect sheds on the docks for the protection of their freight from the elements while being loaded or unloaded. Proceedings were taken in the name of the people to determine the right of Charles H. Mallory & Co. owners of a Southern line of steamers, to maintain a shed on the pier at which their steamers received and discharged their freight and passengers, which shed was claimed on the part of the plaintiffs in the case to be an obstruction of the wharf in its use for purposes of commerce, and a nuisance. A decision was rendered at Special Term against the right to maintain the structure in question. From this decision an appeal was taken, and the original judgment is now sustained. The appeal was heard before Judges Daniels and Lawrence, the latter of whom delivered the opinion of the court as follows:

This is an appeal from a judgment rendered at Special Term restraining the defendants frommaintaining a shed on Pier No. 20 East River, and from interfering with the free use of said pier by the public, as the same was used before said shed was placed thereon. Also from an order denying a motion made by the defendants that this cause be referred back to the Judge who tried the same with directions to make a specific finding "that numerous steam transportation lines running vessels between New York and other ports, both domestic and foreign, have for many years maintained upon piers occupied by them, some upon the East River and others on the North River, numerous sheds, without disturbance from the public authorities." The evidence at the trial, in my opinion, disclosed no facts which should lead us to a different conclusion from that which was reached by the General Term of this court when this case was before it on the appeal from an order made at Special Term for an injunction *pendente lite*. Fully concurring in the views then expressed in the opinion of the court delivered by Justice Brady, we see no reason for doubting that the judgment at the Special Term was correct and should be affirmed. Nor was there any error in the decision of the motion to send the case back to the learned Judge who tried the cause, for a specific finding, as requested by the defendant's counsel. The fact that similar sheds have been erected upon the piers mentioned in the request, without disturbance from the public authorities, is immaterial. The question in this case is, whether the shed erected by the defendants was erected under lawful authority, or whether it was a nuisance. The fact that other parties had erected sheds upon other piers had, and could have, no bearing on this question. The right of the defendants was to be determined by the facts showing the authority under which this particular structure was erected, not by the acts, or by the authority or license given to others. Even if the public authorities have allowed illegal structures to be placed upon other piers, evidence tending to show that fact would not control this case. The existence of a nuisance cannot be justified, nor its continuance demanded, by establishing that similar nuisances have been permitted. It seems, therefore, conclusively to follow that the order appealed from, as well as the judgment in this case, should be affirmed, with costs.

☞ Articles of association have been filed at Indianapolis, Ind., of the Bloomfield Railway Co., with a capital of $1,000,000. The proposed road will be 38 miles in length, extending from Bloomfield, in Greene County, to Merom, in Sullivan County.

Dividends and Interest.

The Calumet and Hecla Mining Company has declared a dividend of $5 per share, payable Nov. 16.

The Highland Street (Boston) Railway Co. has declared a dividend of 4 per cent payable on the second day of November.

The coupons of the Vermont Central Railroad due Nov. 1 on the Equipment Loan Bonds and on the Income and Extension Bonds will be paid at the National Bank of Redemption, Boston.

For other dividends, and interest payable in November, see pages 1416 and 1418 this week's issue.

☞ William H. Ferry, of Chicago, has been appointed receiver of the Rockford, Rock Island and St. Louis Railway.

Statement of the Public Debt of the United States November 1, 1874.

DEBT BEARING COIN INTEREST.

	Amount Outstanding.	Accrued Interest.

Central Branch Union Pacific bonds, 1862-64	1,600,000 00	32,000 00
Western Pacific bonds, 1862-4	1,970,560 00	39,411 20
Sioux City and Pacific bonds, 1862-64	1,628,320 00	32,566 40
Totals	$64,623,512 00	$1,292,470 24

Interest paid by United States, $24,325,396 98; interest repaid by transportation of mails, &c., $5,497,258 61; balance of interest paid by United States, $18,828,143 37.

The foregoing is a correct statement of the public debt, as appears from the books and Treasurer's returns in the Department at the close of business, October 31, 1874.

B. H. BRISTOW,
Secretary of the Treasury.

☞ Thomas F. Gallagher has been elected President of the Turtle Creek Valley Railroad Company, the road to run from Moss Side, via Barren Run, to New Alexandria, Pa.

☞ Reports from the Amador quicksilver mine continue to be of the most favorable character. It is being developed as rapidly as the means of the stockholders will permit.

☞ Stock in a street railway is being rapidly taken at Chillicothe, Ohio. It is to be completed and in running order by January 1.

☞ Nubia is to have a railroad. It is an English and German enterprise.

Notice to Bridge Builders.

SEALED PROPOSALS will be received at the Commissioners' Office, in Pottsville, (Penn.) until Saturday, November 7th, 1874, for erecting an iron bridge over the Schuylkill at Port Carbon. The bridge will be fifty-two feet span and sixteen feet in the clear. The masonry will be given out by the perch. Plans and specifications may be seen at the office of the Commissioners.

By order of the Commissioners.

VALENTINE BENNER,
MOSES HINE,
PATRICK CONERY.

Attest: O. J. AREGOOD, Clerk.

American Railroad Journal.

New York, Saturday, November 14, 1874.

Journalism as a Profession.

The Secretary of the Treasury has, by a recent decision, given the profession of journalism a new distinction. He has recognized it as one of the learned professions, to be ranked, at least so far as classification in the tariff laws goes, with medicine, jurisprudence and theology. An American journalist, who was returning from Europe, bringing with him a considerable quantity of books amounting in value to several hundred dollars, for use in his own library, claimed that the books were entitled to be entered duty free, as a portion of his professional journal library. He bases this application upon that section in the customs laws which makes provision for the free importation of books for the use of a library of a physician, a lawyer and a clergyman. The custom house officers at Baltimore, at which port the books were imported, decided that journalism is not a profession, and that these books could not be imported under that provision. An appeal was taken to the Secretary of the Treasury, who has decided that journalism is a profession to such an extent as will give a journalist the advantages of this provision of the law.

Leather Belting.

OAK-TANNED SOLE LEATHER AND AMERICAN BEND LEATHER.

The leather belting on exhibition at the American Institute Fair is very appropriately placed near the quarters devoted to machinery, and in such a position that it may be carefully examined by visitors.

Messrs. J. B. HOYT & Co., 28 and 30 Spruce St., N. Y., make an excellent display in articles of this description. This firm have been extensively engaged in this line of trade for a great many years, and their belting is made from carefully selected hides, while the various processes of tanning and finishing are such as long experience has pointed out to them to be in every respect the best, considering strength and durability. Their belts are well adapted to the use of machinists, cotton and woolen manufacturers, paper mills, bleach and dyeworks, mines, and all manufacturing industries of an extensive character requiring the aid of continuous appliances where simple or complicated machinery is in motion.

Every piece of belting made by them is stretched by powerful mechanical contrivances, jointed and secured in such a manner that both sides will present an even surface to the pulley and run uniformly, as though it were a single strip of leather, instead of being two or more pieces. Waterproof joints are made for belts used in damp or wet situations.

This house very recently were awarded gold medals and diplomas from various fairs and industrial exhibitions, and received the first premium for their several specimens of leather belting at the Cincinnati Exposition, the Southern Ohio Fair held at Dayton, and the Michigan State Fair held at East Saginaw.

In addition to their leather belting, above described, on view at the American Institute Fair, the firm have also on display, in the regular department assigned to sole-leather, calfskins and fancy leathers, specimens of oak-tanned goods that, in our opinion, cannot be excelled by any other of like description. Their American bend leather is displayed side by side with the best English imported stock, and the comparison is every way favorable to the domestic. In the line of sole leather suitable to gentlemen's or ladies' fine custom work there is nothing that takes precedence of the productions of this old established and reliable house.

The individual members composing the firm of J. B. Hoyt & Co. are J. B. Hoyt, D. B. Fayerweather, and Harvey S. Ladew, all of whom are gentlemen of long experience in their line of business, and who guarantee perfect satisfaction to their customers in everything pertaining to their trade.

Shortages upon Grain.

The Chicago *Times* says it is understood, and stated with considerable authority, that the Baltimore and Ohio Railroad Company is about to make an announcement concerning the transportation of grain which contains an unusual significance, and will prove of incalculable benefit to Chicago grain shippers, and then adds:

The railroad company proposes, on the completion of its line to this city, to guarantee for all shipments a full delivery of goods consigned to it. When this fact is considered in connection with the immense grain trade of this city, the full meaning of the movement will be better appreciated.

Ever since the grain trade of Chicago began to assume anything like its present proportions, the shortages upon the grain have been one of the formidable burdens which have been borne by the dealers, and by this means alone there have been lost, in the aggregate, sums amounting to hundreds of thousands of dollars yearly. Naturally, any means proposed which will relieve the shippers of this onerous burden will be gladly accepted, and if the new line into Chicago will take the initiatory step in the matter, as is announced, it will attract to itself an unusual amount of traffic. It is assumed that at the present stage of railroading, a company should run such a class of cars as to provide against loss from leakage. In the matter of shortage the largest scope is given for rascality, and in the event of suspicious loss, the shipper has no recourse to recover except by means of a tedious and expensive fight in the courts. Without reflecting in the least upon the honesty of the railroad companies, there are numerous cases where the most flagrant dishonesty is apparent somewhere, and it seems nothing more than right that the railroad companies generally should follow the course in which the Baltimore road proposes to take the initiative.

Such action on the part of this company cannot but result in the largest fruits, both to itself and to the City of Baltimore. If the road will maintain, in connection with such a course, a low grain rate, it cannot help but command an immense traffic, as shippers will be sure to avail themselves of an outlet which insures them for every pound

of the article shipped. The policy of the road in taking the action it does is variously considered, but may be found in a few facts which are well known in connection with the corporation. Besides the interest the company has in attracting to Baltimore all the business in its power, it owns and controls a large number of grain elevators, which are capable of accommodating and handling large quantities of grain, and it is to the company's interest to secure as much of the grain trade as possible, even at a slight loss in handling. The City of Baltimore is also assuming considerable prominence as an outlet for foreign shipments, and the number of steamship lines is yearly increasing. The Baltimore and Ohio Railroad is largely interested in lines which ply between the latter city and New York and Boston, as also to foreign ports, and it is apparently in the interest of the company to attract all the through shipments to the Southern city in their power.

The latest move on the part of the Baltimore road in the interest of Chicago cannot but compel the New York lines to take a similar action, as in the event that they fail to do so, Baltimore will command the largest proportion of the grain shipments of the Northwest, which the Metropolis cannot afford to lose.

Atlanta and West Point Railroad.

The earnings of this road for the years ending June 30, 1873 and 1874, were as follows:

	1873.	1874.
From passengers	$142,068 41	$111,857 10
" freight	235,208 28	185,740 21
" mails	10,781 28	10,781 28
" express	8,657 01	6,560 18
" miscellaneous	2,629 22	9,293 83
	$399,344 80	$324,232 60
Expenses, viz:		
Conducting transp.	$79,694 22	$64,378 72
Motive power	97,558 77	66,111 78
Maintenance of way	72,553 62	62,227 94
Rent of Macon & Western Railroad	6,000 00	6,000 00
Repairs and rent of cars	13,842 25	13,961 06
	$269,648 86	$212,679 45
Net earnings	$129,695 44	$111,553 15
From which deduct extraordinary expenses in 1873-'74—		
For two new locomotives	$27,000	
New iron and re-rolling, over ordinary repairs	15,000	
		42,000 00
Net over all payments		$69,553 15

In 1872-'73 the extraordinary expenses were $29,534, leaving the balance of earnings at the close of that year $100,161 44. The President in his report says:

In reporting the operations of the road for the past year, the board need do little more than refer to the report of the superintendent, which accompanies this report. The statement of condition and balance sheet of the treasurer are also appended, which exhibit the financial resources of the company. These documents, though instructive, are not very encouraging. The net profits, or profits unexpended, are not sufficient to pay the usual dividend of eight per cent. It is true that the deficiency occurs by appropriating more to the restoration of property, and increase of outfit, than the present means of the company would bear. But admitting this apology, the exhibit is not so favorable as the directors had hoped and expected.

The superintendent, by a comparative statement shows a falling off of receipts, compared with the previous year, of $75,111 70, and acknowledges the result to be contrary to his predictions. The superintendent, with trifling interruption, has been connected with the company, as engineer or superintendent, from its organization, and has been remarkable for the accuracy of his anticipations of future receipts. But the troubles and disasters which have recently beset the railroad interest at the South have baffled all human sagacity. The providence of God and malevolence of man seem to be united for the destruction of this devoted interest! Very few railroads at the South pay any dividend to the stockholders. Many cannot pay interest on their bonded debts, and are in the hands of receivers, and many others, at this time, are not making their legitimate working expenses! Yet, whilst acknowledged to be useful and necessary to the country, they are the victims of a senseless prejudice, and new burthens are constantly heaped upon them by hostile legislation!

The true causes of the very large and unexpected reduction of receipts is correctly accounted for by the superintendent. Whilst there is a large reduction of tonnage, and decrease in the number of passengers, yet the heaviest reduction has been from a reduction of rates and fares. Until some improvement in the resources of that country on which our road is mainly dependent, we cannot expect a very rapid recovery of our former profits, now reduced by its depressed and exhausted condition. The condition of this part of the South west is properly characterized as abnormal. By Nature, one of the finest countries on the earth, and one of the most productive in Southern exports, much of it is now almost a desert, and seems to dry up and impoverish every interest connected with or dependent upon it!

In last Annual Report reference is made to losses and embarrassments by default of connecting roads, and by the guarantee of the bonds of the Montgmery and West Point Railroad. The hope that the balance on freight account would be paid has not been realized, and the loss by the guarantee has been somewhat larger than anticipated. Fortunately, the company owes nothing, except for the loss brought on it by these defaults, and the passing of one more dividend would have liquidated the loss. But as the company has been free from debt, its stock has been much relied on as a reliable family investment, and a suspension of dividends is attended with serious inconvenience. In this view, and as the profit and loss account rendered a dividend legitimate, the directors declared a dividend of four per cent, payable the first of August, which will be provided for from the effects of the company without an increase of debt.

Under our system of long through lines of associated roads, a leading curse to solvent roads is a forced association with insolvent connections. When weak, they must be sustained by loans or guarantees, and to risk current balances in their hands is an absolute necessity. This system of through lines greatly cheapens transportation from distant points, but as it is hard upon the home producer and frequently disastrous to the solvent railroads themselves, it may well be doubted whether it would not be for the interest of the latter that each railroad should be confined in its operations to the territory embraced in its charter.

The Superintendent hopes for increased profit on a more thorough organization of the Atlanta and Richmond Air-Line, and there is some hope of the completion of the Vicksburg and Shreveport Road—a road of great importance to our road, and the completion of which is only a question of time. A project has also been recently discussed and hopefully agitated to establish a line of first-class steamers from Vera Cruz to New Orleans, there to be connected with, and perhaps owned, by, an associated line of railroads to New York. The scheme is a magnificent one, and perfectly feasible, and if ever carried into effect it will fix the prosperous destinies of every link in the shortest line from New Orleans to New York. Mexico has ceased her pronunciamentos, and is said to have become orderly and industrious, and thoroughly imbued with a spirit of improvement. If this be so, what a stream of trade and travel will crowd all peaceful avenues from this splendid country, in its intercourse with our Capitol and Northern cities, and, through them, with Europe! It is pleasant to contemplate this vast project, though its realization may be in the distant future.

A general reduction of receipts has forced a corresponding reduction in expenses on most Southern Railroads, as a matter of necessity. Large reductions have been made on ours. If further reductions can be made consistently with safety and true economy they will be made. There is a limit, however, which should be prudently observed, especially in the road departments.

With the exceptions named by the superintendent, the business of the year has been performed with great regularity and freedom from accident, and the officers generally, so far as known to the Board, have been faithful in the performance of their duties.

The company have 21 locomotives, 6 passenger, 4 baggage, 1 express, 2 shanty, 414 box, 18 stock, 23 platform, 8 coal and 5 cab cars. Number of through passengers, 12,663; do., way, do., 41,698—total, 54,361, against 62,987 in the previous year, a decrease of 8,626. Tons of freight transported, 63,485, against 86,592 in the previous year, a decrease of 23,107. Bales of cotton transported, 90,156; same for previous year, 84,171—increase, 5,985.

BALANCE SHEET, July 1, 1874.

Road outfit and real estate		$1,197,634 51
Bills receivable		149,091 25
Vicksburg and Meriden R. R. Co.'s preferred stock		3,432 00
Mobile and Montgomery R. R. Co.'s preferred stock		700 00
Dividend No. 35		49,288 00
Interest account		7,587 84
Bond exchange account		18,791 35
Due by agents and connecting roads		26,499 92
Road expenses for the year		254,679 45
Cash on hand		6,509 14
		$1,714,213 46
Capital stock	$1,232,200 00	
Profit and loss, July 1, 1873	68 445 98	
Bonds of the company	83,000 00	
Due to agents and connecting roads	6,154 88	
Dividends unpaid	180 00	
Road earnings for the year	324,232 60	
	$1,714,213 46	

President.—HON. JOHN P. KING.

Directors.—B. C. Yancey, John S. Bigby, F. Phinizy, W. B. Berry, John F. Moreland, L. B. Lovelace.

General Sup't.—L. P. GRANT.

Secretary & Treasurer.—W. P. ORME.

The Festiniog Railway.

A great deal was said about this little railroad a few years ago, but it seems to have been neglected of late, and the curiosity concerning it which was so whetted then is not gratified. The Railway Returns of the British Board of Trade for 1873, however, show that it still exists and carries freight and passengers; and in order that the friends of the narrow gauge may be able to quote its latest workings when they fortify their arguments with it, we present the following abstract of the report, which is for the year 1873:

Length of road, single track, 23½ inch gauge, 14 miles.

Capital cost:

Paid up common stock (4 per cent dividend in 1873)	$430,000
Preferred stock (6 per cent dividend in 1873)	175,000
Loans (bearing 5 per cent interest)	60,000
Total cost ($47,566 per mile)	$665,000

Besides dividends and interest charges, the company paid in 1873, $6,760 for "wayleave," and $1,855 for rent of lands, and adding this to the interest and dividends we have $37,102, which is 5.57 per cent of the cost of the road.

The number of passengers carried and receipts therefrom were:

	Number.	Receipts.
First class	1,495	$1,950
Second class	3,562	1,220
Third class	120,577	17,790
	128,634	$20,960

The tons of freight carried were:

	Tons.	Receipts.
Minerals	124,830	$80,860
General merchandise	18,845	17,800
	143,675	$98,860
Freight and passenger earnings		$119 620
From other sources		2,915
Total earnings		$122,535
Working expenses (59.68 per cent)		73,070
Net receipts		$49,465

The average charges per mile were, counting each ton and passenger as passing over the entire line:

	Cents.
First class passenger	3 09
Second class passenger	2.44
Third class passenger	1 05
Ton of minerals	4.62
Ton of merchandise	6.74

The ordinary mineral rates in England are from 1½ to 2 cents per mile.

If the charges for the different subjects of transportation are in proportion to the cost, it cost this road in 1873, 2.77 cents to move a ton of minerals a mile, and 4.04 cents to carry a ton of merchandise that distance.—*U. S. R. R. and Min. Reg.*

St. Louis and Iron Mountain Railroad.

The report of this company for the year 1873 covers the following lines: St. Louis to Belmont, 196 miles; Bismarck to Moark, 110 miles; Mineral Point to Potosi, 4 miles—total 310 miles. Of the line from Bismarck to Moark, 99 miles, (from Pilot Knob to Moark,) was owned by the Arkansas Branch Company, a separate corporation, though the stockholders were the same as those of the St. Louis and Iron Mountain. Of this line the 20 miles from Poplar Bluff to Moark were not worked by the company until after April 2.

At the close of the year 1873 the property was represented as follows:

St. Louis and Iron Mountain stock		$10,000,000
Funded debt		8,622,000
		$18,622,000
Arkansas Branch stock	$2,499,000	
Funded debt	2,500,000	
		4,999,000
Total both lines		$23 621,000

The earnings, expenses, etc., for the years 1872 and 1873, were as follows:

Earnings:	1872.	1873.
From freight	$1,673,672 91	$1,667,041 58
From passengers and other sources	473,845 22	556,532 48
Total	$2,147,518 13	$2,223,574 06
Operating expenses	1,459,399 52	1,528,549 55
Net earnings	$688,118 61	$695,024 51
Gross earnings per mile	$10,040 43	$7,290 41
Net earnings per mile	3,333 59	2,278 77
Per cent of expenses	67.90	68.74

The report for 1872 does not include the earnings of any part of the Arkansas Branch, which was under construction during that year. The comparatively small earnings from that line necessarily reduced the earnings per mile for 1873, which, excluding the Arkansas Branch, were $9,376 04.

	1872.	1873.
Passenger train mileage	353,707	462,149
Passengers carried	552,315	537,276
Freight train mileage	579,686	639,390
Tons of freight carried	688,574	682,908
Tonnage mileage	68,528,952	60,236,979

The decrease in tonnage mileage was 13½ per cent, and this, with the increase in the number of tons moved, indicates an increase in local and a decrease in through business. The number of cars ferried across the Mississippi between Belmont, Mo., and Columbus, Ky., was: Passenger train cars, 6,154; loaded freight, 14,186; empty freight, 8,335; total, 28,625 cars of all kinds.

Improvements during the year included 20.244 miles new second track and sidings; three new engine houses, one for 16 engines at De Soto, one for 11 at Carondelet and one for 4 at Piedmont; freight house and new platforms at St. Louis; four new turn tables, and a transfer table 140 feet long, the latter at Columbus; coal bins at Black well and a number of lesser buildings. Six bridges have been renewed or repaired and a large amount of repairing done on the trestle work near Belmont. Much work has been done filling in the company's property in St. Louis, and 137.8 miles of fence were built along the road.

During the year 15 engines, 40 flat and 9 caboose cars were purchased and two baggage cars built. The equipment at the close of the year consisted of 98 locomotives; 10 first class and 11 second class passenger, 2 sleeping, 1 directors' 15 baggage, mail and express, and 2 Blood's day cars; 295 box, 447 Green Line box, 67 stock, 761 flat, 50 combination box and 47 caboose cars; 1 boarding, 1 derrick and 7 dump cars.

Since the close of the year the St. Louis and Iron Mountain and Arkansas Branch Companies have been consolidated with the Cairo, Arkansas and Texas, and Cairo and Fulton, and a new company formed known as the St. Louis, Iron Mountain and Southern.

Survey of the Hudson River.

THE PROPOSED SHIP CANAL ROUTE.

Messrs. E. D. Johnstone and George Canrick, civil engineers and surveyors, and eight assistants employed by Gen. Newton, Chief of the Department for the Improvement of Rivers and Harbors, have been engaged for the past two weeks surveying the Hudson River from the State dam to the side-cut locks, West Troy. The object of the survey is to find out between the points above-named the depth of water, the configuration, and the nature of the substance of the bottom of the Hudson River. The more remote objects of the survey, however, are, it is surmised, to ascertain the feasibility and probable expense of the scheme which proposes to connect the great West with the Atlantic—the Champlain Ship Canal. The scheme proposes to make the Hudson River between Troy and Fort Edward navigable for ships drawing from twelve to fourteen feet of water and large and strong enough to cross the Atlantic. It also proposes the widening and deepening of Wood Creek between Fort Edward and Whitehall, which here joins the south end of Lake Champlain. Passing through Lake Champlain to the north end, ships could reach the St. Lawrence through the Caughnawaga Canal, the construction of which latter is included in the scheme, and will be commenced next Spring. All obstructions between Troy and the St. Lawrence removed, ships leaving any port in Europe could get as far west as Duluth, Minn., "the zenith city of the unsalted sea," via Chicago, without breaking bulk. The scheme of course anticipates that the river between Troy and Albany will be deepened and improved. A bill was introduced into the Legislature last Spring appropriating $40,000 for the improvement of the river between Albany and the upper side-cut locks in West Troy. The next thing to this, contemplated by the scheme, is the deepening of the river by the State between the side cut and the State dam. The survey of the river alluded to above is a fair indication that this will be accomplished.—*Troy Press, Nov. 7.*

Bills of Lading upon the Canals.

CONSTRUCTION OF WORDS. "QUANTITY GUARANTEED."

The facts in the late case of Bissel *vs.* Campbell, (54 N. Y., 353,) are briefly stated in the following opinion:

The plaintiffs made a contract with one Stevens to carry four cargoes of wheat from Buffalo to New York, consigned to Dows & Co., two of which cargoes were to be loaded upon the boats of defendant. Plaintiffs' shipping bill had in it the words "quantity guaranteed," and provided that "damage or deficiency in quantity as specified," should be deducted from charges by consignees. They made a contract with the defendant for the carriage of the two cargoes upon two of his boats. He executed a shipping bill for each boat, acknowledging the shipment of a specified quantity of wheat, consigned to Dows & Co., omitting the provision as to any deduction by the consignees for damage or "shortage," but containing the words "quantity guaranteed," and the following clause: "On safe delivery as above, Messrs. Jennison & Sprague collect freight as noted, retain our advance of $768 08, and balance settle with captain." Jennison & Sprague were the agents of the plaintiffs, in the City of New York, for the collection of freight. The defendant delivered the cargoes in the City of New York, to the consignees, and then demanded the balance of his freight of Jennison & Sprague, and they paid it to him. When Jennison & Sprague settled with the consignees for the freight, the latter claimed a deduction of $90 for shortage, which was allowed, and this action is brought to recover this sum with interest. Upon the trial, the defendant gave evidence tending to show that he delivered to the consignees all the wheat he received at Buffalo, and claimed that he was not, therefore, responsible for any shortage, but the court held at the circuit that, under his bills of lading, he had guaranteed that he would deliver the same quantity of wheat which was specified in the bills, and that he was absolutely responsible for any shortage, and this raises the first question for our consideration.

An ordinary bill of lading is not conclusive, as between the original parties, as to the quantity said to have been received, and any mistake or fraud in the shipment of the goods may be shown. In Meyer *vs.* Peck (28 N. Y., 590), it was held that the words, in a bill of lading, "any damage or deficiency in quantity the consignee will deduct from balance of freight due the captain," did not import a guaranty that the captain had received the whole quantity of grain specified, and that the captain could show in defense of a claim for shortage, that he had delivered all the grain he had received. But Judge Denio says, in that case, that "no doubt it might be made a matter of express contract that the carrier should account for

the precise quantity acknowledged in the instrument, and that no other evidence on that point should be received."

There has been considerable litigation in the courts growing out of the claim of consignees against carriers for shortage, and it must always be difficult to show whether the shortage was occasioned by the misconduct of the carrier or some mistake in the measurements. Hence, some years since, the clause was inserted in bills of lading upon the canals, that the consignee might make a deduction from the freight on account of shortage in substantially the form contained in the bill of lading in the case of Meyer *vs.* Peck. It seems to have been supposed that such a clause would make the carrier responsible for the quantity specified in his bill of lading, but the Court of Appeals held otherwise, and recently the words "quantity guaranteed" have been inserted in bills of lading, and the question to be determined is, what do they mean? In construing written contracts, force should be given to all the language used. These words were inserted for some purpose. If they be construed to mean a simple guaranty that the carrier will, without default on his part, deliver to the consignee, all the goods he receives, they have no force, as the contract implied by law requires him to do this. It would be quite unreasonable to suppose that the carrier meant by these words to take upon himself the risks from inevitable accident, from which the common law exempts him, and unless we hold that they have the meaning claimed for them by the plaintiffs, it would seem that they have been inserted without any purpose.

I am, therefore, prepared to hold that, upon the bills of lading themselves, the carrier in this case was responsible to the shippers for the quantity of grain specified. But, if I am wrong in this, and there is not sufficient in the bills of lading to enable us to determine the meaning of these words, then they may be regarded as an elliptical phrase, having a meaning to those engaged in transportation upon the canals. It was said by Chief Justice Shaw in Brown *vs.* Brown (8 Metc., 576), that "the meaning of words and the grammatical construction of the English language are *prima facie* matter of law to be construed and passed upon by the court. But language may be ambiguous and used in different senses; or general words in particular trades and branches of business, as among merchants, for instance, may be used in a new, peculiar or technical sense; and therefore, in a few instances, evidence may be received from those who are conversant with such branches of business, and such technical or peculiar use of language, to explain and illustrate it." In this case the words "quantity guaranteed," a detached sentence, located as it was in the bills of lading, may be regarded as a technical expression, the meaning of which is not apparent, but known to, and understood by persons engaged in the business of transportation upon the canals. A person engaged in such business was permitted to testify that this phrase meant, according to the custom of the business, that the bill was conclusive evidence of the amount of grain to be delivered by the carrier; and that, if it fell short, the carrier was to pay for the shortage, and if it overrun he was to have the benefit of the excess. I think this evidence was competent, (1 Greenleaf Ev., § 280). Hence, the court committed no error in holding that the defendant was responsible for any shortage, and this brings us to the next question, whether there was any competent proof of any shortage.

The plaintiffs claim that the defendant authorized Mr. Sprague, of the firm of Jennison & Sprague, to settle with the consignees for the freight, and hence, that he is bound by the settlement he made in which he allowed a deduction from the freight of $90 on account of shortage. I cannot take this view of the evidence. The defendant had nothing to do with collecting the freight of the consignees, and he had made no contract with them. His bill of lading specified that Jennison & Sprague, who were the agents of the plaintiffs for that purpose, should collect the freight of the consignee, and that they should pay him the balance of freight due him. After he had delivered the wheat, he called upon them and demanded the balance due him, and they paid it to him. He had a claim against the consignees for demurrage, and, after his boats had been unloaded, he told Jennison to collect and settle the freight, but to do nothing to prejudice his claim for demurrage. This evidently had reference to the freight due the plaintiffs, as the defendant had no claim for freight against the consignees. His claim was against the plaintiffs, and had been paid. It was simply a direction to Sprague, and could have meant no more, that when he settled plaintiff's claim against the consignees for freight, he should be careful not to prejudice his claim for demurrage. But if we assume that defendant gave him direction to collect and settle for his freight, such direction conferred no authority to admit that there was shortage, and settle for that If there was shortage, the claim of the consignees for that was against the plaintiffs under their bill of lading, and the remedy of the plaintiffs was against the defendant under his bills of lading. Hence there was nothing in that evidence showing that the defendant was precluded from disputing the shortage. It became necessary, then, for the plaintiffs in some way to prove the shortage, and this they attempted to do by the measurer's returns. The defendant, in various ways, insisted that he was not bound by these returns, but that the measurers or parties who unloaded the cargoes should be called to prove how much wheat he delivered. The measurers of grain in New York are not public officers, and there is no law, making their returns, as to measurement, evidence. It was proved, however, that as between buyer and seller in New York, the measurer's returns are received and acted upon as evidence of the amount of grain sold, and that the buyer generally names the measurer, and, if no objection be made by the seller, the measurer thus named measures the grain. In this case Dows & Co. had sold this wheat, and measurers employed by them measured the grain, and made the returns to them of the quantity. The defendant was clearly not bound by this measurement. He had not sold or bought the grain, and had no part whatever in selecting the measurers. He had in no way assented that their returns should be taken as evidence of the quantity. Hence, whatever the custom in New York may be between buyer and seller as to measurement, it did not apply to him. Whatever the custom may be between parties as to the measurement of grain in their amicable relations and dealings with each other, I apprehend, when they get into a Court of Justice, neither will be bound by the results of measurements, to which he has not expressly or impliedly assented.

As there was no other evidence to show that the defendant did not deliver all the wheat specified in his bills of lading, there was an entire failure of proof to show any deficiency in the quantity of freight delivered, and hence the plaintiffs should have been defeated.

It follows that the judgment must be reversed and new trials granted, costs to abide event.

Indian Railways.

REPORT OF THE GOVERNMENT DIRECTOR.

There are now open in India 5,872 miles of railway, which have cost about £97,000,000, giving an aggregate expenditure of £16,536 a mile. Of this length 727 miles are laid with a double line, and 5,725 miles on the 5ft. 6in. gauge. A further extent of 1,850 miles is now in course of execution, of which 817 miles will be on the 5ft. 6in. and 1,033 on the metre gauge. During last year 312 miles of additional line were opened.

As an instance of cheap and rapid construction, the Dakore branch of the Bombay, Baroda, and Central India may be mentioned. The line was commenced in November last, and was opened for passenger traffic on the 8th of April. It has cost about £4,000 per mile. It was, of course, an easy line to construct; but the materials were provided from this country, and the works, which were on the 5ft. 6in. scale, could not have been completed in so short a time without great energy on the part of the chief engineer, Mr. Mathew, and his staff.

The protective works which were being applied to the bridges over some of the larger rivers, such as the Beas, the Sutlej, and the Jumna, have been carried out, and the plan of throwing boulders of stone into the bed of the rivers round the piers seems to have answered. The scour is diverted to where it is harmless, and it is expected that the bridges will now be effectually secured against any damage from future floods.

The Indus Valley, which was to have been constructed on the narrow gauge, is now included in the category of those which are to be constructed on the 5ft. 6in. gauge. This change has recently been decided by the present Secretary of State in Council, on the ground that "it would not be consistent with his duty to allow the financial expectations," which are "the subjects of much uncertainty," "to outweigh the great strategic and political dangers which are constantly growing in importance, and which authorities so high as his Excellency (the Governor-General) and the Commander-in-Chief concur with many others in pressing upon her Majesty's Government." With regard to the line from Lahore to Peshawur, instructions are given that "if considerations derived from the advanced state of the works should not," in the judgment of the Viceroy, "be of sufficient importance to influence his decision, this railway will be constructed on the same gauge as the Indus Valley line."

The quantity of materials sent out from this country last year amounted to 118,245 tons, exclusive of ten locomotives and 85,499 tons of fuel. The Government were the chief consignors, having shipped nearly 60,000 tons for the State railways. Since the commencement of railway operations in India about 4,700,000 tons of materials have been despatched to that country, of the value of £31,150,000. The proprietors of Indian railway securities numbered 62,818 on 1st January, being only 878 in addition to the previous year. Of these, 56,597 were shareholders registered in England, and 4,821 were holders of debenture bonds or stock. Only 900 shareholders reside in India, of whom 421, or .67 per cent. of the whole, are natives. Upwards of £4,000,000 was expended in the construction of railways during the year 1878, the expenditure being nearly equally divided between

the Government and the companies. The whole amount of guaranteed capital which had been raised to 31st March last was £94,725,000, of which £92,417,000 had been expended. The sum expended direct by the Government amounted to £5,398,000, making a total expenditure of upwards of £100,000,000.

The total number of accidents to passenger trains officially reported during the year was 258, of which 18 were caused by collisions, 20 by trains getting off the proper line, 26 by fires, 165 by cattle trespassing, and 34 by other and minor causes. The number of persons injured was 488. Of these 96 were passengers, 236 railway servants, and the rest trespassers. There were 166 deaths—13 passengers, 74 railway servants, and 79 trespassers. In the previous year the number killed was 211, of whom 9 were passengers and 154 servants. Last year 8 passengers lost their lives through accidents beyond their control, and 54 were injured in the same way.

The receipts of the railways during the year 1873, after paying all expenses, amounted to £8,185,069, being £315,845 in excess of the previous year.

The gross receipts were £6,742,790, compared with £6,351,614 of 1872, and the expenses, £3,557,721, or 53 per cent., compared with £3,482,394, or 55 per cent.

The revenue for each of the last five years and the amounts paid for guaranteed interest in each year have been as follows:—

	Revenue.	Guaranteed Interest.
1869	£2,520,952	£4,013,871
1870	2,846,600	4,212,577
1871	2,686,260	4,422,242
1872	2,869,223	4,600,883
1873	3,185,069	4,613,511

It will thus be seen that the net amount borne by the State has in the five years averaged £1,550,996 per annum, and that while in the first year of the five the deficiency was £1,492,919, in the last it was £1,428,442.

When it is borne in mind that during this time the open mileage has been increased by about 1,000 miles, these results are disappointing. It may be observed, however, that trade for the last few years has not been in a satisfactory or flourishing state. The imports of merchandise show an actual falling off.

	Rupees.
In the year 1869-70 they were	32,92,75,198
" 1872 73 "	31,26,05,614

The exports in the same year were—

In the year 1869 70 they were	50,67,95,448
" 1872 73 "	53,44,03,833

The want of proper access to many of the stations on the lines is also one cause of the slow progress which has hitherto been made in the development of the traffic. When this deficiency has been supplied, and when feeders to the existing lines are constructed, a marked improvement will probably appear.

The expenses of maintenance amounted to £788 453, and of working to £2,771,268, being at the rate of 53 per cent. of the gross receipts as compared with 55 per cent. in the previous year. On the East Indian the rate was 58. On the Scinde, Punjab, and Delhi it was 69. The number of trains run was 137,406 compared with 155,594 of the previous year. The train mileage was 15,650,597 compared with 14,548,862. The train mileage receipts averaged 8.52s.; the expenses 4.46s.

The most striking feature in the traffic of the years 1873 and 1874 is the very large movement of grain to those stations on the East Indian and Eastern Bengal which are situated in, or which are close to, the districts where scarcity existed. The movement has had only a trifling effect upon the receipts of the year to which this report relates, but it has had a great influence over the results of the current half year. During the year 1872 the amount of grain conveyed on the East Indian, Eastern Bengal, and Punjab and Delhi amounted to 254,213 tons. In 1873 it rose to 477,528 tons. The traffic was also stimulated by the reduction in the rate of conveyance, while the railway receipts were unaffected by the lower charge in consequence of the Government making up the difference between that and the usual rate. During the first six months of the present year about 544,200 tons have been conveyed by railway from Calcutta and from the Punjab to the famine stricken districts. By no other means, probably, could so large a quantity have been transported from one part of India to another. Additional proof is thus given of the great importance of railway communication. Without it the exertions of Government and the outlay incurred must have been increased tenfold. With railways, and a well conceived system of irrigation, famines may become unknown, although seasons of scarcity may occasionally occur. In other staples, such as cotton, sugar, hides, &c., the traffic has diminished, and piece goods have been nearly stationary. Salt increased on all the lines except the Great Southern of India, and the jute conveyed on the Eastern Bengal rose from 103,691 tons in 1872 to 124,049 tons in 1873.

We have our holidays and royal visitors and festive gatherings in this country to produce traffic on the railways. In India the same things occur, but there are also religious pilgrimages and festivals and certain customs peculiar to the country, which, as affecting the traffic, it may be worth while to mention. During the past year the passenger traffic on the lines in Western India has been less, in consequence of the suspension of marriages and the absence of marriage feasts, the year 1872-73 being the one out of every twelfth year in which no marriages take place among Hindoos living between the rivers Kistna and Godavery. Another example was a great bathing festival at the Ganges on the occasion of the eclipse of the moon, when special trains on the Oude and Rohilcund brought large numbers to the river.

The conclusions drawn by Mr. Danvers from the results of last year's operations are that the normal condition of the railways is, under existing circumstances, one of slow progress; that the railways are capable of doing more work; that with branches and good roads judiciously laid out traffic will increase; that in most cases a reduction in expenditure is feasible; that with proper care and economy and an enlightened management the majority of the lines would become more profitable and probably remunerative.

☞ From the report of the Boston, Clinton and Fitchburg Railroad company for the year ending September 30, 1874, we learn that the earnings during that time were $605,640, and the expenses, including dividends, $639,778, which leaves a surplus of $25,862. The receipts were $11,798 and the expenses $34,071 less than the previous year. The rolling stock has been very much improved and increased during the year, and is in excellent condition. Smith's vacuum brake has been applied to all passenger trains at a large expense. A large renewal of iron has also been made with much heavier rails than heretofore used. Tyler's patent safety switches have been put in at all switches, in place of the old style. The track and bridges on all portions of the road are in excellent condition, and will compare favorably with any of our New England Railroads.

☞ At a meeting of the directors of the Messalonski and Kennebec Railroad held at Augusta, Me., on the 5th inst., H. A. Dewitt was chosen president, E. F. Pillsbury clerk, and James W. North Treasurer. The meeting determined upon making at once a preliminary survey of the route of the road between Augusta and West Waterville, a distance of 16 miles.

Telegraph Lines.

At a meeting of the stockholders of the Franklin Telegraph Company in Boston on the 6th inst., a resolution was passed, 5,976 to 2,672, instructing the President of the company to lease its lines, franchise and other property, except what are called supplies now on hand, to the Atlantic and Pacific Telegraph Company for 99 years at a yearly rental of not less than $25,000, payable semi-annually.

The new direct Cable Company, represented in New York by Mr. Olyphant, has contracted with the Atlantic and Pacific Telegraph Company for its entire business, the arrangement to begin Nov. 15.

Work will soon commence on the military telegraph that is to connect the forts and camps along the Northern and Northwestern frontier of Texas.

Telegraph lines have been extended from Downieville to Gold Lake, Sierra county, Nevada, via Sierra City.

Parties interested in the extension of telegraphic communication in California are prospecting in Inyo county, with a view to putting its principal towns in telegraphic communication with the other portions of the State by building a line from Bakersfield.

Ohio and Mississippi Railroad.

The earnings of the Ohio and Mississippi Railway Company for three months—

From July 1 to 30th September, 1874, were		$958,156 89
Less transfers formerly included		95,512 80
		$862,644 69
Operating expenses, taxes included, (64¼ per cent) were	$651,417 80	
Less transfers as above	95,512 80	
		555,905 00
Leaving net earnings		$306,739 09
Less extraordinary expenses		10 646 56
Available surplus for three months		$296,092 53

A Wooden Railroad in Michigan.

The tram road of Van Etten, Kaiser & Co., manufacturers of rough and dressed pine, lumber and lath, at Pinconning, Bay county, Michigan, is 11 miles long, and is thus described by the above firm:

There are first logs laid crosswise about five or six feet apart. The logs are from 12 to 16 feet in length. Then gains are cut in the logs and flatted timber laid in these gains; this prevents the road from spreading. Our rails are of hard maple. Before spiking the rails down we put ties across the stringers, notching the stringer enough to let the tie down even with the top of stringer and spike the tie fast before the rail is laid on. The ties are of 2 inch hemlock plank from 6 to 12 inches wide; this prevents the stringer from rolling. We would recommend any one who wishes to build a road on the above system to build it as straight as possible. We have some curves in our road, and we have been obliged to dispense with wooden rails on the curves and lay down iron. We operate our road with locomotive power. Cost of building without rolling stock is about $2,000 per mile. The stringers are made from elm, oak, pine and ash, and are flatted on two sides to 10 inches in thickness.

☞ The Grand Trunk Railway Company of Canada have commenced doubling their track between Bonaventure depot and Point St. Charles, via Tanneries Junction.

RAILROAD EARNINGS—MONTHLY.

	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.	Total.
Atlantic & Pacific:
